Certain defined terms

This document comprises the *Annual Report and Accounts 2010* for The Hongkong and Shanghai Banking Corporation Limited ('the Bank') and its subsidiaries (together 'the group'). References to 'HSBC', 'the Group' or 'the HSBC Group' within this document mean HSBC Holdings plc together with its subsidiaries. Within this document the Hong Kong Special Administrative Region of the People's Republic of China is referred to as 'Hong Kong'. The abbreviations 'HK\$m' and 'HK\$bn' represent millions and billions (thousands of millions) of Hong Kong dollars respectively.

Cautionary statement regarding forward-looking statements

This *Annual Report and Accounts* contains certain forward-looking statements with respect to the financial condition, results of operations and business of the group.

Statements that are not historical facts, including statements about the bank's beliefs and expectations, are forward-looking statements. Words such as 'expects', 'anticipates', 'intends', 'plans', 'believes', 'seeks', 'estimates', 'potential' and 'reasonably possible', variations of these words and similar expressions are intended to identify forward-looking statements. These statements are based on current plans, estimates and projections, and therefore undue reliance should not be placed on them. Forward-looking statements speak only as of the date they are made, and it should not be assumed that they have been revised or updated in the light of new information or future events.

Forward-looking statements involve inherent risks and uncertainties. Readers are cautioned that a number of factors could cause actual results to differ, in some instances materially, from those anticipated or implied in any forward-looking statement.

Chinese translation

A Chinese translation of the *Annual Report and Accounts* is available upon request from: Group Communications (Asia), Level 32, HSBC Main Building, 1 Queen's Road Central, Hong Kong. The report is also available, in English and Chinese, on the Bank's web site at www.hsbc.com.hk.

Established in Hong Kong and Shanghai in 1865, The Hongkong and Shanghai Banking Corporation Limited is the founding member of the HSBC Group – one of the world's largest banking and financial services organisations – and its flagship in the Asia-Pacific region. It is the largest bank incorporated in Hong Kong and one of Hong Kong's three note-issuing banks.

Serving the financial and wealth management needs of an international customer base, the Bank and its subsidiaries provide a complete range of personal, commercial and corporate banking and related financial services in 21 countries and territories in Asia-Pacific – with the largest network of any international financial institution in the region – and in six other countries around the world. Employing some 72,500 people, of whom 38,600 work for the Bank itself, the Bank and its subsidiaries had consolidated assets at 31 December 2010 of HK\$5,040bn.

The Hongkong and Shanghai Banking Corporation Limited is a wholly owned subsidiary of HSBC Holdings plc, the holding company of the HSBC Group, which has an international network covering 87 countries and territories in six geographical regions; Europe, Hong Kong, Rest of Asia-Pacific, the Middle East, North America and Latin America.

Principal Activities

The Hongkong and Shanghai Banking Corporation Limited and its subsidiaries and associates provide a comprehensive range of domestic and international banking and related financial services, principally in the Asia-Pacific region.

Financial Statements

The state of affairs of the Bank and the group, and the consolidated profit of the group, are shown on pages 27 to 192.

Reserves and dividends

Profits attributable to shareholders, before dividends, of HK\$57,597m have been transferred to reserves. During the year, a surplus of HK\$7,513m, net of the related deferred taxation effect, arising from professional valuations of premises and held by the Bank and the group was credited to reserves. Details of the movements in reserves, including appropriations therefrom, are set out in the Consolidated Statement of Changes in Equity and note 39 to the financial statements. The interim dividends paid in respect of 2010 are set out in note 9 to the financial statements. The Directors do not recommend the payment of a final dividend.

Directors

The names of the Directors at the date of this report are set out above. All the Directors served throughout the year save for N L Kidwai, who was appointed on 8 October 2010. V H C Cheng and S K Green resigned as Directors on 1 February and 3 December 2010 respectively. M F Geoghegan and A A Flockhart resigned as Directors on 31 December 2010. David Wei Zhe resigned as a Director on 22 February 2011. P A Thurston has been appointed as a Director with effect from 1 March 2011, or such later date that approval is received from the Hong Kong Monetary Authority.

Directors' Interests in Contracts

No contracts of significance to which the Bank, its holding companies, its subsidiaries or any fellow subsidiary was a party and in which a Director had a material interest subsisted at the end of the year or at any time during the year.

Directors' Rights to Acquire Shares or Debentures

To help align the interests of employees with shareholders, certain Directors have been granted options and conditional awards over HSBC Holdings plc ordinary shares by that company (being the ultimate holding company) pursuant to the HSBC Holdings Executive Share Option Scheme ('ESOS'), the HSBC Holdings Group Share Option Plan ('GSOP'), the HSBC Holdings Savings-Related Share Option Plan and the HSBC Share Plan, or acquired shares under the HSBC Holdings UK Share Incentive Plan.

Under the ESOS and GSOP, discretionary awards of share options, with vesting subject to the attainment of a predetermined corporate performance condition, were made to employees at all levels of HSBC. The exercise price of options granted under the ESOS was the market value of the ordinary shares on the business day prior to the grant of the option. The exercise price of options granted under the GSOP is the higher of the average market value on the five business days prior to the grant of the option, or the market value of the ordinary shares on the date of grant of the option, or the nominal value of a share.

Under the HSBC Holdings Savings-Related Share Option Plan, eligible employees, including Directors, may be granted options over HSBC Holdings plc ordinary shares at a price per share which is fixed at the average of the middle market quotations of an ordinary share derived from the London Stock Exchange Daily Official List for the five dealing days preceding the date of the invitation to participate in the plan, discounted by 20%. The vesting of conditional awards of HSBC Holdings plc ordinary shares granted to Directors under the HSBC Share Plan is generally subject to the individual remaining in service for a period and, for Performance Share awards, the attainment

Report of the Directors (continued)

of corporate performance conditions. Under the HSBC Holdings UK Share Incentive Plan eligible employees, including Directors, may make monthly contributions which are used to make market purchases of HSBC Holdings plc ordinary shares.

During the year, V H C Cheng, A A Flockhart, M F Geoghegan, S K Green, S T Gulliver, N L Kidwai, M M Y Leung and P T S Wong acquired shares in HSBC Holdings plc under the terms of the HSBC Share Plan.

Apart from these arrangements, at no time during the year was the Bank, its holding companies, its subsidiaries or any fellow subsidiary a party to any arrangements to enable the Directors to acquire benefits by means of the acquisition of shares in or debentures of the Bank or any other body corporate.

Executive Committee

An Executive Committee meets regularly and operates as a general management committee under the direct authority of the Board. Peter Wong Tung Shun is Chairman of the Committee and the current members of the Committee are:

Louisa Cheang Wai Wan (Regional Director, Personal Financial Services, Asia-Pacific), R H Cox (Chief Risk Officer), S A Davis (Chief Executive Officer, India), N P Fretwell (Head of Human Resources, Asia-Pacific), D L Fried (Group Head of Insurance), Anita Fung Yuen Mei (Head of Global Banking and Markets, Asia-Pacific), G D Harvey-Samuel (Head of International), A C Hungate (Chief Executive Officer, Singapore), M M Hussain (Chief Executive Officer, HSBC Bank Malaysia Berhad), S C Legg (Chief Financial Officer), M S McCombe (Chief Executive Officer Hong Kong), C M Meares (Chief Executive Officer, Global Private Banking), E I Sinyak (Chief Technology and Services Officer), Cindy Tang Hsin (Head of Group Communications, Asia-Pacific), Helen Wong Pik Kuen (President and Chief Executive Officer, HSBC Bank (China) Company Limited).

Raymond Cheng Siu Hong (Chief Technology and Services Officer, Asia-Pacific with effect from 1 March 2011) and Donna Wong Ka Yuk (Head of Human Resources, Asia-Pacific with effect from 1 March 2011) will succeed E I Sinyak and N P Fretwell respectively as members of the Executive Committee with effect from 1 March 2011. N P Quinn (Head of Commercial Banking, Asia-Pacific with effect from 1 April 2011) will become a member of the Executive Committee with effect from 1 April 2011.

Audit Committee

An Audit Committee, comprising three non-executive Directors, meets regularly with the group's senior management and the internal and external auditors to consider and review the group's financial statements, the nature and scope of audit reviews and the effectiveness of the systems of internal control, compliance and risk management. The members of the Audit Committee are T B Stevenson (*Chairman of the Committee*), Dr Lo Ka Shui and Dr Patrick Wang Shui Chung.

Remuneration Committee

The Board of the Bank's ultimate parent company, HSBC Holdings plc, has established a Remuneration Committee comprising independent non-executive directors. Details of remuneration policy and principles are contained within the *Annual Report and Accounts 2010* and *Capital and Risk Management Pillar 3 Disclosures as at 31 December 2010* of HSBC Holdings plc.

Donations

Donations made by the Bank and its subsidiaries during the year amounted to HK\$102m.

Compliance with the Banking (Disclosure) Rules and Hong Kong Monetary Authority Supervisory Policy Manual on Corporate Governance

The Directors are of the view that the Accounts and Supplementary Notes for the year ended 31 December 2010, which will be published separately, fully comply with the Banking (Disclosure) Rules made under section 60A of the Banking Ordinance and that the Bank complies with the Hong Kong Monetary Authority Supervisory Policy Manual CG-1 'Corporate Governance of Locally Incorporated Authorised Institutions'.

Auditor

The Accounts have been audited by KPMG. A resolution to reappoint KPMG as auditor of the Bank will be proposed at the forthcoming Annual General Meeting.

On behalf of the Board Stuart T Gulliver, *Chairman* 28 February 2011

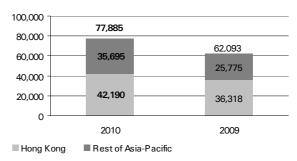

Financial Review

Summary of Financial Performance

Group Profit

Profit attributable to shareholders for 2010 reported by The Hongkong and Shanghai Banking Corporation Limited ('the Bank') and its subsidiaries ('the group') increased by HK\$12,201m, or 26.9%, to HK\$57,597m in 2010. Profit before taxation increased by HK\$15,792m, or 25.4%, to HK\$77,885m.

Profit before tax (HK\$m)

Geographical Regions

The group's operating segments are organised into two geographical regions, Hong Kong and Rest of Asia-Pacific. Due to the nature of the group, the chief operating decision-maker regularly reviews operating activity on a number of bases, including by geography, by customer group, and by retail businesses and global businesses. Although the chief operating decisionmaker reviews information on a number of bases, capital resources are allocated and performance assessed primarily by geographical region and the segmental analysis is presented on that basis. In addition, the economic conditions of each geographical region are highly influential in determining performance across the different types of business activity carried out in the region. Therefore, the provision of segmental performance on a geographical basis provides the most meaningful information with which to understand the performance of the business.

Geographical information is classified by the location of the principal operations of the subsidiary or, in the case of the Bank, by the location of the branch responsible for reporting the results or advancing the funds.

Information provided to the chief operating decision maker of the group to make decisions about allocating resources and assessing performance of operating segments is measured in accordance with Hong Kong Financial Reporting Standards ('HKFRSs'). Due to the nature of the group's structure, the analysis of profits shown below includes intra-segment items between geographical regions with the elimination shown in a separate column. Such transactions are conducted on an arm's length basis. Shared costs are included in segments on the basis of actual recharges made.

Products and services

The group provides a comprehensive range of banking and related financial services to its customers in its two geographical regions. The products and services offered to customers are organised by customer groups and global businesses.

- Personal Financial Services (PFS) offers a broad range of products and services to meet the personal banking, consumer lending and wealth management needs of individual customers.
 Personal banking products typically include current and savings accounts, mortgages and personal loans, credit cards, insurance, wealth management and local and international payment services.
- Commercial Banking (CMB) product offerings include the provision of financial services, payments and cash management, international trade finance, treasury and capital markets, commercial cards, insurance, wealth management and investment banking services.
- Global Banking and Markets (GB&M) provides tailored financial solutions to major government, corporate and institutional clients worldwide. The client-focused business lines deliver a full range of banking capabilities including investment banking and financing solutions; a markets business that provides services in credit, rates, foreign exchange, money markets and securities services; global asset management services and principal investment activities.
- Private Banking (PB) provides a range of services to meet the banking, investment and wealth advisory needs of high net worth individuals.

Hong Kong

Profit before tax (HK\$m)

Hong Kong reported pre-tax profits of HK\$42,190m compared with HK\$36,318m in 2009, an increase of 16.2%, driven by strong insurance sales, increased fee income and lower loan impairment charges.

Lending balances rose across customer groups, with significant increases in both CMB and GB&M following strong economic growth and a recovery in trade flows. Revenue growth has in part been offset by an increase in staff and IT costs driven by business expansion to maintain our strong market position. Loan impairment charges were significantly lower than last year across all customer groups, reflecting an improvement in credit conditions.

We have maintained our market leadership in residential mortgages, credit cards, life insurance and deposits. Premier customer numbers increased by 31% compared with 31 December 2009 to more than 500,000 and the Advance proposition, which was launched in early 2010 to capture the mid-market segment, achieved a customer base of over 670,000 by year end. Premier and Advance numbers include both existing and new to bank customers. In life insurance, we retained the number one market share position as measured by new business annualised premium equivalent. This was a result of strong customer demand and a strategy targeted towards the high net worth customer segment. We continued the development of offshore renminbi-related products and maintained our position as a market leader for renminbi products in Hong Kong.

Net interest income increased by 2.6%, as strong loan growth, most notably in CMB and GB&M, was partly offset by lower spreads resulting from competitive pressures, the low interest rate environment and loan growth being weighted towards the latter part of the year.

Commercial lending growth was a result of the recovery in trade volumes, our continuing support to customers and the pursuit of our leading international business bank strategy. Growth was most pronounced in commercial, industrial and international traderelated lending. To a lesser extent, growth was also noted in commercial real estate and other property related lending, supported by a buoyant property-market. Personal lending balances were 18.4% higher, driven by residential mortgage lending where we continued to lend conservatively with an average loan-to-value ratio of 55% on new mortgage drawdowns and 38% on the overall portfolio.

Asset spreads narrowed in 2010 compared to 2009 as a result of competitive pressures particularly in trade-related lending and HIBOR-linked residential mortgages. In Balance Sheet Management, net interest income decreased as yield curves flattened and maturing higher yield positions were reinvested at lower rates.

Customer deposits increased reflecting growth in customer numbers in CMB as well as Premier in PFS. The benefit of these deposits was reduced by narrow deposit spreads as interest rates remained at historically low levels.

Net fee income increased by 10.3%, with fees from investment products growing as improved market sentiment led to higher demand, particularly in unit trusts, along with higher fees from funds under management as a result of higher net inflows and improved fund performance. There was growth in trade-related fees and income from payments and cash management as business volumes improved. Underwriting fees rose as several significant initial public offerings (IPOs) and loan syndications concluded in 2010.

Net trading income was 3.2% higher than in 2009. Increased holdings of trading debt securities led to an increase in net interest income. Foreign exchange revenues benefited from increased turnover on the back of client demand. This was partly offset by lower revenues from Credit trading following the strong results achieved in 2009 as spreads recovered from distressed levels and from Rates trading as market volatility reduced in 2010.

Geographical Regions (continued)

Net income from financial instruments designated at fair value was HK\$3,454m compared with HK\$6,391m in 2009. The movement was primarily due to lower revaluation gains in 2010 on assets held to support linked insurance liabilities following the strong rebound in stock markets in 2009. The value of our liabilities to policyholders is determined in line with the value of supporting assets, so to the extent that these lower investment gains were attributed to policyholders, there was a decrease in net insurance claims incurred and movements in liabilities to policyholders.

Net earned insurance premiums grew by 18.0% to HK\$33,713m as successful sales campaigns drove strong growth, particularly in deferred annuity and unit-linked products. A life insurance product designed for high net worth individuals also performed well.

Net insurance claims incurred and movement in liabilities to policyholders increased by 8.7% in 2010 to HK\$37,022m as increases in liabilities to policyholders arising from new business inflows were partly offset by lower investment returns in 2010 compared to 2009, as noted above.

Gains less losses from financial investments increased to HK\$937m compared to HK\$117m in 2009, mainly due to gains from the disposal of available-for-sale investments in Balance Sheet Management in the first half of 2010. In January 2010, we increased our stake in Bao Viet Holdings from 10% to 18% and accounted for it as an associate from then, leading to an accounting gain of HK\$386m.

Other operating income increased by 33.3% to HK\$12,714m largely due to an increase in present value of in-force business ('PVIF'), reflecting higher life insurance sales, as well as the gain recognised following the sale of HSBC Private Equity (Asia) Limited to its management, partly offset by the non-recurrence of a gain on sale of a property in 2009.

Loan impairment charges and other credit risk provisions decreased by 77.2% to HK\$883m, reflecting the recovery in economic conditions. There were fewer large specific impairments in CMB and GB&M as credit conditions improved. Loan impairment charges also fell in PFS, mainly on unsecured lending as unemployment and bankruptcy levels fell.

Operating expenses rose by 13.4% as the business grew and the economy recovered. We continued to hire both customer facing and support staff to meet growing business demand. Marketing costs rose notably in PFS due to the launch of several large campaigns, including for Advance and credit cards, and rising transaction volumes led to increased back office and support costs.

Geographical Regions (continued)

Rest of Asia-Pacific

Profit before tax (HK\$m)

Rest of Asia-Pacific reported pre-tax profits of HK\$35,695m compared with HK\$25,775m in 2009, an increase of 38.5%. The economic performance of the region was reflected in a recovery in trade volumes, an increase in our customers' appetite for investment-related products, strong growth in lending balances and a significant decline in loan impairment charges. There was also a significant increase in the contribution from associates in mainland China. These factors contributed to the increased profitability, offset by a rise in operating expenses to support this growth.

During 2010 we continued to target growth particularly in the key regional markets of mainland China, India, Indonesia, Singapore, Malaysia and Australia. We have consolidated our position as the leading foreign bank in mainland China with 106 outlets in 27 cities, 16 rural bank outlets and 38 Hang Seng outlets in 13 cities. We maintained our leadership in the development of RMB products and now have RMB settlement capability in 36 countries covering all six continents. In July 2010 we agreed to acquire a substantial part of The Royal Bank of Scotland Group plc's commercial and retail businesses in India. In Malaysia, 4 additional Amanah branches were opened and our first Amanah branch opened in Bangladesh, further expanding our footprint in this sector.

