Gold hit record highs, despite a firm USD

- After hitting record highs, gold prices may stay strong on safe haven demand amid geopolitical risks…
- …but positive real rates and a resilient USD would eventually weigh on gold prices later in the year
- High gold prices could also curb demand for jewellery, coins and bars, while central bank demand may moderate

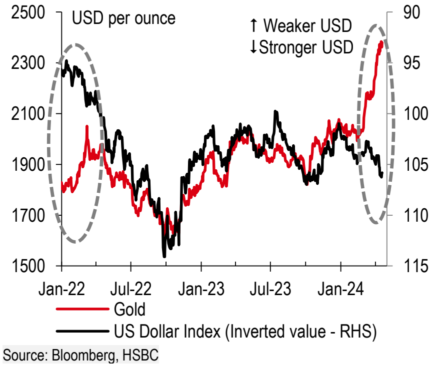
Gold prices hit record highs in April 2024, fuelled by safe haven demand amid growing geopolitical risks. Indeed, geopolitics is taking on elevated importance for gold prices this year, not only because of ongoing geopolitical unrest, but also the 75 elections scheduled for 2024, with these outcomes affecting at least half of the world's total population. Many of these elections have already taken place, while a host of important ones, including India, the EU Parliament, Mexico, UK and, most importantly, the US, have yet to be held. **Until the results of these elections are known, geopolitical uncertainty and by extension safe haven demand for gold will probably stay high**, in our precious metal analyst's view.

Geopolitics takes on elevated importance for gold prices in this major election year

In the near term, **an escalation in the Middle East conflict could send gold prices higher, even if the USD also rallies**. While gold being priced in USD generally moves inversely to the USD, such relationship could be broken, especially in the period of growing geopolitical risks (Chart 1). As recently discussed in "*FX Viewpoint – A resilient USD (12 April 2024)*", **we see the broad USD remaining strong through the course of the year**. Our precious metal analyst thinks that a firmer USD would be negative for gold, should the inverse relationship between gold prices and USD restore later in the year.

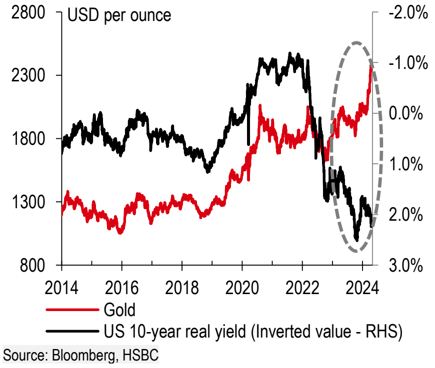
A firmer USD would eventually be negative for gold, in our precious metal analyst's view

1. Gold prices and the USD generally move inversely to each other



Source: Bloomberg, HSBC

2. The relationship between US real yields and gold may be restored



Source: Bloomberg, HSBC

Apart from the USD, gold is historically sensitive to US real rates, and while there has been a notable disconnect in this relationship, our precious metals analyst thinks that **positive US real rates could be a headwind for gold later this year** (Chart 2).

Positive US real rates could also weigh on gold later in 2024

With high gold prices, **mine output and recycling levels are set to increase this year and next, resulting in greater gold supply**. At the same time, physical demand for gold coins and bars and jewellery might be curbed at price levels above USD2,2000 per ounce. Central bank demand remains historically strong, triggered by geopolitical risks and portfolio needs but may not be fully sustained at these price levels. **Weaker demand could play a role in eventually restraining gold prices.**

Both physical demand and central bank demand may moderate at price levels above USD2,200 per ounce

Disclosure appendix

Important disclosures

This document is for information purposes only and it should not be regarded as an offer to sell or as a solicitation of an offer to buy the securities or other investment products mentioned in it and/or to participate in any trading strategy. Information in this document is general and should not be construed as personal advice, given it has been prepared without taking account of the objectives, financial situation or needs of any particular investor. Accordingly, investors should, before acting on it, consider the appropriateness of the information, having regard to their objectives, financial situation and needs. If necessary, seek professional investment and tax advice.

Certain investment products mentioned in this document may not be eligible for sale in some states or countries, and they may not be suitable for all types of investors. Investors should consult with their HSBC representative regarding the suitability of the investment products mentioned in this document and take into account their specific investment objectives, financial situation or particular needs before making a commitment to purchase investment products.

The value of and the income produced by the investment products mentioned in this document may fluctuate, so that an investor may get back less than originally invested. Certain high-volatility investments can be subject to sudden and large falls in value that could equal or exceed the amount invested. Value and income from investment products may be adversely affected by exchange rates, interest rates, or other factors. Past performance of a particular investment product is not indicative of future results.

HSBC and its affiliates will from time to time sell to and buy from customers the securities/instruments (including derivatives) of companies covered in HSBC Research on a principal or agency basis.

Whether, or in what time frame, an update of this analysis will be published is not determined in advance.

Additional disclosures

1 This report is dated as at 19 April 2024.

2 All market data included in this report are dated as at close 18 April 2024, unless a different date and/or a specific time of day is indicated in the report.

3 HSBC has procedures in place to identify and manage any potential conflicts of interest that arise in connection with its Research business. HSBC's analysts and its other staff who are involved in the preparation and dissemination of Research operate and have a management reporting line independent of HSBC's Investment Banking business. Information Barrier procedures are in place between the Investment Banking, Principal Trading, and Research businesses to ensure that any confidential and/or price sensitive information is handled in an appropriate manner.

4 You are not permitted to use, for reference, any data in this document for the purpose of (i) determining the interest payable, or other sums due, under loan agreements or under other financial contracts or instruments, (ii) determining the price at which a financial instrument may be bought or sold or traded or redeemed, or the value of a financial instrument, and/or (iii) measuring the performance of a financial instrument or of an investment fund.

Miscellaneous

Notwithstanding this document is not investment advice, please be aware of the following for the sake of completeness. Past performance is not an indication of future performance. The value of any investment or income may go down as well as up and you may not get back the full amount invested. When an investment is denominated in a currency other than the local currency of an investor, changes in the exchange rates may have an adverse effect on the value, price or income of that investment. Where there is no recognised market for an investment, it may be difficult for an investor to sell the investment or to obtain reliable information about its value or the extent of the risk associated with it.

This document contains forward-looking statements which are, by their nature, subject to significant risks and uncertainties. Such statements are projections, do not represent any one investment and are used for illustration purpose only. Customers are reminded that there can be no assurance that economic conditions described herein will remain in the future. Actual results may differ materially from the forecasts/estimates. No assurance is given that those expectations reflected in those forward-looking statements will prove to have been correct or come to fruition, and you are cautioned not to place undue reliance on such statements. No obligation is undertaken to publicly update or revise any forward-looking statements contained in this document or any other related document whether as a result of new information, future events or otherwise.