Net interest income increased by 9.6%, following strong loan growth throughout the region as business and consumer confidence increased, partly offset by narrower asset spreads in the face of strong competition. Higher lending balances resulted from business growth in both GB&M and CMB across the key regional markets of mainland China, Singapore, India, Australia, Malaysia and Indonesia. This reflected our targeted business strategy and the recovery in trade volumes in the region. PFS lending balances also rose, mainly in the mortgage book, most notably in Singapore, Australia and Malaysia, as well as in Taiwan and mainland China, supported by successful marketing campaigns.

Narrower asset spreads were also the result of a shift to lower risk customers following the managed reduction of certain unsecured lending portfolios, most notably in India.

Customer deposits grew by 19.9% primarily in mainland China, Australia and Singapore, as a result of a targeted strategy to attract new customers in higher value segments, coupled with improved economic conditions in the region.

Balance Sheet Management income declined from the very strong results in 2009 as higher yielding trades matured, interest rates generally remained low and yield curves flattened.

Net fee income was 27.3% higher, with particular growth in GB&M following an increase in funds under management driven by inflows and an improvement in equity markets. There was also an increase in trade-related fees, credit facilities and payments and cash management in CMB as trade activity recovered. In PFS fee income also rose from the increased sales of investment and insurance products.

Net trading income declined by 0.6%, as reduced market volatility led to lower Credit and Rates trading income. In India, Rates trading income fell as gains achieved in 2009 from narrowing bond yields did not recur. Lower trading revenues in South Korea reflected a non-recurrence of one-off gains recognised in 2009. This was partly offset by higher foreign exchange income in mainland China, India and Malaysia as a result of strong volumes on the back of economic growth and increased client hedging requirements. Interest income from trading activities also increased, resulting from increased holdings of debt securities.

Net income from financial instruments designated at fair value was HK\$303m, compared with HK\$868m in 2009. The movement was due to higher revaluation gains in 2009 on assets held to support insurance business liabilities as equity markets had experienced a strong rebound. To the extent that the lower investment gains in 2010 were attributed to policyholders, there was a decrease in net insurance claims incurred and movement in liabilities to policyholders.

Gains less losses from financial investments recorded income of HK\$1,079m compared to a loss of HK\$248m in 2009 as a result of a gain on disposal of an equity investment in a Singaporean property company, coupled with gains on sales of other available-for-sale investments and the non-recurrence of impairments reported in 2009.

Other operating income increased by 30.7% to HK\$2,282m. This was primarily due to an increase in PVIF reflecting higher new life insurance sales in Taiwan, mainland China and Malaysia, as well as recoveries against initial fair values on loan portfolios acquired with PT Bank Ekonomi Raharja Tbk in Indonesia and from The Chinese Bank Co., Ltd in Taiwan.

Net earned insurance premiums increased by 23% to HK\$3,480m, largely due to higher sales in Taiwan, mainland China and Malaysia, primarily from successful product launches and marketing campaigns. Growth in the insurance business resulted in a related increase in net insurance claims incurred and movement in liabilities to policyholders, which was more than offset by the lower investment gains reported above in net income from financial instruments designated at fair value.

Loan impairment charges and other credit risk provisions decreased by 49.2% to HK\$3,736m. Loan impairment charges fell in PFS, most notably in India as certain unsecured and higher risk lending portfolios were managed down, and as economic and credit conditions improved across the region. Fewer specific impairments were recognised in CMB as a result of the recovery in the economic environment. These were partly offset by certain specific impairment charges in GB&M incurred in Singapore.

Operating expenses increased by 16.8% to HK\$32,183m in support of business growth and to capitalise on the region's economic recovery. Examples were the ongoing expansion of the branch network in mainland China and opening of the new headquarters in Shanghai, as well as the local incorporation and expansion of the Taiwan operations. Staff numbers rose to support business expansion, particularly in the key regional markets of mainland China, Indonesia, Singapore and Australia. Higher marketing costs were incurred in India, Australia, Taiwan, Singapore and Malaysia and higher business volumes led to increased intercompany processing costs.

Share of profit from associates and joint ventures in the region increased by 42.0% to HK\$10,912m, with a higher contribution from Bank of Communications due to lending growth and higher net fee income from cards, wealth management and settlement activity. Growth in lending and an increase in fee income led to a higher contribution from Industrial Bank.

Net interest income

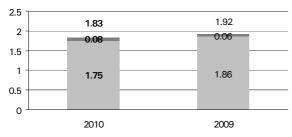

Net interest income increased by HK\$3,444m or 5.9% compared to 2009 on the back of strong loan growth across customer groups, weighted towards the second half of the year. Net interest income continued to be affected by the compression of asset spreads and the low interest rate environment constrained deposit spreads.

Average interest-earning assets increased by HK\$341,291m or 11.2% compared to 2009. Loans and advances to customers increased significantly as the economy strengthened across the region. Loan growth was most significant in CMB and GB&M, notably in commercial, industrial and international trade-related lending, and the buoyant property market led to increased commercial real estate and mortgage lending.

	2010	2009
	HK\$m	HK\$m
Average interest-earning assets	3,388,861	3,047,570

Net interest margin decreased to 1.83%, a reduction of nine basis points when compared to 2009. The lower interest margin reflects the continued pressure on asset spreads. Net interest spread declined by 11 basis points to 1.75%. The contribution of net free funds increased by two basis points to eight basis points, reflecting the growth in the deposit base, offset by margin pressure.

Net interest margin (%)

■ Spread ■ Contribution from net free funds

Net interest margin

	2010	2009
	%	%
Hong Kong:		
The Bank	1.38	1.52
Hang Seng Bank	1.91	2.11
Rest of Asia-Pacific	2.04	2.19

In **Hong Kong**, the Bank recorded a drop in net interest margin of 14 basis points to 1.38% for the year. Asset yields remained under pressure, particularly in HIBOR-linked residential mortgages which were launched early in 2010 and accounted for most new mortgage drawdowns by year end, as well as in trade-related lending. The margin in the second half improved to 1.40% from 1.35% in the first half, as a greater proportion of the commercial surplus was directed towards customer lending.

At Hang Seng Bank, the net interest margin declined by 20 basis points to 1.91% while the net interest spread also declined by 20 basis points to 1.86%. Strong growth in customer advances was partly offset by the continuing compression of margins, and the re-pricing of assets at lower market rates reduced the contribution from Balance Sheet Management.

In the **Rest of Asia-Pacific**, net interest margin was 2.04%, 15 basis points lower than 2009. Net interest spread narrowed by 10 basis points to 1.89%. The lower margin reflected continued pressure on asset spreads and the shift to lower risk customers. Strong loan growth across the region, notably in Singapore and mainland China, led to a 9.6% increase in net interest income.

Net fee income

Net fee income was HK\$5,005m, or 16.5%, higher than 2009.

Income from funds under management was 40.0% higher than in 2009 as improved investor sentiment led to fund inflows and equity markets continued to perform strongly.

Fees from unit trusts rose by 87.2%, with notable increases coming from Hong Kong, Taiwan, India and Singapore. The launch of new products, marketing campaigns and improved investor sentiment led to a significant increase in business.

Fees from credit facilities increased by 30.5% as demand for credit was strong and more syndicated loans were arranged for large corporates, especially in Hong Kong, India and Singapore. Fees from remittances and trade finance were up 19.3% and 11.4% respectively, with higher transaction volumes particularly in Hong Kong, mainland China and Singapore.

Fee income from cards rose as transaction volumes and overseas spending increased, notably in Hong Kong and Indonesia, as well as an increase in card issuance in Australia.

Other fee income rose by 19.4%, driven by higher fees from the Mandatory Provident Fund, the completion of several large project advisory transactions in Hong Kong, Japan and Singapore, along with fees generated from a number of equity underwriting participations, notably in Hong Kong and Singapore.

Net fee income	35,283	30,278

Net trading income

Net trading income increased by HK\$190m, or 0.9%.

Dealing profits fell by 4.9% or HK\$791m, reflecting the exceptional profit captured last year, mainly from gains on held-for-trading investments as well as Rates trading, which benefited from volatile market conditions in 2009, especially in Hong Kong, India and South Korea. In 2010, foreign exchange income grew as economic growth led to increased client demand, especially in Hong Kong, mainland China, Japan, India and Malaysia. Client hedging requirements also increased, notably in mainland China and Malaysia.

Interest on trading assets and liabilities rose by HK\$914m, or 23.7%, primarily due to an increase in trading debt securities, notably in Hong Kong and India.

	2010 HK\$m	2009 HK\$m

Net trading income	20,716	20,526

Gains less losses from financial investments

Gains on disposal of available-for-sale securities increased by HK\$1,174m. This was mainly attributable to the sale of debt securities in Hong Kong and an equity stake in a property company in Singapore. There was also a gain on the reclassification of Bao Viet Holdings to an associate following the purchase of additional shares in January 2010. The gain in 2009 included the disposal of Visa Inc. shares.

Impairment of available-for-sale equity investments decreased HK\$973m in 2010 as improved market conditions generally reduced the level of write-downs of strategic investments in the year.

	2010 HK\$m	2009 HK\$m
Gains on disposal of	1114	11124111
available-for-sale securities	2,365	1,191
Impairment of available-for- sale equity investments	(349)	(1,322)
Gains less losses from financial investments	2,016	(131)

Other operating income

The movement in the present value of in-force insurance business rose substantially in 2010, primarily due to an increase in sales of life insurance products in Hong Kong during the year.

Gains on investment properties increased reflecting the favourable property market conditions in Hong Kong in 2010. The profit on disposal of property, plant and equipment, and assets held for sale was lower following the profit on sale of a property in Hong Kong in 2009.

The gain on disposal of subsidiaries, associates and business portfolios mainly represented gains recognised following the sale of the private equity businesses during the year.

The increase in 'Other' largely comprises higher recoveries of IT and other operating costs from shared services activities incurred on behalf of fellow Group companies. It also included recoveries against initial fair value on loan portfolios acquired with Bank Ekonomi in Indonesia and from The Chinese Bank in Taiwan.

Insurance income

Net Interest Income increased 24.3% as funds under management grew, including from the Mandatory Provident Fund (MPF) and Occupational Retirement Schemes Ordinance (ORSO). Net fee income increased 39.3% from rising fund balances in both MPF and ORSO and favourable fund valuations from improved equity market performance in 2010.

Net income from financial instruments designated at fair value declined by 45.2% due to lower revaluation gains on equities supporting unit-linked insurance funds. The larger revaluation gains in 2009 reflected the strong rebound in equity markets, whereas in 2010 markets rose more modestly. To the extent that gains on revaluation are recognised here, an offsetting movement is reported under 'Net insurance claims incurred and movements in policyholders' liabilities'.

In January 2010 we increased our stake in Bao Viet Holdings, Vietnam's leading insurance and financial services group, from 10% to 18% and treated it as an associate from then. This led to the accounting gain of HK\$386m which is included in Gains less losses from financial investments.

Net insurance premiums rose by 18.5%, mainly from higher sales of the deferred annuity and unit-linked products. Non-life premiums also increased through improved sales on medical, accident and health and general liability products.

The movement in present value of in-force business increased by 42.2% reflecting higher new life insurance sales during the year.

Loan impairment charges and other credit risk provisions

The net charge for loan impairment and other credit risk provisions decreased by HK\$6,616m or 58.9% compared to 2009.

The net charge for individually assessed allowances decreased HK\$1,967m as a number of large specific impairment charges recorded in 2009 did not recur, specifically for customers in Hong Kong, India and the Private Equity business. The overall decline was partly offset by an impairment charge against a specific GB&M exposure.

The net charge for collectively assessed impairment allowances fell by HK\$4,024m, mainly driven by a managed reduction in cards and unsecured lending portfolios in India. Hong Kong has also experienced lower impairment charges against credit cards reflecting an improvement in delinquency rates. The improved economic environment also contributed to lower charges against corporate portfolios.

Net charge for other credit risk provisions fell primarily due to lower impairment charges and some impairment releases against asset-backed securities in 2010.

Operating Expenses

Total employee compensation and benefits rose by HK\$4,181m, or 14.6%. Wages and salaries were HK\$3,898m higher, due to the annual salary increment in early 2010 and higher performance related pay reflecting the overall 2010 performance, along with the increase in staff numbers in both frontline and support functions.

Higher headcount in 2010 reflected the ongoing expansion in a number of countries, including Hong Kong, mainland China, Taiwan, Indonesia, Singapore and Australia.

^{*} Full time equivalent at 31 December 2010.

General and administrative expenses increased by 14.9%, or HK\$2,902m in 2010.

Charges in respect of premises and equipment were up HK\$306m, or 5.1%, with higher costs in Hong Kong from rising property and IT network rental charges. In the rest of Asia Pacific, increases in mainland China and Malaysia mainly reflected ongoing local business expansion through the opening of new branches and country headquarters.

Other administrative expenses increased by HK\$1,886m, or 18.2%, on the back of increasing recruitment, consultancy, business travel and processing expenditure across the region to support growing business activities. Meanwhile, marketing expenses were 22.8% or HK\$723m higher, as more marketing activity was carried out for propositions such as Advance, Premier, Cards and wealth management. These activities were undertaken to capitalise on the region's continued economic strength.

and joint ventures	11,182	7,741

Assets

Total assets increased by HK\$679bn, or 15.6%, since 31 December 2009.

Net advances to customers increased by HK\$540.4bn, or 40.0%, since the end of 2009.

Net advances in Hong Kong increased by HK\$312.0bn, or 41.9%, during 2010. The increase was largely attributable to significant growth in Corporate and Commercial lending (up HK\$244.3bn), with increases in all sectors, reflecting higher demand due to the general improvement in economic conditions. Personal lending increased by HK\$63.9bn, largely driven by mortgage lending which increased by HK\$54.9bn. The growth in mortgages came from a buoyant property market and the success of HIBOR-linked mortgages which accounted for the majority of new mortgage lending by year end.

In the Rest of Asia-Pacific, net advances to customers increased by HK\$228.4bn, or 37.7%, of which the impact of foreign exchange translation was HK\$46.5bn. The underlying increase was mainly from Corporate and Commercial lending (up HK\$148.0bn). Residential mortgages increased by HK\$36.6bn, with growth notably in Australia, Singapore, Malaysia, Taiwan, and mainland China.

Customer accounts

Customer accounts increased by HK\$368.7bn, or 12.5%, during 2010.

Customer accounts by region

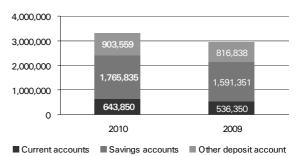

- Rest of Asia-Pacific/other
- Hang Seng Bank
- Hong Kong excluding Hang Seng

In Hong Kong, customer accounts increased by HK\$177.9bn, or 9.0%, and in the Rest of Asia-Pacific customer accounts increased by HK\$190.8bn or 19.9% as compared to 2009.

The group's advances-to-deposits ratio increased to 57.1% at 31 December 2010, from 45.9% at 31 December 2009 as more of the commercial surplus was deployed to customer lending.

	2010	2009
Advances: deposits ratio (%)	57.1	45.9

Customer accounts

Equity

Equity increased by HK\$61bn, or 21.2%, to HK\$347bn. The increase came principally from retained profits. In addition, increases in the value of available-for-sale securities, largely from the group's investment in Ping An Insurance, as well as property revaluation reserves and exchange differences, also contributed to the increase.

Capital Adequacy

The following tables show the components of the capital base, risk weighted assets and capital adequacy ratio as contained in the 'Capital Adequacy Ratio' return required to be submitted to the Hong Kong Monetary Authority ('HKMA') by The Hongkong and Shanghai Banking Corporation Limited on a consolidated basis that is specified by the HKMA under the requirement of section 98(2) of the Banking Ordinance.

The methods for calculating risk weighted assets for each type of risk are discussed in note 52(f) to the Financial Statements on page 188.

There is no relevant capital shortfall in any of the group's subsidiaries that is not included in its consolidation group for regulatory purposes.

Total of items deductible 50% from core capital and 50% from supplementary capital	90,276	70,198

¹ Includes the revaluation surplus on investment properties which is reported as part of retained profits and adjustments made in accordance with the Banking (Capital) Rules issued by the HKMA.

² Includes adjustments made in accordance with the Banking (Capital) Rules issued by the HKMA.

³ Total regulatory reserve and collective impairment allowances are apportioned between the standardised approach and internal ratings-based approach in accordance with the Banking (Capital) Rules issued by the HKMA. Those apportioned to the standardised approach are included in supplementary capital. Those apportioned to the internal ratings-based approach are excluded from supplementary capital.

⁴ Excess impairment allowances over expected losses are applicable to non-securitisation exposures calculated by using the internal ratings based approach.

⁵ The 2009 capital base, risk weighted assets and capital ratios have not been restated for the effects of HKAS 17 'Leases'.

Non-bank mainland exposures

The analysis of non-bank mainland exposures is based on the categories of non-bank counterparties and the type of direct exposures defined by the HKMA under the Banking (Disclosure) Rules with reference to the HKMA return for non-bank mainland exposures, which includes the mainland exposures extended by the Bank and its banking subsidiary in mainland China as at 31 December 2010 and as at 31 December 2009.

Cross-Border Exposure

The country risk exposures in the tables below are prepared in accordance with the HKMA Return of External Positions Part II: Cross-Border Claims (MA(BS)9) guidelines.

Cross-border claims are on-balance sheet exposures to counterparties based on the location of the counterparties after taking into account the transfer of risk.

The tables show claims on individual countries and territories or areas, after recognised risk transfer, amounting to 10% or more of the aggregate cross-border claims.

Cross-border risk is controlled centrally through a well-developed system of country limits and is frequently reviewed to avoid concentration of transfer, economic or political risk.

Risk Management

All the group's activities involve the analysis, evaluation, acceptance and management of some degree of risk or combination of risks. The principal types of risk faced by the group are credit risk (which includes country and cross-border risk), liquidity risk, market risk, insurance risk, operational risk and reputational risk.

The HSBC Group Head Office formulates highlevel risk management policies for the HSBC Group worldwide. The group's risk management policies and procedures are subject to a high degree of oversight and guidance to ensure that all types of risk are systematically identified, measured, analysed and actively managed.

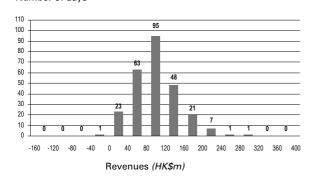

Credit risk, liquidity risk, market risk, operational risk, insurance risk and capital management are discussed in detail in Note 52 to the Financial Statements on pages 159 to 188.

Market Risk Management

The nature of market risk and the principal tool used to monitor and limit market risk exposure (value at risk) are discussed in Note 52 on the Financial Statements on pages 171 to 175.

The average daily revenue earned from market risk-related treasury activities in 2010, including accrual book net interest income and funding related to dealing positions, was HK\$100m compared with HK\$106m in 2009. The standard deviation of these daily revenues was HK\$49m (HK\$62m for 2009).

Daily distribution of market risk revenues 2010 Number of days

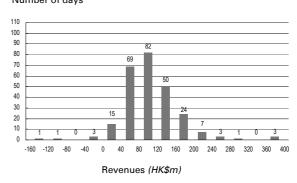

Profit and loss frequency

An analysis of the frequency distribution of daily revenues shows that negative revenues occurred on 1 day in 2010. The most frequent result was a daily revenue of between HK\$80m and HK\$120m with 95 occurrences. The highest daily revenue was HK\$299m. The most frequent result in 2009 was a daily revenue of between HK\$80m and HK\$120m with 82 occurrences. The highest daily revenue in 2009 was HK\$393m.

Daily distribution of market risk revenues 2009

Number of days

■ Profit and loss frequency

Reputational Risk Management

Reputational risks can arise from social, ethical or environmental issues, or as a consequence of operational risk events.

Reputational risks are considered and assessed by senior management. Standards on all major aspects of business are set by the HSBC Group Head Office. These policies, which form an integral part of the internal control systems, are communicated through manuals and statements of policy and are promulgated through internal communications and training. The policies set out operational procedures in all areas of reputational risk, including money laundering deterrence, environmental impact, anti-corruption measures and employee relations.

Internal controls are an integral part of how the group conducts its business. HSBC's manuals and

statements of policy are the foundation of these internal controls. There is a strong process in place to ensure controls operate effectively. Any significant failings are reported through the control mechanisms, internal audit and compliance functions to the group's Audit Committee and senior management. In addition, all businesses and major functions are required to review their control procedures and to make regular reports about any losses arising from operational risks.

Management in all operating entities is required to establish a strong internal control structure to minimise the risk of operational and financial failure, and to ensure that a full appraisal of reputational implications is made before strategic decisions are taken. The HSBC Group's internal audit function monitors compliance with policies and standards.

Notes on the Financial Statements

1 Basis of preparation

The consolidated financial statements comprise the accounts of The Hongkong and Shanghai Banking Corporation Limited ('the Bank') and its subsidiaries ('the group') as of 31 December 2010.

The consolidated financial statements have been prepared in accordance with all Hong Kong Financial Reporting Standards ('HKFRSs'), the provisions of the Hong Kong Companies Ordinance and accounting principles generally accepted in Hong Kong. HKFRSs is a collective term which includes all applicable individual Hong Kong Financial Reporting Standards, Hong Kong Accounting Standards ('HKASs') and Interpretations issued by the Hong Kong Institute of Certified Public Accountants ('HKICPA').

The consolidated financial statements have been prepared under the historical cost convention as modified by the revaluation of certain financial assets and liabilities and premises.

- **b** The consolidated financial statements include the attributable share of the results and reserves of associates and joint ventures based on accounts prepared for dates not earlier than three months prior to 31 December 2010.
- c During the year the group adopted the following HKFRSs and amendments to HKFRSs.

A revised HKFRS 3 'Business Combinations' and an amended HKAS 27 'Consolidated and Separate Financial Statements'. The main changes are:

- acquisition-related costs are recognised as expenses in the income statement in the period they are incurred;
- all consideration transferred, including contingent consideration, is recognised and measured at fair value at the acquisition date;
- equity interests held prior to control being obtained are remeasured to fair value at the time control is obtained, and any gain or loss is recognised in the income statement;
- changes in a parent's ownership interest in a subsidiary that do not result in a change of control are treated as transactions between equity holders and reported in equity; and
- an option is available, on a transaction-by-transaction basis, to measure any non-controlling interests (previously referred to as minority interest) in the entity either at fair value, or at the non-controlling interest's proportionate share of the net identifiable assets of the entity acquired.

For the group, the revised HKFRS 3 and the amendments to HKAS 27 apply prospectively to acquisitions and transactions taking place on or after 1 January 2010, and have no significant effect on these consolidated financial statements.

In addition, the group also adopted a number of HKFRSs or amendments to HKFRSs which had an insignificant or no effect on the consolidated financial statements. These are:

- Amendment to HKAS 39 'Financial Instruments: Recognition and Measurement' 'Eligible Hedged Items';
- Amendments to HKFRS 2 'Share-based Payment' 'Group Cash-settled Share-based Payment Transactions';
- Hong Kong (IFRIC) Interpretation 17 'Distributions of Non-cash Assets to Owners';
- HKFRS 1 (Revised) 'First-time Adoption of Hong Kong Financial Reporting Standards';
- Amendments to HKFRS 1 'First-time Adoption of Hong Kong Financial Reporting Standards' 'Additional Exemptions for First-time Adopters';
- Amendment to HKFRS 1 'First-time Adoption of Hong Kong Financial Reporting Standards' 'Limited Exemption from Comparative HKFRS 7 Disclosures for First-time Adopters';
- Hong Kong (IFRIC) Interpretation 18 'Transfers of Assets from Customers';
- HK Interpretation 5 'Presentation of financial statements classification by the borrower of a term loan that
 contains a repayment on demand clause'; and
- Other amendments made under 'Improvements to HKFRSs' in May 2009, except the amendment to leases as discussed below.

1 Basis of preparation (continued)

The HKICPA issued two chapters in the first phase of updating the 'Conceptual Framework' in October 2010 which are effective immediately upon issue – Chapter 1 *The objective of financial reporting* and Chapter 3 *Qualitative characteristics of useful financial information*. The adoption of the Conceptual Framework did not have any significant effect on the consolidated financial statements.

Hong Kong Accounting Standard 17, 'Leases' (HKAS 17) has been amended with effect from 1 January 2010 ("the amendment") as part of the 'Improvements to HKFRS' issued in May 2009. Since 2005, and prior to the amendment, a number of significant interests in long-term leasehold land owned by the group were recorded as prepaid operating leases, measured at historical cost less amortisation and included within 'Other assets' in the balance sheet. Following the application of the amendment in 2010, such interests are reclassified as prepaid finance leases on the basis that substantially all of the risks and rewards of ownership have been transferred to the group. They are included within 'Property, plant and equipment' in the balance sheet and carried at valuation (as discussed in note 3(o)). The amendment has been applied retrospectively and the corresponding prior-year comparatives have been adjusted accordingly.

The effects of the amendment to HKAS 17 on the position at 31 December 2008 are not shown as a separate column in the primary financial statements in view of its immaterial impact on the balance sheet as a whole. The affected primary statement lines are presented together as follows:

(i) For the group

	As reported HK\$m	Adjustment HK\$m	Restated HK\$m
Year ended 31 December 2009			
Profit for the year	50,644	(434)	50,210

Deferred tax liabilities	2,107	1,657	3,764
Other reserves	19,633	8,387	28,020

2 Critical accounting estimates and judgements in applying accounting policies

The preparation of financial statements requires the group to make certain estimates and to form judgements about the application of its accounting policies. The most significant areas where estimates and judgements have been made are set out below.

Disclosures under HKFRS 4 and HKFRS 7 relating to the nature and extent of risks have been included in note 52 'Risk management'.

Loan impairment

Application of the group's methodology for assessing loan impairment, as set out in note 3(d), involves considerable judgement and estimation.

For individually significant loans, judgement is required in determining first, whether there are indications that an impairment loss may have already been incurred, and then estimating the amount and timing of expected cash flows, which form the basis of the impairment loss that is recorded.

For collectively assessed loans, judgement is involved in selecting and applying the criteria for grouping together loans with similar credit characteristics, as well as in selecting and applying the statistical and other models used to estimate the losses incurred for each group of loans in the reporting period. The benchmarking of loss rates, the assessment of the extent to which historical losses are representative of current conditions and the ongoing refinement of modelling methodologies provide a means of identifying changes that may be required, but the process is inherently one of estimation.

Valuation of financial instruments

The group's accounting policy for valuation of financial instruments is included in note 3(f) and is discussed further within note 17 'Derivatives' and note 51 'Fair value of financial instruments'.

When fair values are determined by using valuation techniques which refer to observable market data because independent prices are not available, management will consider the following when applying a valuation model:

- the likelihood and expected timing of future cash flows on the instrument. These cash flows are usually governed by the terms of the instrument, although management judgement may be required when the ability of the counterparty to service the instrument in accordance with the contractual terms is in doubt;
- an appropriate discount rate for the instrument. Management determines this rate based on its assessment of the appropriate spread of the rate for the instrument over the risk-free rate; and
- judgement to determine what model to use to calculate fair value in areas where the choice of valuation model is particularly subjective, for example, when valuing complex derivatives.

When valuing instruments by reference to comparable instruments, management takes into account the maturity, structure and rating of the instrument with which the position held is being compared. When valuing instruments on a model basis using the fair value of underlying components, management also considers the need for adjustments to take account of factors such as bid-offer spread, credit profile and model uncertainty. These adjustments are based on defined policies which are applied consistently across the group.

When unobservable market data have a significant impact on the valuation of derivatives, the entire initial change in fair value indicated by the valuation model is recognised on one of the following bases: over the life of the transaction on an appropriate basis; in the income statement when the inputs become observable; or when the transaction matures or is closed out.

Financial instruments measured at fair value through profit or loss comprise financial instruments held for trading and financial instruments designated at fair value. Changes in their fair value directly impact the group's income statement in the period in which they occur.

2 Critical accounting estimates and judgements in applying accounting policies (continued)

A change in the fair value of a financial asset which is classified as 'available-for sale' is recorded directly in equity until the financial asset is sold, when the cumulative change in fair value is charged or credited to the income statement. When a decline in the fair value of an available-for sale financial asset has been recognised directly in equity and there is objective evidence that the asset is impaired, the cumulative loss that had been recognised directly in equity is removed from equity and recognised in the income statement, reducing the group's operating profit.

Impairment of available-for-sale financial investments

Judgment is required in determining whether or not a decline in fair value of an available-for-sale financial investment below its original cost is of such a nature as to constitute impairment, and thus whether an impairment loss needs to be recognised under HKAS 39 'Financial Instruments: Recognition and Measurement' (HKAS 39).

Liabilities under investment contracts

Estimating the liabilities for long-term investment contracts where the group has guaranteed a minimum return involves the use of statistical techniques. The selection of these techniques and the assumptions used about future interest rates and rates of return on equity, as well as behavioural and other future events, have a significant impact on the amount recognised as a liability.

Insurance contracts

Classification

HKFRS 4 'Insurance Contracts' (HKFRS 4) requires the group to determine whether an insurance contract that transfers both insurance risk and financial risk is classified as an insurance contract, or as a financial instrument under HKAS 39, or whether the insurance and non-insurance elements of the contract should be accounted for separately. This process involves judgement and estimation of the amounts of different types of risks that are transferred or assumed under a contract. The estimation of such risks often involves the use of assumptions about future events and is thus subject to a degree of uncertainty.

Present value of in-force long-term insurance business ('PVIF')

The value of PVIF, which is recorded as an intangible asset, depends upon assumptions regarding future events. These are described in more detail in note 25(b). The assumptions are reassessed at each reporting date and changes in the estimates which affect the value of PVIF are reflected in the income statement.

Insurance liabilities

The estimation of insurance liabilities involves selecting statistical models and making assumptions about future events which need to be frequently calibrated against experience and forecasts. The sensitivity of insurance liabilities to potential changes in key assumptions is set out in note 52.

Held-to-maturity securities

As indicated in note 3(g), certain debt instruments within the 'Financial investments' category are classified as held-to-maturity investments. In order to be able to use this classification, the group needs to exercise judgement upon initial recognition of the investments as to whether it has the positive intention and ability to hold them until maturity. A failure to hold these investments to maturity, in all but a limited number of circumstances, would result in the entire held-to-maturity category being reclassified as 'available-for-sale'. They would then be measured at fair value. The carrying amount and the fair value of held-to-maturity securities at 31 December 2010 are disclosed in note 51.

3 Summary of significant accounting policies

a Interest income and expense

Interest income and expense for all interest-bearing financial instruments, except those classified as held for trading or designated at fair value, are recognised in 'Interest income' and 'Interest expense' in the income statement using the effective interest method. The effective interest method is a way of calculating the amortised cost of a financial asset or a financial liability (or groups of financial assets or financial liabilities) and of allocating the interest income or interest expense over the relevant period.

The effective interest rate is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial asset or financial liability to the net carrying amount of the financial asset or financial liability. When calculating the effective interest rate, the group estimates cash flows considering all contractual terms of the financial instrument but not future credit losses. The calculation includes all amounts paid or received by the group that are an integral part of the effective interest rate, including transaction costs and all other premiums or discounts. Such transaction costs (for example, mortgage rebates) are incremental to the group and are directly attributable to a transaction.

Interest on impaired financial assets is recognised at the original effective interest rate of the financial asset applied to the impaired carrying amount. The accounting policy for recognising impairment of loans and advances is set out in note 3(d) below.

b Non interest income

(i) Fee income

The group earns fee income from a diverse range of services it provides to its customers. Fee income is accounted for as follows:

- if the income is earned on the execution of a significant act, it is recognised as revenue when the significant act has been completed (for example, fees arising from negotiating, or participating in the negotiation of, a transaction for a third party, such as the arrangement for the acquisition of shares or other securities);
- if the income is earned as services are provided, it is recognised as revenue as the services are provided (for example, asset management, portfolio and other management advisory and service fees); and
- if the income is an integral part of the effective interest rate of a financial instrument, it is recognised as an adjustment to the effective interest rate (for example, loan commitment fees) and recorded in 'Interest income' (see note 3(a)).

(ii) Dividend income

Dividend income is recognised when the right to receive payment is established. This is the ex-dividend date for listed equity securities.

(iii) Net income from financial instruments designated at fair value

Net income from financial instruments designated at fair value comprises all gains and losses from changes in the fair value (net of accrued coupon) of such financial assets and financial liabilities, together with interest income and expense and dividend income attributable to those financial instruments.

(iv) Net trading income

Net trading income comprises interest income and expense and dividend income attributable to trading financial assets and liabilities, together with all gains and losses from changes in fair value of trading assets and liabilities. Income and expenses arising from economic hedging activities which do not qualify for hedge accounting under HKAS 39, as well as from the ineffective portion of qualifying hedges, are also included in 'Net trading income'.

c Advances to customers and placings with banks

Loans and advances to banks and customers include loans and advances originated by the group which are not classified as either held for trading or designated at fair value. Loans and advances are recognised when cash is advanced to borrowers. They are derecognised when borrowers repay their obligations, the loans are sold or written off, or substantially all the risks and rewards of ownership are transferred. They are initially recorded at fair value plus any directly attributable transaction costs and are subsequently measured at amortised cost using the effective interest rate method, less impairment losses. Where loans and advances are hedged by derivatives designated and qualifying as fair value hedges, the carrying value of the loans and advances so hedged includes a fair value adjustment for the hedged risk only.

For certain leveraged finance and syndicated lending activities, the group may commit to underwrite loans on fixed contractual terms for specified periods of time, where the drawdown of the loan is contingent upon certain future events outside the control of the group. Where the loan arising from the lending commitment is expected to be held for trading, the commitment to lend is recorded as a trading derivative and measured at fair value through profit or loss. On drawdown, the loan is classified as held for trading and measured at fair value through profit or loss. Where it is not the group's intention to trade the loan, a provision on the loan commitment is only recorded where it is probable that the group will incur a loss. This may occur, for example, where a loss of principal is probable or the interest rate charged on the loan is lower than the cost of funding. On inception of the loan, the hold portion is recorded at its fair value and subsequently measured at amortised cost using the effective interest method. However, where the initial fair value is lower than the cash amount advanced (for example, due to the rate of interest charged on the loan being below the market rate of interest), the write-down is charged to the income statement. The write-down will be recovered over the life of the loan, through the recognition of interest income using the effective interest method, unless the loan becomes impaired. The write-down is recorded as a reduction to other operating income.

d Loan impairment

It is the group's policy to make provisions for impaired loans and advances promptly where there is objective evidence that impairment of a loan or portfolio of loans has occurred.

Impairment losses are assessed for all credit exposures. Loans that are individually significant are assessed and where impairment is identified, impairment losses are recognised. Loans that have been subject to individual assessment, but for which no impairment has been identified are then assessed collectively to estimate the amount of impairment at the reporting date, which has not been specifically identified. Loans which are not individually significant, but which can be aggregated into groups of exposures sharing similar risk characteristics, are then assessed collectively to identify and calculate impairment losses which have occurred by the reporting date. This methodology is explained in greater detail below.

3 Summary of significant accounting policies (continued)

Impairment losses are only recognised when there is evidence that they have been incurred prior to the reporting date. Losses which may be expected as a result of future events, no matter how likely, are not recognised.

(i) Individually significant loans

Impairment losses on individually significant accounts are assessed by an evaluation of the exposures on a case-by-case basis. The group assesses at each reporting date whether there is any objective evidence that a loan is impaired. This procedure is applied to all accounts that are considered individually significant.

The criteria used by the group to determine that there is such objective evidence include, inter alia:

- known cash flow difficulties experienced by the borrower;
- past due contractual payments of either principal or interest;
- breach of loan covenants or conditions;
- the probability that the borrower will enter bankruptcy or other financial restructuring; and
- a significant downgrading in credit rating by an external rating agency.

In determining the impairment losses on individually assessed accounts, the following factors are considered:

- the group's aggregate exposure to the customer;
- the viability of the customer's business model and capability to trade successfully out of financial difficulties and generate sufficient cash flow to service their debt obligations;
- the amount and timing of expected receipts and recoveries;
- the likely dividend available on liquidation or bankruptcy;
- the extent of other creditors' commitments ranking ahead of, or *pari passu* with, the group and the likelihood of other creditors continuing to support the company;
- the complexity of determining the aggregate amount and ranking of all creditor claims and the extent to which legal and insurance uncertainties are evident;
- the realisable value of security (or other credit mitigants) and likelihood of successful repossession;
- the likely deduction of any costs involved in recovery of amounts outstanding;
- the ability of the borrower to obtain and make payments in the relevant foreign currency if loans are not in local currency; and
- where available, the secondary market price for the debt.

The impairment loss is calculated by comparing the present value of the expected future cash flows, discounted at the original effective interest rate of the loan, with its current carrying value and the amount of any loss is charged to the income statement. The carrying amount of impaired loans is reduced through the use of an allowance account.

(ii) Collectively assessed loans

Impairment losses are calculated on a collective basis in two different scenarios:

- in respect of losses which have been incurred but have not yet been identified on loans subject to individual assessment for impairment (see section (i) above); and
- for homogeneous groups of loans that are not considered individually significant.

Incurred but not yet identified impairment

Where loans have been individually assessed and no evidence of impairment has been identified, these loans are grouped together on the basis of similar credit risk characteristics for the purpose of calculating a collective impairment allowance. The impairment calculated by this method represents impairments that have occurred at the balance sheet date but which will not be individually identified as such until some time in the future.

The collective impairment loss is determined after taking into account:

- historical loss experience in portfolios of similar risk characteristics (for example, by industry and geographical sectors, loan grade or product);
- the estimated period between a loss occurring and the establishment of an allowance against the loss on an individual loan; and
- management's experienced judgement as to whether the current economic and credit conditions are such
 that the actual level of incurred losses is likely to be greater or less than that suggested by historical
 experience.

The estimated period between a loss occurring and its identification is determined by management for each identified portfolio.

Homogeneous groups of loans

For homogeneous groups of loans that are not considered individually significant, two alternative methods are used to calculate allowances on a portfolio basis.

- When appropriate empirical information is available, the group utilises a roll rate methodology. This methodology utilises a statistical analysis of historical trends of the probability of default and amount of consequential loss, assessed for each time period during which the customer's contractual payments are overdue. The amount of loss is based on the present value of expected future cash flows, discounted at the original effective interest rate of the portfolio. Other historical data and an evaluation of current economic conditions are also considered to calculate the appropriate level of impairment allowance based on inherent loss.
- In other cases, when the portfolio size is small or when information is insufficient or not sufficiently
 reliable to adopt a roll rate methodology, the group adopts a formulaic approach which allocates rolling
 average loss rates over the outstanding receivable amount. Loss rates are based on the discounted expected
 future cash flows from a portfolio.

Roll rates, loss rates and the expected timing of future recoveries are regularly benchmarked against actual outcomes to ensure they remain appropriate.

(iii) Loan write-offs

Loans (and the related impairment allowance accounts) are normally written off, either partially or in full, when there is no realistic prospect of recovery of these amounts and, for collateralised loans, when the proceeds from the realisation of security have been received.

(iv) Reversals of impairment

If the amount of an impairment loss decreases in a subsequent period and the decrease can be related objectively to an event occurring after the impairment was recognised, the previously recognised impairment loss is reduced accordingly. The reduction of an impairment loss under these circumstances is recognised in the income statement in the period in which it occurs.

3 Summary of significant accounting policies (continued)

(v) Assets acquired in exchange for loans

Non-financial assets acquired in exchange for loans in order to achieve an orderly realisation are recorded as assets held for sale and reported in 'Other assets'. The asset acquired is recorded at the lower of its fair value less costs to sell and the carrying amount of the loan, net of impairment allowance amounts, at the date of exchange. No depreciation is provided in respect of assets held for sale. Any subsequent write-down of the acquired asset to fair value less costs to sell is recorded as an impairment loss and included within 'Other operating income' in the income statement. Any subsequent increase in the fair value less costs to sell, to the extent this does not exceed the cumulative impairment loss, is recognised as a gain in 'Other operating income' in the income statement.

Debt securities or equities acquired in debt-to-debt/equity swaps are included in 'Financial investments' and are classified as available-for-sale.

(vi) Renegotiated loans

Loans subject to collective impairment assessment whose terms have been renegotiated are no longer considered past due once the minimum number of payments required under the new arrangements have been received. Loans subject to individual impairment assessment, whose terms have been renegotiated, are subject to ongoing review to determine whether they remain impaired. The carrying amount of loans that have been classified as renegotiated retain this classification until maturity or derecognition.

e Trading assets and trading liabilities

Treasury bills, loans and advances to and from customers, loans and advances to and from banks, debt securities, structured deposits, equity shares, own debt issued and short positions in securities which have been acquired or incurred principally for the purpose of selling or repurchasing in the near term or are part of a portfolio of identified financial instruments that are managed together and for which there is evidence of a recent actual pattern of short-term profit-taking are classified as held for trading. This designation, once made, is irrevocable in respect of the financial instruments to which it is made. Such financial assets or financial liabilities are recognised initially at fair value, with transaction costs taken to the income statement, and are subsequently remeasured at fair value. All subsequent gains and losses from changes in the fair value of these assets and liabilities, together with related interest income and expense and dividends, are recognised in the income statement within 'Net trading income' as they arise. Financial assets and financial liabilities are recognised using trade date accounting.

f Financial instruments designated at fair value

A financial instrument, other than one held for trading, is classified in this category if it meets the criteria set out below, and is so designated by management.

Financial assets and financial liabilities so designated are recognised initially at fair value, with transaction costs taken directly to the income statement, and are subsequently remeasured at fair value. This designation, once made, is irrevocable in respect of the financial instruments to which it is made. Financial assets and financial liabilities are recognised using trade date accounting.

Gains and losses from changes in the fair value of such assets and liabilities are recognised in the income statement as they arise, together with related interest income and expense and dividends, within 'Net income from financial instruments designated at fair value' (except as noted below).

Gains and losses arising from the changes in fair value of derivatives that are managed in conjunction with financial assets or financial liabilities designated at fair value are included in 'Net income from financial instruments designated at fair value' (except as noted below).

Where issued debt has been designated at fair value and there is a related derivative, then the interest components of the debt and the derivative are recognised in 'Interest expense'.

The group may designate financial instruments at fair value where the designation:

- eliminates or significantly reduces a measurement or recognition inconsistency that would otherwise arise from
 measuring financial assets or financial liabilities or recognising the gains and losses on them on different bases;
 examples include unit-linked investment contracts, and certain portfolios of securities and debt issuances that
 are managed in conjunction with financial assets or liabilities measured on a fair value basis;
- applies to a group of financial assets, financial liabilities, or both, that is managed and its performance
 evaluated on a fair value basis, in accordance with a documented risk management or investment strategy, and
 where information about that group of financial instruments is provided internally on that basis to key
 management personnel; examples include financial assets held to back certain insurance contracts, and certain
 asset-backed securities; or
- relates to financial instruments containing one or more embedded derivatives that significantly modify the cash
 flows resulting from those financial instruments, and which would otherwise be required to be accounted for
 separately; examples include certain debt issuances and debt securities held.

g Financial investments

Treasury bills, debt securities and equity shares intended to be held on a continuing basis, other than those designated at fair value, are classified as available-for-sale or held-to-maturity. Financial investments are recognised on trade date, when the group enters into contractual arrangements with counterparties to purchase securities, and are normally derecognised when either the securities are sold or the borrowers repay their obligations.

Available-for-sale

Available-for-sale financial assets are initially measured at fair value plus direct and incremental transaction costs. They are subsequently remeasured at fair value and changes therein are recognised in equity in the 'Available-for-sale investment reserve' until the financial assets are either sold or become impaired. When available-for-sale financial assets are sold, cumulative gains or losses previously recognised in equity are recognised in the income statement as 'Gains less losses from financial investments'.

Interest income is recognised on available-for-sale debt securities using the effective interest rate, calculated over the asset's expected life. Premiums and/or discounts arising on the purchase of dated investment securities are included in the calculation of their effective interest rates. Dividends are recognised in the income statement when the right to receive payment has been established.

At each balance sheet date an assessment is made of whether there is any objective evidence of impairment in the value of a financial asset or group of financial assets. Impairment losses are recognised if, and only if, there is objective evidence of impairment as a result of one or more events that occurred after the initial recognition of the financial asset (a 'loss event') and that loss event (or events) has an impact on the estimated future cash flows of the financial asset and can be reliably estimated.

If the available-for-sale financial asset is impaired, the difference between the financial asset's acquisition cost (net of any principal repayments and amortisation) and the current fair value, less any previous impairment loss recognised in the income statement, is removed from equity and recognised in the income statement.

Impairment losses for available-for-sale debt securities are recognised within 'Loan impairment charges and other credit risk provisions' in the income statement and impairment losses for available-for-sale equity securities are recognised within 'Gains less losses from financial investments' in the income statement.

3 Summary of significant accounting policies (continued)

Once an impairment loss has been recognised on an available-for-sale financial asset, the subsequent accounting treatment for changes in the fair value of that asset differs depending on the nature of the available-for-sale financial asset concerned:

- for an available-for-sale debt security, a subsequent decline in the fair value of the instrument is recognised in the income statement if, and only if, there is objective evidence of impairment. Objective evidence of impairment occurs when, as a result of one or more loss events, the estimated future cash flows of the financial asset are impacted and can be reliably measured. Where there is no objective evidence of impairment, the decline in the fair value of the financial asset is recognised directly in equity. If the fair value of a debt security increases in a subsequent period, and the increase can be objectively related to an event occurring after the impairment loss was recognised in the income statement, the impairment loss is reversed through the income statement to the extent of the increase in fair value;
- for an available-for-sale equity security, all subsequent increases in the fair value of the instrument are treated as a revaluation and are recognised directly in equity. Impairment losses recognised on an equity security are not reversed through the income statement. Subsequent decreases in the fair value of the available-for-sale equity security are recognised in the income statement.

Held-to-maturity investments

Held-to-maturity investments are non-derivative financial assets with fixed or determinable payments and fixed maturities that the group has the positive intention and ability to hold until maturity. Held-to-maturity investments are initially recorded at fair value plus any directly attributable transaction costs, and are subsequently measured at amortised cost using the effective interest rate method, less any impairment losses.

h Determination of fair value

All financial instruments are recognised initially at fair value. The fair value of a financial instrument on initial recognition is normally the transaction price, i.e. the fair value of the consideration given or received. In certain circumstances, however, the initial fair value may be based on other observable current market transactions in the same instrument, without modification or repackaging, or on a valuation technique whose variables include only data from observable markets.

Subsequent to initial recognition, the fair values of financial instruments measured at fair value that are quoted in active markets are based on bid prices for assets and offer prices for liabilities. When independent prices are not available, fair values are determined by using valuation techniques which refer to observable market data. These include comparison with similar instruments where market observable prices exist, discounted cash flow analysis, option pricing models and other valuation techniques commonly used by market participants.

For certain investments, fair values may be determined in whole or in part using valuation techniques based on assumptions that are not supported by prices from current market transactions or observable market data.

A number of factors such as bid-offer spread, credit profile, servicing costs of portfolios and model uncertainty are taken into account, as appropriate, when values are calculated using valuation techniques.

When unobservable market data have a significant impact on the valuation of financial instruments, the entire initial difference in fair value indicated by the valuation model from the transaction price is not recognised immediately in the income statement but is recognised over the life of the transaction on an appropriate basis, or when the inputs become observable, or the transaction matures or is closed out, or when group enters into an offsetting transaction.

If the fair value of a financial asset measured at fair value becomes negative, it is recorded as a financial liability until its fair value becomes positive, at which time it is recorded as a financial asset, or it is extinguished.

i Sale and repurchase agreements (including stock lending and borrowing)

Where securities are sold subject to a commitment to repurchase them at a predetermined price ('repos'), they remain on the balance sheet and a liability is recorded in respect of the consideration received. Securities purchased under commitments to re-sell ('reverse repos') are not recognised on the balance sheet and the consideration paid is recorded in 'Advances to customers' or 'Placings with banks' as appropriate. The difference between the sale and repurchase price is treated as interest and recognised over the life of the agreement.

Securities lending and borrowing transactions are generally secured, with collateral taking the form of securities or cash advanced or received. The transfer of securities to counterparties under these agreements is not normally reflected on the balance sheet. Cash collateral advanced or received is recorded as an asset or a liability respectively.

Securities borrowed are not recognised on the balance sheet. If they are sold on to third parties, an obligation to return the securities is recorded as a trading liability and measured at fair value, and any gains or losses are included in 'Net trading income'.

j Derivative financial instruments and hedge accounting

Derivatives are initially recognised at fair value from the date a derivative contract is entered into and are subsequently re-measured at their fair value at each reporting date.

Fair values are obtained from quoted market prices in active markets, or by using valuation techniques, including recent market transactions, where an active market does not exist. Valuation techniques include discounted cash flow models and option pricing models as appropriate. All derivatives are classified as assets when their fair value is positive, or as liabilities when their fair value is negative.

In the normal course of business, the fair value of a derivative on initial recognition is considered to be the transaction price (i.e. the fair value of the consideration given or received). However, in certain circumstances the fair value of an instrument will be evidenced by comparison with other observable current market transactions in the same instrument (i.e. without modification or repackaging) or based on a valuation technique whose variables include only data from observable markets, including interest rate yield curves, option volatilities and currency rates. When such evidence exists and results in a value which is different from the transaction price, the group recognises a trading profit or loss on inception of the derivative.

Certain derivatives embedded in other financial instruments, such as the conversion option in a convertible bond, are treated as separate derivatives when their economic characteristics and risks are not clearly and closely related to those of the host contract, the terms of the embedded derivative are the same as those of a stand-alone derivative, and the combined contract is not designated at fair value through profit and loss. These embedded derivatives are measured at fair value with changes in fair value recognised in the income statement.

Derivative assets and liabilities from different transactions are only netted if the transactions are with the same counterparty, a legal right of set-off exists, and the cash flows are intended to be settled either simultaneously or on a net basis.

The method of recognising the resulting fair value gains or losses depends on whether the derivative is held for trading, or is designated as a hedging instrument, and if so, the nature of the risk being hedged.

Where derivatives are designated as hedges, the group classifies them as either: (i) hedges of the change in fair value of recognised assets or liabilities or firm commitments ('fair value hedge'); (ii) hedges of the variability in highly probable future cash flows attributable to a recognised asset or liability, or a forecast transaction ('cash flow hedge'); or (iii) hedges of net investments in a foreign operation ('net investment hedge'). Hedge accounting is applied for derivatives designated as hedging instruments in a fair value, cash flow or net investment hedge provided certain criteria are met.

3 Summary of significant accounting policies (continued)

Hedge accounting

It is the group's policy to document, at the inception of a hedging relationship, the relationship between the hedging instruments and hedged items, as well as its risk management objective and strategy for undertaking the hedge. Such policies also require documentation of the assessment, both at hedge inception and on an ongoing basis, of whether the derivatives that are used in hedging transactions are highly effective in offsetting changes in fair values or cash flows of hedged items attributable to the hedged risks. Interest on designated qualifying hedges where interest rate risk is hedged is included in 'Net interest income'.

Fair value hedge

Changes in the fair value of derivatives (net of interest accrual) that are designated and qualify as fair value hedging instruments are recorded as 'Net trading income' in the income statement, together with changes in the fair value of the hedged asset or liability attributable to the hedged risk.

If the hedging relationship no longer meets the criteria for hedge accounting, the cumulative adjustment to the carrying amount of a hedged item for which the effective interest rate method is used is amortised to the income statement over the residual period to maturity in 'Net interest income'. Where the adjustment relates to the carrying amount of a hedged available-for-sale equity security, this remains in equity until the disposal of the equity security.

Cash flow hedge

The effective portion of changes in the fair value of derivatives (net of interest accrual) that are designated and qualify as cash flow hedges are recognised in shareholders' equity. Any gain or loss relating to an ineffective portion is recognised immediately in the income statement within 'Net trading income' along with accrued interest.

Amounts accumulated in shareholders' equity are recycled to the income statement in the periods in which the hedged item will affect profit or loss. However, when the forecast transaction that is hedged results in the recognition of a non-financial asset or a non-financial liability, the gains and losses previously deferred in equity are transferred from shareholders' equity and included in the initial measurement of the cost of the asset or liability.

When a hedging instrument is sold, or when a hedge no longer meets the criteria for hedge accounting, any cumulative gain or loss existing in shareholders' equity at that time remains in shareholders' equity until the forecast transaction is ultimately recognised in the income statement. When a forecast transaction is no longer expected to occur, the cumulative gain or loss that was reported in shareholders' equity is immediately transferred to the income statement.

Net investment hedge

Hedges of net investments in foreign operations are accounted for similarly to cash flow hedges. Any gain or loss on the hedging instrument relating to the effective portion of the hedge is recognised in shareholders' equity; the gain or loss relating to the ineffective portion is recognised immediately in the income statement within 'Net trading income'. Gains and losses accumulated in equity are included in the income statement when the foreign operation is disposed of.

Hedge effectiveness testing

To qualify for hedge accounting, HKAS 39 requires that at the inception of the hedge and throughout its life, each hedge must be expected to be highly effective (prospective effectiveness). Actual effectiveness (retrospective effectiveness) must also be demonstrated on an ongoing basis.

The documentation of each hedging relationship sets out how the effectiveness of the hedge is assessed. The method adopted for assessing hedge effectiveness will depend on the risk management strategy.

Derivatives that do not qualify for hedge accounting

All gains and losses from changes in the fair values of derivatives that do not qualify for hedge accounting are recognised immediately in the income statement. These gains and losses are reported in 'Net trading income', except where derivatives are managed in conjunction with financial instruments designated at fair value (other than derivatives managed in conjunction with debt securities issued by the group), in which case gains and losses are reported in 'Net income from financial instruments designated at fair value'. The interest on derivatives managed in conjunction with debt securities issued by the group which are designated at fair value is recognised in 'Interest expense'. All other gains and losses on these derivatives are reported in 'Net income from financial instruments designated at fair value'. For fair value hedge relationships, regression analysis is used to test hedge effectiveness. For cash flow hedge relationships, effectiveness is tested by applying the change in variable cash flow method.

For prospective effectiveness, the hedging instrument must be expected to be highly effective in achieving offsetting changes in fair value or cash flows attributable to the hedged risk during the period for which the hedge is designated. For actual effectiveness, the changes in fair value or cash flows, at each reporting date or based on recent history, must offset each other. The group considers that a hedge is highly effective when the offset is within the range of 80% to 125%.

k Derecognition of financial assets and liabilities

Financial assets are derecognised when the rights to receive cash flows from the assets have expired; or where the group has transferred its contractual rights to receive the cash flows of the financial assets and has transferred substantially all the risks and rewards of ownership; or where both control and substantially all the risks and rewards are not retained.

Financial liabilities are derecognised when they are extinguished, i.e. when the obligation is discharged or cancelled or expires.

l Offsetting financial assets and financial liabilities

Financial assets and liabilities are offset and the net amount reported in the balance sheet when there is a legally enforceable right to offset the recognised amounts and the group intends to settle on a net basis, or realise the asset and settle the liability simultaneously.

m Subsidiaries, associates and joint ventures

The group

Subsidiaries are entities which the group, directly or indirectly, controls. Subsidiaries are controlled if the group has the power to govern their financial and operating policies so as to obtain benefits from their activities. Control exists where the group holds more than half of the issued share capital, controls more than half the voting power, controls the composition of the board of directors, or equivalent body, or where control is provided by virtue of contractual arrangements. Subsidiaries are consolidated in the group's financial statements from the date on which the group obtains control until control ceases.

Balances and transactions between entities that comprise the group, together with unrealised gains and losses thereon, are eliminated in the consolidated financial statements. Non-controlling interests represent the portion of the profit or loss and net assets of subsidiaries attributable to equity interests in those subsidiaries that are not held by the group.

Associates are entities over which the group has significant influence but not control or joint control. Joint ventures involve contractual arrangements whereby the group undertakes an economic activity with one or more parties and that economic activity is subject to joint control. Investments in associates and joint ventures are recognised using the equity method. Under this method, such investments are initially stated at cost, including attributable goodwill, and are adjusted thereafter for the post-acquisition change in the group's share of net assets.

3 Summary of significant accounting policies (continued)

The Bank

The Bank's investments in subsidiaries, associates and joint ventures are stated at cost less impairment losses, if any. An impairment loss recognised in prior periods shall be reversed through the income statement if, and only if, there has been a change in the estimates used to determine the investment in subsidiary's recoverable amount since the last impairment loss recognised.

n Goodwill and intangible assets

(i) Goodwill arises on business combinations, including the acquisition of subsidiaries and interests in joint ventures or associates when the cost of acquisition exceeds the fair value of the group's share of the identifiable assets, liabilities and contingent liabilities acquired. If the group's interest in the fair value of the identifiable assets, liabilities and contingent liabilities of an acquired business is greater than the cost of acquisition, the excess is recognised immediately in the income statement.

Goodwill is allocated to cash-generating units ('CGUs') for the purpose of impairment testing, which is undertaken at the lowest level at which goodwill is monitored for internal management purposes. Impairment testing is performed at least annually, and whenever there is an indication that the CGU may be impaired, by comparing the recoverable amount of a CGU with the carrying amount of its net assets, including attributable goodwill. The recoverable amount of an asset is the higher of its fair value less cost to sell, and its value in use. Value in use is the present value of the expected future cash flows from a CGU. If the recoverable amount of the CGU is less than the carrying value, an impairment loss is charged to the income statement. Any write-off in excess of the carrying value of goodwill is limited to the fair value of the individual assets and liabilities of the CGU.

Goodwill is stated at cost less accumulated impairment losses, if any.

At the date of disposal of a business, attributable goodwill is included in the group's share of net assets in the calculation of the gain or loss on disposal.

Goodwill on acquisitions of interests in joint ventures and associates is included in 'Interests in associates and joint ventures' and is not tested separately for impairment.

(ii) Intangible assets include the present value of in-force long-term insurance business, operating rights, computer software and, when acquired in a business combination, trade names, customer relationships and core deposit relationships. Intangible assets that have an indefinite useful life, or are not yet ready for use, are tested for impairment annually.

Intangible assets that have a finite useful life, except for the present value of in-force long-term insurance business, are stated at cost less amortisation and accumulated impairment losses and are amortised over their estimated useful lives. Estimated useful life is the lower of legal duration and expected economic life.

Intangible assets are subject to impairment review if there are events or changes in circumstances that indicate that the carrying amount may not be recoverable.

The accounting policy on the present value of in-force long-term insurance business is set out in note 3(w).

o Property, plant and equipment

(i) Land and buildings

The following land and buildings held for own use are carried at their revalued amount, being the fair value at the date of the revaluation less any subsequent accumulated depreciation and impairment losses:

- freehold land and buildings;
- leasehold land and buildings where the value of the land cannot be reliably separated from the value of the building at inception of the lease and the premises are not clearly held under an operating lease; and
- leasehold land and buildings where the value of the land can be reliably separated from the value of the building at inception of the lease and the term of the lease is not less than 50 years since substantially all the risk and rewards of ownership have been transferred to the group.

Revaluations are performed by professional qualified valuers, on a market basis, with sufficient regularity to ensure that the net carrying amount does not differ materially from the fair value. Surpluses arising on revaluation are credited firstly to the income statement to the extent of any deficits arising on revaluation previously charged to the income statement in respect of the same land and buildings, and are thereafter taken to the 'Property revaluation reserve'. Deficits arising on revaluation are first set off against any previous revaluation surpluses included in the 'Property revaluation reserve' in respect of the same land and buildings, and are thereafter recognised in the income statement.

Buildings held for own use which are situated on leasehold land where it is possible reliably to separate the value of the building from the value of the leasehold land at inception of the lease are revalued by professional qualified valuers, on a depreciated replacement cost basis or surrender value, with sufficient regularity to ensure that the net carrying amount does not differ materially from the fair value.

Depreciation on land and buildings is calculated to write off the assets over their estimated useful lives as follows:

- · freehold land is not depreciated; and
- leasehold land is depreciated over the unexpired terms of the leases;
- buildings and improvements thereto are depreciated at the greater of 2% per annum on the straight line basis or over the unexpired terms of the leases or over the remaining useful lives of the buildings.

(ii) Other plant and equipment

Equipment, fixtures and fittings (including equipment on operating leases where the group is the lessor) are stated at cost less any impairment losses. Depreciation is calculated on a straight-line basis to write-off the assets over their useful lives, which are generally between 5 and 20 years.

(iii) Investment properties

The group holds certain properties as investments to earn rentals, or for capital appreciation, or both. Investment properties are stated at fair value with changes in fair value being recognised in 'Other operating income'. Fair values are determined by independent professional valuers, primarily on the basis of capitalisation of net incomes with due allowance for outgoings and reversionary income potential. Property interests which are held under operating leases to earn rentals, or for capital appreciation or, both, are classified and accounted for as investment property on a property-by-property basis. Such property interests are accounted for as if they were held under finance leases (see note 3(p)).

(iv) Leasehold land and land use rights

The Government of Hong Kong owns all the land in Hong Kong and permits its use under leasehold arrangements. Similar arrangements exist in mainland China. At inception of the lease, where the cost of land is known or can be reliably determined and the term of the lease is less than 50 years, the group records its interest in leasehold land and land use rights separately as operating leases. These leases are recorded at original cost and amortised over the term of the lease. Where the cost of the land is unknown, or cannot be reliably determined, the land and buildings are accounted for together, as discussed above in 3(o)(i).

Property, plant and equipment is subject to review for impairment if there are events or changes in circumstances that indicate that the carrying amount may not be recoverable.

3 Summary of significant accounting policies (continued)

p Finance and operating leases

- (i) Assets leased to customers under agreements which transfer substantially all the risks and rewards associated with ownership, other than legal title, are classified as finance leases. Where the group is a lessor under finance leases the amounts due under the leases, after deduction of unearned charges, are included in 'Advances to customers' as appropriate. Finance income receivable is recognised over the periods of the leases so as to give a constant rate of return on the net investment in the leases.
- (ii) Where the group is a lessee under finance leases, the leased assets are capitalised and included in 'Property, plant and equipment' and the corresponding liability to the lessor is included in 'Other liabilities'. The finance lease and corresponding liability are recognised initially at the fair value of the asset or, if lower, the present value of the minimum lease payments. Finance charges payable are recognised over the periods of the leases based on the interest rates implicit in the leases so as to give a constant rate of interest on the remaining balance of the liability.
- (iii) All other leases are classified as operating leases. Where the group is the lessor, the assets subject to the operating leases are included in 'Property, plant and equipment' and accounted for accordingly. Impairment losses are recognised to the extent that the carrying value of equipment is impaired through residual values not being fully recoverable. Where the group is the lessee, the leased assets are not recognised on the balance sheet.
- (iv) Rentals payable and receivable under operating leases are accounted for on a straight-line basis over the period of the leases and are included in 'General and administrative expenses' and 'Other operating income' respectively.
- (v) There are no freehold interests in land in Hong Kong or mainland China. Leasehold land is included under 'Other assets' in the balance sheet if such land is considered to be held under operating leases (as described in note 3(o)(iv) above) and is stated at cost less amortisation and impairment losses. Amortisation is calculated to write off the cost of the land on a straight-line basis over the terms of the leases, which are generally below 50 years.

q Income tax

- (i) Income tax for the year comprises current and deferred tax. Income tax is recognised in the income statement except to the extent that it relates to items recognised directly in the statement of comprehensive income, in which case it is recognised in the statement of comprehensive income.
- (ii) Current tax is the expected tax payable on the taxable income for the year, calculated using tax rates enacted or substantively enacted at the period end date, and any adjustment to tax payable in respect of previous years. Current tax assets and liabilities are offset when the group intends to settle on a net basis and the legal right to set off exists.
- (iii) Deferred tax is recognised on temporary differences between the carrying amount of assets and liabilities in the balance sheet and the amount attributed to such assets and liabilities for tax purposes. Deferred tax liabilities are generally recognised for all taxable temporary differences and deferred tax assets are recognised to the extent it is probable that future taxable profits will be available against which deductible temporary differences can be utilised.

Deferred tax is calculated using the tax rates that have been enacted or substantively enacted at the period end date and are expected to apply in the periods in which the assets will be realised or the liabilities settled. Deferred tax assets and liabilities are offset when they arise in the same tax reporting group, relate to income taxes levied by the same taxation authority, and a legal right to set off exists in the entity.

Deferred tax relating to actuarial gains and losses arising from post-employment benefit plans which are recognised in the statement of comprehensive income is also credited or charged to the statement of comprehensive income.

Deferred tax relating to changes in the fair value of available-for-sale investments and cash flow hedges, which are charged or credited directly to the statement of comprehensive income, is also credited or charged directly to the statement of comprehensive income and is recognised in the income statement when the fair value gain or loss is recognised in the income statement.

r Pension and other post-retirement benefits

The group operates a number of pension plans which include both defined benefit and defined contribution plans.

Payments to defined contribution plans and state-managed retirement benefit plans, where the group's obligations under the plans are equivalent to a defined contribution plan, are charged as an expense as they fall due.

The costs recognised for funding defined benefit plans are determined using the projected unit credit method, with annual actuarial valuations performed on each plan. Actuarial differences that arise are recognised in shareholders' equity and presented in the statement of comprehensive income in the period they arise. Past service costs are recognised immediately to the extent the benefits are vested, and are otherwise recognised on a straight-line basis over the average period until the benefits are vested. The current service costs and any past service costs together with the expected return on plan assets less the unwinding of the discount on the plan liabilities are charged to 'Employee compensation and benefits'.

The net defined benefit asset or liability recognised in the balance sheet represents the difference between the fair value of plan assets and the present value of the defined benefit obligations adjusted for unrecognised past service costs. In the case of a defined benefit asset, it is limited to unrecognised past service costs plus the present value of available refunds and reductions in future contributions to the plan.

s Share-based payments

The cost of share-based payment arrangements with employees is measured by reference to the fair value of equity instruments on the date they are granted, and is recognised as an expense on a straight-line basis over the vesting period, with a corresponding credit to 'Other reserves'. The fair value of equity instruments that are made available immediately, with no vesting period attached to the award, are expensed immediately.

Fair value is determined by using market prices or appropriate valuation models, taking into account the terms and conditions upon which the equity instruments were granted. Market performance conditions are taken into account when estimating the fair value of equity instruments at the date of grant, so that an award is treated as vesting irrespective of whether the market performance condition is satisfied, provided all other conditions are satisfied.

Vesting conditions, other than market performance conditions, are not taken into account in the initial estimate of the fair value at the grant date. They are taken into account by adjusting the number of equity instruments included in the measurement of the transaction, so that the amount recognised for services received as consideration for the equity instruments granted shall be based on the number of equity instruments that eventually vest. On a cumulative basis, no expense is recognised for equity instruments that do not vest because of a failure to satisfy non-market performance or service conditions.

Where an award has been modified, as a minimum, the expense of the original award continues to be recognised as if it had not been modified. Where the effect of a modification is to increase the fair value of an award or increase the number of equity instruments, the incremental fair value of the award or incremental fair value of the extra equity instruments is recognised in addition to the expense of the original grant, measured at the date of modification, over the modified vesting period.

A cancellation that occurs during the vesting period is treated as an acceleration of vesting and recognised immediately for the amount that would otherwise have been recognised for services over the remaining vesting period.

3 Summary of significant accounting policies (continued)

t Foreign currencies

- (i) Items included in each of the group's entities are measured using the currency of the primary economic environment in which the entity operates (the 'functional currency'). The group's financial statements are presented in Hong Kong dollars which is the Bank's functional and presentation currency.
- (ii) Transactions in foreign currencies are recorded in the functional currency at the rate of exchange prevailing on the date of the transaction. Monetary assets and liabilities denominated in foreign currencies are translated into the functional currency at the rate of exchange ruling at the balance sheet date. Any resulting exchange differences are included in the income statement. Non-monetary assets and liabilities that are measured in terms of historical cost in a foreign currency are translated into the functional currency using the rate of exchange at the date of the initial transaction. Non-monetary assets and liabilities measured at fair value in a foreign currency are translated into the functional currency using the rate of exchange at the date the fair value was determined.
- (iii) The results of branches, subsidiaries and associates not reporting in Hong Kong dollars are translated into Hong Kong dollars at the average rates of exchange for the reporting period. Exchange differences arising from the retranslation of opening foreign currency net investments and exchange differences arising from retranslation of the result for the reporting period from the average rate to the exchange rate prevailing at the period-end are accounted for in a separate foreign exchange reserve in the consolidated financial statements. Exchange differences on a monetary item that is part of a net investment in a foreign operation are recognised in the income statement of the separate subsidiary financial statements. In the consolidated financial statements, these exchange differences are recognised in the foreign exchange reserve in shareholders' equity. On disposal of a foreign operation, exchange differences relating thereto and previously recognised in reserves are recognised in the income statement.

u Provisions

Provisions for liabilities and charges are recognised when it is probable that an outflow of economic benefits will be required to settle a present legal or constructive obligation arising from past events and a reliable estimate can be made of the amount of the obligation.

Contingent liabilities, which include certain guarantees and letters of credit pledged as collateral security, are possible obligations that arise from past events whose existence will be confirmed only by the occurrence, or non-occurrence, of one or more uncertain future events not wholly within the control of the group; or are present obligations that have arisen from past events but are not recognised because it is not probable that settlement will require the outflow of economic benefits, or because the amount of the obligations cannot be reliably measured. Contingent liabilities are not recognised in the financial statements but are disclosed unless the probability of settlement is remote.

v Financial guarantee contracts

Liabilities under financial guarantee contracts which are not classified as insurance contracts are recorded initially at their fair value, which is generally the fee received or receivable. Subsequently, financial guarantee liabilities are measured at the higher of the initial fair value, less cumulative amortisation, and the best estimate of the expenditure required to settle the obligations.

w Insurance contracts

Through its insurance subsidiaries, the group issues contracts to customers that contain insurance risk, financial risk or a combination thereof. A contract under which the group accepts significant insurance risk from another party, by agreeing to compensate that party on the occurrence of a specified uncertain future event, is classified as an insurance contract. An insurance contract may also transfer financial risk, but is accounted for as an insurance contract if the insurance risk is significant.

Insurance contracts are accounted for as follows:

Premiums

Gross insurance premiums for non-life insurance business are reported as income over the term of the insurance contracts based on the proportion of risks borne during the accounting period. The unearned premium (the proportion of the business underwritten in the accounting year relating to the period of risk after the balance sheet date) is calculated on a daily or monthly pro rata basis.

Premiums for life insurance contracts are accounted for when receivable, except in unit-linked insurance contracts where premiums are accounted for when liabilities are established.

Reinsurance premiums are accounted for in the same accounting period as the premiums for the direct insurance contracts to which they relate.

Present value of in-force long-term insurance business

The value placed on insurance contracts that are classified as long-term insurance business or long-term investment contracts with discretionary participating features and are in force at the balance sheet date is recognised as an asset. The asset represents the present value of the shareholders' interest in the profits expected to emerge from these contracts written at the balance sheet date.

The present value of in-force long-term insurance business and long-term investment contracts with discretionary participating features, referred to as 'PVIF', is determined by discounting the shareholders' interest in future profits expected to emerge from business currently in force using appropriate assumptions in assessing factors such as future mortality, lapse rates and levels of expenses and a risk discount rate that reflects the risk premium attributable to the respective contracts. The PVIF incorporates allowances for both non-market risk and the value of financial options and guarantees. The PVIF asset is presented gross of attributable tax in the balance sheet and movements in the PVIF asset are included in 'Other operating income' on a gross of tax basis.

Claims and reinsurance recoveries

Gross insurance claims for non-life insurance contracts include paid claims and movements in outstanding claims liabilities

Gross insurance claims for life insurance contracts reflect the total cost of claims arising during the year, including claim handling costs and any policyholder bonuses allocated in anticipation of a bonus declaration. Claims arising during the year include maturities, surrenders and death claims.

Maturity claims are recognised when due for payment. Surrenders are recognised when paid or at an earlier date on which, following notification, the policy ceases to be included within the calculation of the related insurance liabilities. Death claims are recognised when notified.

Reinsurance recoveries are accounted for in the same period as the related claim.

3 Summary of significant accounting policies (continued)

Liabilities under insurance contracts

Outstanding claims liabilities for non-life insurance contracts are based on the estimated ultimate cost of all claims incurred but not settled at the balance sheet date, whether reported or not, together with related claim-handling costs and a reduction for the expected value of salvage and other recoveries. Liabilities for claims incurred but not reported are made on an estimated basis, using appropriate statistical techniques.

Liabilities under non-linked life insurance contracts are calculated by each life insurance operation based on local actuarial principles. Some insurance contracts may contain discretionary participation features whereby the policyholder is entitled to additional payments whose amount and/or timing is at the discretion of the issuer. The discretionary element of these contracts is included in 'Liabilities under insurance contracts issued'.

Liabilities under unit-linked life insurance contracts are at least equivalent to the surrender or transfer value which is calculated by reference to the value of the relevant underlying funds or indices.

A liability adequacy test is carried out on insurance liabilities to ensure that the carrying amount of the liabilities is sufficient in the light of current estimates of future cash flows. When performing the liability adequacy test, all contractual cash flows are discounted and compared with the carrying value of the liability. When a shortfall is identified it is charged immediately to the income statement.

x Investment contracts

Customer liabilities under linked and certain non-linked investment contracts without discretionary participation features and the corresponding financial assets are designated at fair value. Movements in fair value are recognised in 'Net income from financial investments designated at fair value'. Deposits receivable and amounts withdrawn are accounted for as increases or decreases in the liability recorded in respect of investment contracts.

Liabilities under linked investment contracts are at least equivalent to the surrender or transfer value which is calculated by reference to the value of the relevant underlying funds or indices.

Investment management fees receivable are recognised in the income statement over the period of the provision of the investment management services, in 'Net fee income'.

y Dividends

Dividends proposed or declared after the balance sheet date are disclosed as a separate component of shareholders' equity.

z Debt securities in issue and subordinated liabilities

Debt securities issued for trading purposes or designated at fair value are reported under the appropriate balance sheet captions. Other debt securities in issue and subordinated liabilities are measured at amortised cost using the effective interest rate method and are reported under 'Debt securities in issue' or 'Subordinated liabilities'.

aa Cash and cash equivalents

For the purpose of the cash flow statement, cash and cash equivalents include highly liquid investments that are readily convertible to known amounts of cash and which are subject to an insignificant risk of change in value. Such investments comprise cash and balances with banks maturing within one month, and treasury bills and certificates of deposit with less than three months' maturity from the date of acquisition.

ab Share capital

Shares are classified as equity when the group has the unconditional right to avoid transferring cash or other financial assets.

4 Operating profit

The operating profit for the year is stated after taking account of:

a Interest income

	2010 HK\$m	2009 HK\$m
Interest income on listed securities Interest income on unlisted securities Other interest income	8,012 15,878 69,053	8,094 16,849 64,382
Less: interest income classified as 'Net trading income' (note 4(d))	92,943 (7,366)	89,325 (6,701)
designated at fair value' (note 4(e))	(54) 85,523	(74) 82,550

Included in the above is interest income accrued on impaired financial assets of HK\$465m (2009: HK\$480m), including unwinding of discounts on loan impairment losses of HK\$324m (2009: HK\$297m).

b	Int	terest	expense
---	-----	--------	---------

	2010 HK\$m	2009 HK\$m
Interest expense on subordinated liabilities, other debt securities in issue,		
customer accounts and deposits by banks maturing after five years	704	964
Interest expense on preference shares	2,659	3,937
Other interest expense	22,908	22,097
	26,271	26,998
Less: interest expense classified as 'Net trading income' (note 4(d))	(2,599)	(2,848)
Less: interest expense classified as 'Net income from financial instruments		
designated at fair value' (note 4(e))	(25)	(32)
	23,647	24,118

c Net fee income

	HK\$m	HK\$m
Net fee income includes the following:		
Net fee income, other than amounts included in determining the effective		
interest rate, arising from financial assets or financial liabilities that are		
not held for trading or designated at fair value		
- fee income	13,172	11,844
- fee expense	(1,404)	(1,225)
	11,768	10,619
Net fee income on trust and other fiduciary activities where the group holds		
or invests assets on behalf of its customers		
- fee income	8,717	6,711
- fee expense	(1,005)	(761)
	7,712	5,950

2010

2009

4 Operating profit (continued)

d Net trading income

	HK\$m	2009 HK\$m
Dealing profits	15,484	16.275
- Foreign exchange	13,036	12,613

Loss from hedging activities	(11)	(23)
Fair value hedges		
 Net gain / (loss) on hedged items attributable to the hedged risk 	563	(413)
- Net (loss) / gain on hedging instruments	(579)	375
Cash flow hedges		
Net hedging gain	5	15
Interest on trading assets and liabilities	4,767	3.853
- Interest income (note 4(a))	7,366	6,701
- Interest expense (note 4(b))	(2,599)	(2,848)
- Interest expense (note 4(0))	(2,399)	(2,040)
Dividend income from trading securities	476	421
- Listed investments	391	291
- Unlisted investments	85	130
	20,716	20,526
Net income from financial instruments designated at fair value		
	2010 HK\$m	2009 HK\$m
Income on assets designated at fair value which back insurance and investment contracts	4,509	9,100
Change in fair value of liabilities to customers under investment contracts	(1,217)	(2,854)
	3,292	6,246
Net change in fair value of other financial assets/liabilities designated at fair value ¹	436	971
Interest on financial assets and liabilities designated at fair value		
- Interest income (note 4(a))	54	74
- Interest expense (note 4(b))	(25)	(32)
	3,757	7,259

¹ Gains and losses from changes in the fair value of the group's issued debt securities may arise from changes in the group's own credit risk. In 2010 the group recognised a HK\$51m loss on changes in the fair value of these instruments arising from changes in own credit risk (2009:HK\$35m loss).

f Gains less losses from financial investments

	2010 HK\$m	2009 HK\$m
Gains on disposal of available-for-sale securities	2,365 (349)	1,191 (1,322)
	2,016	(131)

There are no gains or losses on the disposal of held-to-maturity investments in the year (2009: nil).

4 Operating profit (continued)

g Dividend income

	2010 HK\$m	2009 HK\$m
Listed investments Unlisted investments	418 146	228 136
	564	364

h Other operating income

	2010 HK\$m	2009 HK\$m Restated ¹
Rental income from investment properties	170	169
Movement in present value of in-force insurance business	4,106	2,888
Gains on investment properties	483	262
Gains on disposal of property, plant and equipment, and assets held for sale	13	410
Gain/(loss) on disposal of subsidiaries, associates and business portfolios	603	(6)
Surplus/(deficit) arising on property revaluation	102	(109)
Other	4,527	3,392
	10,004	7,006

¹ Restated for the amendment of HKAS 17 'Leases'. See note 1 for further information.

Included within 'Other' are recoveries against initial fair value on loan portfolios of HK\$1,049m (2009: HK\$664m). There are no gains or losses on the disposal of financial liabilities measured at amortised cost during the year (2009: nil).

i Loan impairment charges and other credit risk provisions

	2010 HK\$m	2009 HK\$m
Net charge for impairment of customer advances – Individually assessed impairment allowances:		
New allowances Releases Recoveries	3,605 (1,069) (322)	5,504 (1,135) (188)
Net charge for collectively assessed impairment allowances	2,214 2,474	4,181 6,498
Net charge for other credit risk provisions Net charge for loan impairment and other credit risk provisions	(69) 4,619	556 11,235

Included in the net charge for other credit risk provisions is an impairment release of HK\$38m against available-for-sale debt securities (2009: impairment charge of HK\$365m). There are no impairment losses or provisions relating to held-to-maturity investments (2009: nil).

4 Operating profit (continued)

j General and administrative expenses

	2010 HK\$m	2009 HK\$m <i>Restated</i> ¹
Premises and equipment		
- Rental expenses	2,749	2,747
Amortisation of prepaid operating lease payments	18	18
- Other premises and equipment	3,496	3,192
	6,263	5,957
Marketing and advertising expenses	3,891	3,168
Other administrative expenses	12,254	10,368
Litigation and other provisions	(19)	(6)
	22,389	19,487

 $^{1\ \}textit{Restated for the amendment of HKAS 17 `Leases'. See note 1 for further information.}$

Included in operating expenses are direct operating expenses of HK\$20m (2009: HK\$21m) arising from investment properties that generated rental income during the year. Direct operating expenses arising from investment properties that did not generate rental income amounted to HK\$2m (2009: HK\$1m).

Included in operating expenses are minimum lease payments under operating leases of HK\$2,934m (2009: HK\$2,806m).

k Auditors' remuneration

Auditors' remuneration amounted to HK\$76m (2009: HK\$72m), of which HK\$29m (2009: HK\$29m) related to the Bank.

5 Insurance income

Included in the consolidated income statement are the following revenues earned by the insurance business:

a Insurance income

	2010 HK\$m	2009 HK\$m
Net interest income Net fee income Net trading loss	5,832 1,070 (5)	4,691 768 (8)

- Defined contribution plans	920	811
- Defined benefit plans	698	562
	32,766	28,585

b Directors' emoluments

The aggregate emoluments of the Directors of the Bank calculated in accordance with section 161 of the Hong Kong Companies Ordinance of HK\$117m (2009: HK\$129m). This comprises fees of HK\$7m (2009: HK\$6m) and other emoluments of HK\$110m (2009: HK\$123m) which includes pension benefits of HK\$6m (2009: HK\$5m).

c Retirement benefit pension plans

The group operates 77 (2009: 69) retirement benefit plans, with a total cost of HK\$1,618m (2009: HK\$1,373m), of which HK\$649m (2009: HK\$532m) relates to overseas plans and HK\$28m (2009: HK\$35m) are sponsored by HSBC Asia Holdings BV.

Progressively the HSBC Group has been moving to defined contribution plans for all new employees.

The group's defined benefit plans, which cover 37% (2009: 39%) of employees, are predominantly funded plans with assets which, in the case of the larger plans, are held either under insurance policies or in trust funds separate from the group. The cost relating to the funded plans was HK\$628m (2009: HK\$533m) which was assessed in accordance with the advice of qualified actuaries; the plans are reviewed at least on a triennial basis or in accordance with local practice and regulations. The actuarial assumptions used to calculate the projected benefit obligations of the group's retirement benefits plans vary according to the economic conditions of the countries in which they are situated.

(i) Defined benefit plan principal actuarial assumptions

The principal actuarial assumptions used to calculate the major defined benefit pension plans were:

	2010	2009
	% p.a.	% p.a.
Discount rate	2.85	2.58
Expected rates of return on plan assets ¹		
- equities	8.8	8.5
- bonds	3.8	3.6
- other	5.1	0.9
Rate of pay increase		
- long term	5.0	5.0
Mortality table	HKLT2001 ²	HKLT2001 ²

¹ The expected rates of return are weighted on the basis of the fair value of the plan assets.

The overall expected long-term rate of return on assets as at 31 December 2010 is 4.9% (2009: 5.8%). The expected long-term rate of return is based on the portfolio as a whole and not on the sum of the returns on individual asset categories. The return is based on historical market returns adjusted for additional factors such as the current rate of inflation and interest rates.

² HKLT2001 - Hong Kong Life Tables 2001.

6 Employee compensation and benefits (continued)

In Hong Kong, the HSBC Group Hong Kong Local Staff Retirement Benefit Scheme covers employees of The Hongkong and Shanghai Banking Corporation Limited and certain other employees of the HSBC Group. The latest actuarial valuation of the defined benefit plan was made at 31 December 2009, and was performed by Estella Chiu, Fellow of the Society of Actuaries of the United States of America, of HSBC Insurance (Asia) Limited, a subsidiary of The Hongkong and Shanghai Banking Corporation Limited. At the valuation date, the market value of the defined benefit scheme's assets was HK\$8,436m. On an ongoing basis, the actuarial value of the scheme's assets represented 105% of the actuarial present value of the benefits accrued to members, after allowing for expected future increases in salaries, and the resulting surplus amounted to HK\$551m. On a windup basis, the scheme's assets represented 107% of the members' vested benefits, based on current salaries, and the resulting surplus amounted to HK\$690m. The attained age method has been adopted for the valuation and the major assumptions used in this valuation were a discount rate of 6% per annum and long-term salary increases of 5% per annum.

The plan assets above included assets issued by entities within HSBC Group:

	Gr	roup	Bank		
	2010	2009	2010	2009	
	HK\$m	HK\$m	HK\$m	HK\$m	
Equities	427	418	366	369	
Others	92	103	50	62	
	519	521	416	431	

The group's actual gain on plan assets for the year ended 31 December 2010 was HK\$849m (2009: HK\$1,259m gain). The Bank's actual gain on plan assets for the year ended 31 December 2010 was HK\$528m (2009: HK\$592m gain).

The group expects to make HK\$759m of contributions to defined benefit pension plans during the following year (2009: HK\$706m). Contributions to be made by the Bank are expected to be HK\$472m (2009: HK\$453m).

(v) Total expense recognised in the income statement in 'Defined benefit plans'

	2010 HK\$m	2009 HK\$m
Current service cost	979	1,153
Interest cost	508	307
Expected return on plan assets	(847)	(891)
Past service costs	58	_
Gains on curtailments	_	(7)
Total net expense	698	562

The total net actuarial loss recognised in total equity during 2010 in respect of defined benefit pension plans was HK\$807m (2009: HK\$3,606m gain). After deduction of non-controlling interests, a loss of HK\$810m (2009: HK\$2,893m gain) was recognised in total shareholders' equity. Total net actuarial losses recognised outside of the income statement to date are HK\$6,779m (2009: HK\$5,972m). After deduction of non-controlling interests, the total net actuarial losses recognised in total shareholders' equity to date are HK\$5,917m (2009: HK\$5,107m).

Total net actuarial loss recognised in the Bank's retained profits during 2010 in respect of defined benefit pension plans were HK\$772m (2009: HK\$1,463m gain). Total net actuarial losses recognised outside of the income statement to date are HK\$4,261m (2009: HK\$3,489m).

6 Employee compensation and benefits (continued)

The total effect of the limit on plan surpluses recognised within actuarial losses in equity for both the group and the Bank during 2010 was HK\$1m (2009: HK\$38m, excluding exchange differences of HK\$2m).

Expenses recognised in the income statement in respect of defined benefit schemes sponsored by the Bank's immediate holding company, HSBC Asia Holdings BV ("HABV") were not included in the tables above as these are reported as Defined Contribution Plans.

HABV recharges contributions to participating members of the HSBC International Staff Retirement Benefits Scheme, a funded defined benefit scheme, in accordance with schedules determined by the Trustees following consultation with qualified actuaries. There is no contractual agreement or stated policy for charging the net defined benefit cost to the group.

The scheme is denominated in Sterling with the following details:

	2010	2009
	% p.a.	% p.a.
Assumptions as at 31 December		
Inflation	3.70	3.70
Salary increases	5.45	5.45

7 Tax expense

a The Bank and its subsidiaries in Hong Kong have provided for Hong Kong profits tax at the rate of 16.5% (2009: 16.5%) on the profits for the year assessable in Hong Kong. Overseas branches and subsidiaries have similarly provided for tax in the countries in which they operate at the appropriate rates of tax ruling in 2010. Deferred taxation is provided for in accordance with the group's accounting policy in note 3(q).

The charge for taxation in the income statement comprises:

	2010	2009
	HK\$m	HK\$m
		Restated 1
Current income tax		
- Hong Kong profits tax - on current year profit	6,378	6,010

¹ Restated for the amendment of HKAS 17 'Leases'. See note 1 for further information.

The amount of unused tax losses for which no deferred tax asset is recognised in the balance sheet is HK\$3,390m (2009: HK\$3,410m). The losses do not expire under current tax legislation.

Deferred tax of HK\$617m (2009: HK\$443m) has been provided in respect of distributable reserves or post-acquisition reserves of associates that, on distribution or sale, would attract withholding tax.

Deferred tax is not recognised in respect of the group's investments in subsidiaries and branches when remittance is not contemplated, and for those associates and interests in joint ventures where it has been determined that no additional tax will arise.

17 Derivatives

Derivatives are financial instruments that derive their value from the price of an underlying item such as equities, bonds, interest rates, foreign exchange rates, credit spreads, commodities and equity or other indices.

Derivatives are carried at fair value and shown in the balance sheet as separate totals of assets and liabilities. Asset and liability values represent the cost or benefit to the group of replacing all transactions with positive or negative fair value respectively, assuming that all the group's relevant counterparties default at the same time, and that transactions can be replaced instantaneously.

Derivative assets and liabilities on different transactions are only netted if the transactions are with the same counterparty, a legal right of set-off exists and the cash flows are intended to be settled on a net basis. Changes in the values of derivatives are recognised in accordance with the group's accounting policy as described in note 3(j).

Use of derivatives

The group transacts derivatives for three primary purposes: to create risk management solutions for clients, for proprietary trading purposes, and to manage and hedge the group's own risks. For accounting purposes, derivative instruments are classified as held either for trading or hedging. Derivatives that are held as hedging instruments are formally designated as hedges as defined in HKAS 39. All other derivative instruments are classified as held for trading.

The held for trading classification includes two types of derivative instruments. The first type are those used in sales and trading activities, including those instruments that are used for risk management purposes but which for various reasons do not meet the qualifying criteria for hedge accounting. The second type of held for trading category includes derivatives managed in conjunction with financial instruments designated at fair value. These activities are described more fully below.

The group's derivative activities give rise to significant open positions in portfolios of derivatives. These positions are managed constantly to ensure that they remain within acceptable risk levels, with offsetting deals being utilised to achieve this where necessary. When entering into derivative transactions, the group employs the same credit risk management procedures to assess and approve potential credit exposures as are used for traditional lending.

a Trading derivatives

Most of the group's derivative transactions relate to sales and trading activities. Sales activities include the structuring and marketing of derivative products to customers to enable them to take, transfer, modify or reduce current or expected risks. Trading activities in derivatives are entered into principally for the purpose of generating profits from short-term fluctuations in price or margin. Positions may be traded actively or be held over a period of time to benefit from expected changes in currency rates, interest rates, equity prices or other market parameters. Trading includes market-making, positioning and arbitrage activities. Market-making entails quoting bid and offer prices to other market participants for the purpose of generating revenues based on spread and volume; positioning means managing market risk positions in the expectation of benefiting from favourable movements in prices, rates or indices; arbitrage involves identifying and profiting from price differentials between markets and products.

As mentioned above, other derivatives classified as held for trading include non-qualifying hedging derivatives and ineffective hedging derivatives. Non-qualifying hedging derivatives are entered into for risk management purposes but do not meet the criteria for hedge accounting. These include derivatives managed in conjunction with financial instruments designated at fair value. Ineffective hedging derivatives were previously designated as hedges, but no longer meet the criteria for hedge accounting.

17 Derivatives (continued)

(i) Contract amounts of derivatives held for trading purposes by product type

	2010		2009	
	Group	Bank	Group	Bank
	HK\$m	HK\$m	HK\$m	HK\$m

Total derivatives	25,435,882	24,429,172	16,433,937	15,683,939

Other derivatives classified as held for trading include non-qualifying hedging derivatives, ineffective hedging derivatives and the components of hedging derivatives that are excluded from assessing hedge ineffectiveness. Non-qualifying hedging derivatives are entered into for risk management purposes and do not meet the criteria for hedge accounting.

Included in the above table are the following contract amounts of derivatives managed in conjunction with financial instruments designated at fair value that are included within trading derivatives:

	2010		2009

b Hedging instruments

The group uses derivatives (principally interest rate swaps) for hedging purposes in the management of its own asset and liability portfolios and structural positions. This enables the group to mitigate the market risk which would otherwise arise from imbalances in the maturity and other profiles of its assets and liabilities.

The accounting treatment of hedging transactions varies according to the nature of the instrument hedged and the type of hedging transaction. Derivatives may qualify as hedges for accounting purposes if they are fair value hedges, cash flow hedges, or net investment hedges.

(i) Contract amounts of derivatives held for hedging purposes by product type

At 31 December 2009	1,977	229	1,545	56

17 Derivatives (continued)

The cash flows of the above hedging derivatives are expected to affect the income statement in 2011 and beyond.

The group's cash flow hedges consist principally of interest rate swaps that are used to protect against exposures to variability in future interest cash flows on non-trading assets and liabilities which bear interest at variable rates or which are expected to be re-funded or reinvested in the future. The amounts and timing of future cash flows, representing both principal and interest flows, are projected for each portfolio of financial assets and liabilities on the basis of their own contractual terms and other relevant factors, including estimates of prepayments and defaults. The aggregate principal balances and interest cash flows across all portfolios over time form the basis for identifying gains and losses on the effective portions of derivatives designated as cash flow hedges of forecast transactions. Gains and losses are initially recognised directly in equity, in the cash flow hedging reserve, and are transferred to the income statement when the forecast cash flows affect the income statement. During the year to 31 December 2010, the amount transferred to the income statement comprised HK\$1,430m (2009: HK\$2,689m) included in net interest income.

The gains and losses on ineffective portions of such derivatives are recognised immediately in the income statement. During the year to 31 December 2010, a gain of HK\$5m (2009: gain of HK\$15m) was recognised due to hedge ineffectiveness and termination of forecast transactions.

The schedule of forecast principal balances on which the expected interest cash flows arise as at 31 December 2010 is as follows:

	3 months or less HK\$m	More than 3 months but less than 1 year HK\$m	5 years or less but more than 1 year HK\$m
At 31 December 2010			
Cash inflows from assets	177,416	96,529	31,841
Cash outflows from liabilities	(4,301)	(4,003)	(2,574)
Net cash inflows	173,115	92,526	29,267
At 31 December 2009			
Cash inflows from assets	220,822	209,085	27,546
Cash outflows from liabilities	(5,784)	(5,783)	(3,877)
Net cash inflow	215,038	203,302	23,669

17 Derivatives (continued)

c Unobservable inception profits

Any initial gain or loss on financial instruments, where the valuation is dependent on unobservable parameters is deferred over the life of the contract or until the instrument is redeemed, transferred or sold or the fair value becomes observable. All derivatives that are part of qualifying hedging relationships have valuations based on observable market parameters.

The table below sets out the aggregate unobservable inception profit yet to be recognised in the income statement at the beginning and end of the year with a reconciliation of the changes during the year.

Group

	2010 HK\$m	2009 HK\$m

The categories of advances, and the relevant definitions, used by the Hong Kong Monetary Authority differ from those used for internal purposes by the HSBC Group, including The Hongkong and Shanghai Banking Corporation Limited and its subsidiaries, as disclosed in note 18(b).

The geographical information shown above has been classified by the location of the principal operations of the subsidiary or, in the case of the Bank, by the location of the branch responsible for advancing the funds.

Collateral includes any tangible security that has a determinable fair market value and is readily marketable. This includes (but is not limited to) cash and deposits, stocks and bonds, mortgages over properties and charges over other fixed assets such as plant and equipment. Where collateral values are greater than gross advances, only the amount of collateral up to the gross advance has been included.

18 Advances to customers (continued)

d Advances to customers include equipment leased to customers under finance leases and hire purchase contracts having the characteristics of finance leases:

Rest of

Impaired advances to customers are those advances where objective evidence exists that full repayment of principal or interest is considered unlikely. The individually assessed allowances are made after taking into account the value of collateral in respect of such advances.

¹ Please refer to note 52 for the group policy on the credit risk rating system.

2009	1,813	0.4	2,327	0.7	4,140	0.5

Rescheduled advances to customers are those advances which have been restructured or renegotiated because of a deterioration in the financial position of the borrower or because of the inability of the borrower to meet the original repayment schedule. Rescheduled advances to customers are stated net of any advances which have subsequently become overdue for more than three months and which are included in 'Overdue advances to customers' (note 19(d)).

20 Impairment allowances against advances to banks and other assets

There are no significant impaired or rescheduled advances to banks or overdue or rescheduled other assets as at 31 December 2010 and 31 December 2009. Information relating to overdue balances can be found in note 52.

22 Transfers of financial assets not qualifying for derecognition

The group enters into transactions in the normal course of business by which it transfers recognised financial assets directly to third parties or to special purpose entities. These transfers may give rise to full or partial derecognition of the financial assets concerned.

- Full derecognition occurs when the group transfers its contractual right to receive cash flows from the financial
 assets, or retains the right but assumes an obligation to pass on the cash flows from the asset, and transfers
 substantially all the risks and rewards of ownership. The risks include credit, interest rate, currency, prepayment
 and other price risks.
- Partial derecognition occurs when the group sells or otherwise transfers financial assets in such a way that some but not substantially all of the risks and rewards of ownership are transferred but control is retained. These financial assets are recognised in the balance sheet to the extent of the group's continuing involvement.

The majority of transferred financial assets that do not qualify for derecognition are (i) debt securities held by counterparties as collateral under repurchase agreements or (ii) securities lent under securities lending agreements. The following table analyses the carrying amount of financial assets transferred to third parties that did not qualify for derecognition during 2010 and 2009, and their associated financial liabilities:

Group

	2010		2009	
	Carrying	Carrying	Carrying	Carrying
	amount of	amount of	amount of	amount of

Securities lending agreements	387	65	711	32
	7,079	6,550	988	327

The carrying amount of assets transferred by the group to other HSBC Group entities under repurchase agreements is HK\$48m (2009: HK\$474m) and by the Bank is HK\$11,647m (2009: HK\$10,126m). The associated liability assumed by the group is HK\$48m (2009: HK\$472m) and by the Bank is HK\$11,715m (2009: HK\$10,122m).

The carrying amount of assets transferred under securities lending agreements to other HSBC Group entities is HK\$2,341m (2009: HK\$514m) by both the group and the Bank. The associated liabilities assumed are HK\$2,458m (2009: HK\$577m).

HSBC Life (International) Limited ²	Bermuda	Retirement	HK\$421m	100%
		benefits and		
		life insurance		

- 1 People's Republic of China
- 2 Held indirectly

The principal countries of operation are the same as the countries of incorporation except for HSBC Life (International) Limited which operates mainly in Hong Kong.

All of the above companies are controlled subsidiaries and have been consolidated in the financial statements.

The principal subsidiaries are regulated banking and insurance entities and as such, are required to maintain certain minimum levels of capital and liquid assets to support their operations. The effect of these regulatory requirements is to limit the extent to which the subsidiaries may transfer funds to the Bank in the form of repayment of shareholder loans or cash dividends.

Acquisitions

On 2 July 2010, the group entered into an agreement to acquire The Royal Bank of Scotland Group plc's retail and commercial banking businesses in India. The total consideration will comprise a premium of up to US\$95m over the net asset value of the businesses being acquired. The purchase price will be reduced in respect of 90% of any credit losses incurred on the unsecured lending portfolio in the two years subsequent to completion. The initial consideration paid will be reduced by an estimate of these losses with an adjustment to reflect the actual losses at the end of the two year protection period. The acquisition is subject to regulatory approvals and is expected to complete in the first half of 2011.

Disposals

On 30 November 2010, the group completed the sale of an 80.1% interest in HSBC Private Equity (Asia) Limited ('HPEA') to HPEA's management. As a result, the group no longer controls The HSBC Private Equity Fund 3 ('HPEF3'). The group previously consolidated HPEF3 by virtue of its control over HPEA, which in turn controlled HPEF3. Upon deconsolidation, the group retains its 38.8% interest in HPEF3 as an available for sale investment. HPEF3 has been renamed The Headland Private Equity Fund 3 Limited. HPEF3 generated net profits after tax of HK\$108m for the period to 30 November 2010. The group's pre-tax gain on deconsolidation was HK\$602m.

The following assets and liabilities of HPEF3 were deconsolidated: Financial assets designated at fair value HK\$2,390m; Financial investments HK\$2,623m; Other assets HK\$410m; and Deposits by banks HK\$560m.

³ Held indirectly

24 Interests in associates and joint ventures (continued)

Hang Seng Bank Limited holds a 12.80% stake in Industrial Bank Co., Ltd. and The Hongkong and Shanghai Banking Corporation Limited holds a 19.03% interest in Bank of Communications Co., Ltd. These companies are accounted for as associated companies, as the group has representation on the Board of Directors of each bank, and, in accordance with the Technical Support and Assistance Agreements, the group is assisting in the development of financial and operating policies. In respect of Bank of Communications Co., Ltd, a number of staff have been seconded to assist in this process.

In respect of Industrial Bank Co., Ltd., Hang Seng Bank Limited also has representation on the executive committee, whilst for Bank of Communications Co., Ltd, The Hongkong and Shanghai Banking Corporation Limited has representation on the strategy committee.

In respect of the year ended 31 December 2010, Bank of Communications Co., Ltd and Industrial Bank Co., Ltd were included in these financial statements based on financial statements drawn up to 30 September 2010, but taking into account the financial effect of significant transactions or events in the subsequent period from 1 October 2010 to 31 December 2010. The group has taken advantage of the provision contained in Hong Kong Accounting Standard 28 'Investments in Associates' whereby it is permitted to include the attributable share of associates' results based on accounts drawn up to a non-coterminous period end where the difference is no greater than three months.

On 19 January 2010 the group, through its subsidiary HSBC Insurance (Asia-Pacific) Holdings Limited, increased its shareholding in Bao Viet Holdings to 18% from 10% through the purchase of additional shares for a consideration of VND1,880bn. Bao Viet Holdings was accounted for as an associate from that date due to the group's representation on the Board of Directors and, in accordance with the Technical Support and Capability Transfer Agreement, the group is assisting in the development of financial and operating policies.

In the first half of 2010, the group participated in Industrial Bank Co., Ltd's rights issue. This increased the group's equity interest from 12.78% to 12.80%.

In July 2010, Vietnam Technological and Commercial Joint Stock Bank issued shares to its employees. This reduced the group's equity interest from 19.91% to 19.79%.

During 2010, Bank of Communications Co., Ltd completed its 'A' and 'H' share rights issues and the group took up its rights in full. This increased the group's equity interest from 19.01% to 19.03%.

Interests in associates include intangible assets recognised on acquisition with respect to customer relationships and brand names which are amortised over a period of 10 years.

During 2010 there was no impairment of goodwill (2009: nil). Impairment testing in respect of goodwill is performed annually by comparing the recoverable amount of cash generating units ('CGUs'), determined at 1 July 2010 based on a value in use calculation, with the carrying amount of the CGUs. That calculation uses cash flow estimates based on management's cash flow projections, extrapolated in perpetuity using a nominal long-term growth rate based on current Gross Domestic Product and inflation for the countries within which the CGU operates. Cash flows are extrapolated in perpetuity due to the long-term perspective within the group of business units making up the CGUs. The discount rate used is based on the cost of capital HSBC allocates to investments in the countries in which the CGU operates.

The cost of capital assigned to an individual CGU and used to discount its future cash flows can have a significant effect on its valuation. The cost of capital percentage is generally derived from an appropriate capital asset pricing model, which itself depends on inputs reflecting a number of financial and economic variables including the risk-free rate in the country concerned and a premium to reflect the inherent risk of the business being evaluated. These variables are established on the basis of management judgement.

25 Goodwill and intangible assets (continued)

Management judgement is required in estimating the future cash flows of the CGUs. These values are sensitive to the cash flows projected for the periods for which detailed forecasts are available, and to assumptions regarding the long term sustainable pattern of cash flows thereafter. While the acceptable range within which underlying assumptions can be applied is governed by the requirement for resulting forecasts to be compared with actual performance and verifiable economic data in future years, the cash flow forecasts necessarily and appropriately reflect management's view of future business prospects.

Two key assumptions upon which management has based its determination of the recoverable amount of the CGUs are the discount rate and the nominal long-term growth rate. The discount rates used in the impairment test in 2010 were in the range of 10% to 11% (2009: 9% to 12%) across different CGUs. The nominal long-term growth rates used in the impairment test in 2010 for Hong Kong and Rest of Asia-Pacific were 5.3% and 6.9% respectively (2009: 4.7% and 6.5%).

b The present value of in-force long-term insurance business ('PVIF')

(i) PVIF specific assumptions

The following are the key assumptions used in the computation of PVIF for Hong Kong, being the main life insurance operation:

2010 2009
3.10% 2.58%
11.0%
3.0% 3.0%
6 for the first policy year 0%-17% for the first policy year
6-15% for renewal years and 0%-15% for renewal years

^{1 &#}x27;Other' includes operating licenses which were recognised during the acquisition of the assets, liabilities and operations of The Chinese Bank in Taiwan in 2008. These have an indefinite useful life as there are no economic or legal restrictions to limit their use. The carrying value of this intangible asset was allocated to relevant business units in Taiwan.

The above intangible assets are amortised over their finite useful lives as follows:

Computer software from 3 years to 5 years
Customer/merchant relationships from 3 years to 10 years
Other (excluding operating licenses) from 3 years to 10 years

An impairment test was carried out in respect of the operating licenses in Taiwan as at 1 July 2010. The result confirmed that there was no impairment. The impairment test was performed by comparing the recoverable amount of the relevant cash generating units ('CGUs'), determined by a value in use calculation, with the carrying amounts of the CGUs. The calculation uses cash flow estimates based on management's cash flow projections, extrapolated in perpetuity using a long-term growth rate applicable to the banking industry in Taiwan. The discount rate used is based on the cost of capital the group allocates to Taiwan.

² Other intangible assets arising from the acquisition of the assets, liabilities and operations of The Chinese Bank in Taiwan were transferred from Bank to Group following the local incorporation of HSBC Bank (Taiwan) Limited in 2010.

25 Goodwill and intangible assets (continued)

The cost of capital used to discount its future cash flows can have a significant effect on its valuation. The cost of capital percentage is derived from the capital asset pricing model which is the same model used to compute the discount rate for goodwill impairment testing.

Management judgement is required in estimating the future cash flows of the CGUs. These values are sensitive to the cash flows projected for the periods for which detailed forecasts are available and to assumptions regarding the long-term sustainable pattern of cash flows thereafter. While the acceptable range within which underlying assumptions can be applied is governed by the requirement for resulting forecasts to be compared with actual performance and verifiable economic data in future years, the cash flow forecasts necessarily and appropriately reflect management's view of future business prospects.

Two key assumptions upon which management has based its determination of the recoverable amount of the CGUs are the discount rate and the long-term growth rate. The discount rate used during 2010 was in the range of 11% to 12% (2009: 12%). The long-term growth rate used in the impairment testing during 2010 was 3% (2009: 3%).

¹ Restated for the amendment of HKAS 17 'Leases'. See note 1 for further information.

The group's land and buildings and investment properties were revalued at 30 November 2010 and updated for any material changes at 31 December 2010. The basis of valuation for land and buildings and investment properties was open market value, depreciated replacement cost or surrender value as noted in note 3(o). In determining the open market value of investment properties, expected future cash flows have been discounted to their present values. The net book value of 'Land and buildings' includes HK\$8,931m (2009 restated: HK\$7,935m) in respect of properties which were valued using the depreciated replacement cost method or surrender value.

The surplus on property revaluation was HK\$10,521m (2009 restated: HK\$4,741m). Amounts of HK\$7,513m (2009 restated: HK\$3,382m) and HK\$585m (2009 restated: HK\$153m) were credited to the property revaluation reserve and the income statement respectively. The amount credited to the property revaluation reserve of HK\$7,513m (2009 restated: HK\$3,382m) is stated after deduction of non-controlling interests of HK\$796m (2009 restated: HK\$558m) and deferred tax of HK\$1,627m (2009 restated: HK\$648m). The amount credited to the income statement comprises the surplus of HK\$483m (2009 restated: HK\$262m) on revaluation of investment properties, and HK\$102m (2009 restated: HK\$109m deficit) relating to the reversal of previous revaluation deficits that arose when the value of certain land and buildings fell below depreciated historical cost or surrender value, or when land and buildings were newly acquired with revaluation losses.

Land and buildings and investment properties in Hong Kong, the Macau SAR and mainland China, representing 95% by value of the group's properties subject to valuation, were valued by DTZ Debenham Tie Leung Limited who have recent experience in the location and type of properties. The valuations were carried out by qualified valuers who are members of the Hong Kong Institute of Surveyors. Properties in eleven countries, which represent 5% by value of the group's properties, were valued by different independent professionally qualified valuers.

26 Property, plant and equipment (continued)

e Properties leased to customers

The group's investment properties are rented out under operating leases. The leases typically run for a period of 2-3 years and may contain an option to renew and the terms will then be renegotiated. During the current year, HK\$170m (2009: HK\$169m) was recognised as rental income in the income statement in respect of operating leases.

The total future minimum lease payments under non-cancellable operating leases receivable are as follows:

	Group		Bank	
	2010	2009	2010	2009
	HK\$m	HK\$m	HK\$m	HK\$m
Within one year	130	120	5	6
After one but within five years	93	62	_	5
	223	182	5	11

27 Leasehold land and land use rights

The group's interests in leasehold land and land use rights are accounted for as operating leases and their net book value is analysed as follows:

	Group			Bank		
	2010	2009	2008	2010	2009	2008

	101,458	101,208	101,306	101,063

500,000 cumulative redeemable preference shares were issued in 1997, which have a mandatory redemption date of 2 January 2019 but may be redeemed at the Bank's option on or after 2 January 2003, subject to the consent of the Hong Kong Monetary Authority. The shares are redeemable at the issue price of US\$1,000 per share, comprising nominal value of US\$1 per share and premium on issue of US\$999 per share. 550,000,000 cumulative redeemable preference shares were issued in 2006, which have a mandatory redemption date of 21 December 2016 but may be redeemed at the Bank's option on or after 21 December 2011, subject to the consent of the Hong Kong Monetary Authority. The shares are redeemable at the issue price of US\$1 per share. 1,750,000,000 cumulative redeemable preference shares were issued in 2007, which have mandatory redemption dates between 29 March and 24 November 2017 but may be redeemed at the Bank's option on or after dates starting between 29 March and 24 November 2012, subject to the consent of the Hong Kong Monetary Authority. The shares are redeemable at the issue price of US\$1 per share.

400,000,000 cumulative redeemable preferences shares were issued in 2008, which have a mandatory redemption date of 29 March 2023 but may be redeemed at the Bank's option on or after 29 March 2018, subject to the consent of the Hong Kong Monetary Authority. The shares are redeemable at the issue price of US\$1 per share. 1,050,000,000 cumulative redeemable preferences shares were issued in 2009, which have a mandatory redemption date of 2 January 2024 but may be redeemed at the Bank's option on or after 2 January 2019, subject to the consent of the Hong Kong Monetary Authority. The shares are redeemable at the issue price of US\$1 per share. The total number of issued cumulative redeemable preference shares at 31 December 2010 was 3,750,500,000 (2009: 3,750,500,000). No shares were issued during the year (2009: 1,050,000,000).

The non-cumulative irredeemable preference shares were issued at nominal value, and may be redeemed subject to 30 days' notice in writing to shareholders and with the prior consent of the Hong Kong Monetary Authority. On redemption, holders of the shares shall be entitled to receive the issue price of US\$1 per share held together with any unpaid dividends for the period since the annual dividend payment date immediately preceding the date of redemption, subject to the Bank having sufficient distributable profits. The number of issued non-cumulative irredeemable preference shares at 31 December 2010 was 6,653,000,000 (2009: 6,653,000,000). No shares were issued during the year (2009: nil).

37 Preference shares (continued)

The cumulative irredeemable preference shares were issued at nominal value, and may be redeemed subject to 30 days' notice in writing to shareholders and with the prior consent of the Hong Kong Monetary Authority. On redemption, holders of the shares shall be entitled to receive the issue price of US\$1 per share held together with any unpaid dividends for the period since the annual dividend payment date immediately preceding the date of redemption, subject to the Bank having sufficient distributable profits. The number of issued cumulative irredeemable preference shares at 31 December 2010 was 2,130,000,000 (2009: 2,130,000,000). No shares were issued during the year (2009: nil).

The holders of the preference shares are entitled to one vote per share at shareholder meetings of the Bank.

8,700,000 compulsorily convertible preference shares (CCPS) were issued by HSBC InvestDirect Securities (India) Limited ("HSBC InvestDirect") in 2009 at a nominal value of Rs.100 each. The shares are irredeemable and may be converted into fully paid equity shares of HSBC InvestDirect at any time after three years from the date of allotment of the CCPS by written notice. The conversion shall be made at par or premium as may be determined by the Board of HSBC InvestDirect at the time of the conversion. The CCPS shall carry a fixed dividend of 0.001% of the face value per annum. After ten years following the allotment of the CCPS all outstanding CCPS shall be converted at par or premium as may be determined by the Board of HSBC InvestDirect at the time of the conversion.

38 Share capital

Authorised

The authorised ordinary share capital of the Bank at 31 December 2010 and 2009 was HK\$30,000m divided into 12,000m ordinary shares of HK\$2.50 each. No new shares were issued during 2010 (2009: nil).

39 Analysis of changes in equity (continued)

Regulatory reserve

The Bank and its banking subsidiaries operate under regulatory jurisdictions which require the maintenance of minimum impairment provisions in excess of those required under HKFRS.

The regulatory reserve is maintained to satisfy the provisions of the Banking Ordinance and local regulatory requirements for prudential supervision purposes. Movements in the reserve are made directly through retained earnings.

At 31 December 2010, the effect of this requirement is to restrict the amount of reserves which can be distributed to shareholders by HK\$7,702m (2009: HK\$6,413m).

Retained profits

Retained profits are the cumulative net earnings of the group that have not been paid out as dividends, but retained to be reinvested in the business.

Property revaluation reserve

The property revaluation reserve represents the difference between the current fair value of the property and its depreciated cost.

Available-for-sale investment reserve

The available-for-sale investment reserve includes the cumulative net change in the fair value of available-for-sale investments other than impairments which have been recognised in the income statement.

Cash flow hedge reserve

The cash flow hedge reserve comprises the effective portion of the cumulative net change in the fair value of cash flow hedging instruments related to hedged transactions.

Foreign exchange reserve

The foreign exchange reserve comprises all foreign exchange differences arising from the translation of the financial statements of foreign operations as well as from the translation of liabilities that hedge the Bank's net investments in foreign operations.

Other reserve

The other reserve mainly comprises the share-based payment reserve account and other non-distributable reserves. The share-based payment reserve account is used to record the amount relating to share options granted to employees of the group directly by HSBC Holdings plc.

40 Maturity analysis of assets and liabilities

The balances in the above tables will not agree directly with the balances in the consolidated balance sheet as the table incorporates, on an undiscounted basis, all cash flows relating to principal and future coupon payments (except for trading liabilities and trading derivatives). In addition, loan commitments and financial guarantee contracts are generally not recognised on the balance sheet. Trading liabilities and trading derivatives have been included in the 'On demand' time bucket, and not by contractual maturity, because trading liabilities are typically held for short periods of time. The undiscounted cash flows payable under hedging derivative liabilities are classified according to their contractual maturity. The undiscounted cash flows potentially payable under loan commitments and financial guarantee contracts are classified on the basis of the earliest date they can be called.

Cash flows payable in respect of customer accounts are primarily contractually repayable on demand or at short notice. In practice, however, short-term deposit balances remain stable as inflows and outflows broadly match and a significant portion of loan commitments and guarantee contracts expire without being drawn upon. The group's approach to managing liquidity risk is set out in note 52.

	1,5/1,114	1,133,473	307,774	774,007

The above table discloses the nominal principal amounts of off-balance sheet transactions, the amounts relating to other contingent liabilities and the nominal principal amounts relating to financial guarantee contracts. Contingent liabilities and commitments are mainly credit-related instruments which include non-financial guarantees and commitments to extend credit. Contractual amounts represent the amounts at risk should contracts be fully drawn upon and clients default. Since a significant portion of guarantees and commitments are expected to expire without being drawn upon, the total of the contractual amounts is not representative of future liquidity requirements.

44 Contingent liabilities and commitments (continued)

b Guarantees (including financial guarantee contracts)

The group provides guarantees and similar undertakings on behalf of both third party customers and other entities within the group. These guarantees are generally provided in the normal course of the banking business. The principal types of guarantees provided, and the maximum potential amount of future payments which the group could be required to make at 31 December 2010, were as follows:

	Gre	oup	Ba	nk
	2010	2009	2010	2009

- 1 Financial guarantees are contracts that require the issuer to make specified payments to reimburse the holder for a loss incurred because a specified debtor fails to make payment when due in accordance with the original or modified terms of a debt instrument. The amounts in the above table are nominal principal amounts.
- 2 Standby letters of credit which are financial guarantee contracts are irrevocable obligations on the part of the group to pay third parties when customers fail to make payments when due.
- 3 Other direct credit substitutes include re-insurance letters of credit related to particular transactions and trade-related letters of credit issued without provision for the issuing entity to retain title to the underlying shipment.
- 4 Performance bonds, bid bonds, standby letters of credit and other transaction-related guarantees are undertakings by which the obligation on the group to make payment depends on the outcome of a future event.

The amounts disclosed in the above table reflect the group's maximum exposure under a large number of individual guarantee undertakings. The risks and exposures from guarantees are captured and managed in accordance with HSBC's overall credit risk management policies and procedures. Guarantees are subject to HSBC's annual credit review process.

c Contingencies

The group is named in and defending legal actions in a number of jurisdictions including Hong Kong, arising out of its normal business operations. None of the actions is regarded as material litigation, and none is expected to result in a significant adverse effect on the financial position of the group, either collectively or individually. Management believes that adequate provisions have been made in respect of such litigation.

45 Assets pledged as security for liabilities

Liabilities of the group amounting to HK\$64,772m (2009: HK\$52,888m) and of the Bank amounting to HK\$45,264m (2009: HK\$45,668m) are secured by the deposit of assets, including assets pledged in respect of sale and repurchase agreements, to cover short positions and to facilitate settlement processes with clearing houses. The amount of assets pledged by the group to secure these liabilities is HK\$73,002m (2009: HK\$57,126m) and by the Bank is HK\$54,890m (2009: HK\$39,915m). These assets comprise treasury bills, debt securities, equities, and deposits.

In respect of reverse repo and stock borrowing transactions, the fair value of collateral held by the group which was permitted to be sold or repledged amounted to HK\$151,012m (2009: HK\$124,922m), and by the Bank of HK\$101,438m (2009: HK\$106,365m). The fair value of such collateral actually sold or repledged by the group amounted to HK\$26,242m (2009: HK\$7,944m) and by the Bank of HK\$7,792m (2009: HK\$7,028m).

These transactions are conducted under terms that are usual and customary to standard lending, and stock borrowing and lending activities.

46 Capital commitments

	Gro	oup	Ba	nk
	2010 HK\$m	2009 HK\$m	2010 HK\$m	2009 HK\$m

contracted for	42	360	_	354
	1,053	4,534	913	2,154

The capital commitments mainly relate to the commitment to purchase premises and equipment.

47 Lease commitments

The group leases certain properties and equipment under operating leases. The leases normally run for a period of one to ten years and may include an option to renew. Lease payments are usually adjusted annually to reflect market rentals. None of the leases include contingent rentals. Future minimum lease payments under non-cancellable operating leases are as follows:

	G	roup	E	Bank

48 Segmental analysis

The group's operating segments are organised into two geographical regions, Hong Kong and Rest of Asia-Pacific. Due to the nature of the group, the chief operating decision-maker regularly reviews operating activity on a number of bases, including by geography, by customer group, and by retail businesses and global businesses. Although the chief operating decision-maker reviews information on a number of bases, capital resources are allocated and performance assessed primarily by geographical region and the segmental analysis is presented on that basis. In addition, the economic conditions of each geographical region are highly influential in determining performance across the different types of business activity carried out in the region. Therefore, provision of segment performance on a geographical basis provides the most meaningful information with which to understand the performance of the business.

Geographical information is classified by the location of the principal operations of the subsidiary or, in the case of the Bank, by the location of the branch responsible for reporting the results or advancing the funds.

Information provided to the chief operating decision-maker of the group to make decisions about allocating resources and assessing performance of operating segments is measured in accordance with HKFRSs. Due to the nature of the group's structure, the analysis of profits shown below includes intra-segment items between geographical regions with the elimination shown in a separate column. Such transactions are conducted on an arm's length basis. Shared costs are included in segments on the basis of actual recharges made.

Products and services

The group provides a comprehensive range of banking and related financial services to its customers in its two geographical regions. The products and services offered to customers are organised by customer groups and global businesses:

- Personal Financial Services offers a broad range of products and services to meet the personal banking, consumer lending and wealth management needs of individual customers. Personal banking products typically include current and savings accounts, mortgages and personal loans, credit cards, insurance, wealth management and local and international payment services;
- Commercial Banking product offerings include the provision of financial services, payments and cash management, international trade finance, treasury and capital markets, commercial cards, insurance, wealth management and investment banking services;
- Global Banking & Markets provides tailored financial solutions to major government, corporate and institutional
 clients worldwide. The client-focused business lines deliver a full range of banking capabilities including
 investment banking and financing solutions; a markets business that provides services in credit, rates, foreign
 exchange, money markets and securities services; global asset management services and principal investment
 activities; and
- Private Banking provides a range of services to meet the banking, investment and wealth advisory needs of high net worth individuals.

² Net external operating income is attributable to countries based on the location of the principal operations of the subsidiary or branch.

³ Non-current assets consist of property, plant and equipment, goodwill, other intangible assets, interests in associates and joint ventures and certain other assets expected to be recovered more than 12 months after the reporting date.

49 Related-party transactions

a Immediate and ultimate holding company

The group is controlled by HSBC Asia Holdings BV (incorporated in the Netherlands) which owns 100% of the ordinary shares. The ultimate parent of the group is HSBC Holdings plc (incorporated in England).

The group's related parties include the parent, fellow subsidiaries, associates, joint ventures, post-employment benefit plans for the benefit of the group's employees, key management personnel, close family members of key management personnel and entities which are controlled, jointly controlled or significantly influenced by key management personnel or their close family members.

Transactions with the immediate holding company included the payment of interest on preference shares. As at 31 December 2010, the Bank has issued HK\$101,306m of preference shares to its immediate holding company (2009: HK\$101,063m). These are classified as liabilities on the balance sheet.

Transactions with the ultimate holding company included the issuance of subordinated liabilities and the payment of interest on subordinated liabilities. As at 31 December 2010, the Bank has issued HK\$6,106m of subordinated liabilities to its ultimate holding company (2009: HK\$2,101m). These are classified as liabilities on the balance sheet.

Guarantees made by the ultimate holding company to and on behalf of the group amounted to HK\$353m (2009: HK\$5,646m).

² Amounts due to the immediate holding company included preference shares of HK\$101,306m (2009: HK\$101,063m). Amounts due to the ultimate holding company included subordinated liabilities of HK\$6,106m (2009: HK\$2,101m).

49 Related-party transactions (continued)

Share option and share award schemes

The group participates in various share option and share plans operated by HSBC Holdings plc whereby share options or shares of HSBC Holdings plc are granted to employees of the group. As disclosed in note 50, the group recognises an expense in respect of these share options and share awards. The cost borne by the ultimate holding company in respect of these share options and share awards is treated as a capital contribution and is recorded under 'Other reserves'. The group recognises a liability due to the ultimate holding company and a corresponding reduction in capital contribution on a straight-line basis over the vesting period for the amount of shares expected to vest. The liability is measured at the fair value of the shares at each reporting date. The balances of the capital contribution and the liability as at 31 December 2010 amounted to HK\$2,223m and HK\$1,812m respectively (2009: HK\$2,006m and HK\$1,199m respectively).

b Subsidiaries and fellow subsidiaries

The group entered into transactions with its fellow subsidiaries in the normal course of business, including the acceptance and placement of interbank deposits, correspondent banking transactions and off-balance sheet transactions. The activities were on substantially the same terms, including interest rates and security, as for comparable transactions with third party counterparties.

The group shared certain IT projects with its fellow subsidiaries and also used certain processing services of fellow subsidiaries on a cost recovery basis. The Bank also acted as agent for the distribution of retail investment funds for fellow subsidiaries and paid professional service fees on certain structured finance deals to a fellow subsidiary. The commissions and fees in these transactions are priced on an 'arm's length' basis.

The aggregate amount of income and expenses arising from these transactions during the year and the balances of amounts due to and from the relevant parties at the year end are as follows:

Fellow subsidiaries

c Associates and joint ventures

Information relating to associates and joint venture can be found in note 24 where the following are disclosed:

- interests in associates and joint ventures;
- amounts due from/to associates and joint ventures; and
- principal associates.

The group has entered into Technical Support and Assistance Agreements with Bank of Communications ('BoCom'), Industrial Bank, Vietnam Technological and Commercial Joint Stock Bank, Bao Viet Holdings, Hana HSBC Life Insurance and Canara HSBC Oriental Bank of Commerce Life Insurance to provide technical support and assistance in relation to their banking and insurance business.

The transactions resulting in amounts to and from associates and joint ventures arose in the ordinary course of business and on substantially the same terms, including interest rates and security, as for comparable transactions with third party counterparties.

d Key management personnel

Key management personnel are defined as those persons having authority and responsibility for planning, directing and controlling the activities of The Hongkong and Shanghai Banking Corporation Ltd and the group. It includes members of the Board of Directors and Executive Committee of The Hongkong and Shanghai Banking Corporation Ltd and the Board of Directors and Group Managing Directors of HSBC Holdings plc.

The following table shows the expense in respect of compensation for key management personnel of the Bank for services rendered to the Bank:

	2010 HK\$m	2009 HK\$m
Salaries and other short term benefits	207	187
Retirement benefits		
- Defined contribution plans	12	10
- Defined benefit plans	1	2
Share-based payments	118	79
	338	278

49 Related-party transactions (continued)

Transactions, arrangements and agreements involving key management personnel

Transactions, arrangements and agreements are entered into by the group with companies that may be directly or indirectly influenced or controlled by certain directors of the group and their immediate relatives. These transactions are primarily loans and deposits, the average balances of which during the year were:

	2010	2009
	HK\$m	HK\$m
Average assets	17,282	24,043
Average liabilities	24,206	17,893

The aggregate contribution to the group's profit before tax from such transactions in 2010 was HK\$439m (2009: HK\$460m). As at the balance sheet date, guarantees made on behalf of such companies were HK\$2,487m (2009: HK\$1,224m).

The above transactions were entered into in the ordinary course of business and on substantially the same terms, including interest rates and security, as comparable transactions with persons or companies of a similar standing or, where applicable, with other employees. The transactions did not involve more than the normal risk of repayment or present other unfavourable features.

The group adheres to Hong Kong Banking Ordinance Section 83 regarding lending to related parties; this includes unsecured lending to key management personnel, their relatives and companies that may be directly or indirectly influenced or controlled by such individuals.

No impairment losses have been recorded against balances outstanding during the year with key management personnel, and there are no specific impairment allowances on balances with key management personnel at the year end.

Loans to officers

Officers are defined as the Board of Directors, Executive Committee members and the Secretary of The Hongkong and Shanghai Banking Corporation Ltd and the Boards of Directors of the ultimate holding company, HSBC Holdings plc, and intermediate holding companies.

Particulars of loans to officers disclosed pursuant to section 161B of the Hong Kong Companies Ordinance:

e Pension funds

At 31 December 2010, HK\$13.4bn (2009: HK\$11.8bn) of pension fund assets were under management by group companies. Total fees paid or payable by pension plans to group companies for providing fund management, administrative and trustee services amounted to HK\$49m for the year (2009: HK\$42m).

50 Share-based payments

During 2010, HK\$1,427m was charged to the income statement in respect of share-based payment transactions settled in equity (2009: HK\$1,105m). This expense, which was computed from the fair values of the share-based payment transactions when contracted, arose under employee share awards made in accordance with the HSBC Group's reward structures.

In April 2009, HSBC Holdings completed a rights issue. The terms of the share plans have been adjusted based on the theoretical ex-rights price, which was considered to be the most appropriate methodology to reflect the rights issue. These adjustments are set out in the tables below.

50 Share-based payments (continued)

Calculation of fair value

The fair value of services received in return for shares awarded is measured by reference to the fair value of the shares.

Fair values of share option awards, measured at the date of grant of the option award, are calculated using a binomial lattice model methodology that is based on the underlying assumptions of the Black-Scholes model. When modelling options with vesting dependent on HSBC's Total Shareholder Return over a period, these performance targets are incorporated into the model using Monte-Carlo simulation. Non-market conditions, such as HSBC Group meeting earnings per share targets, are not incorporated into the calculation of fair value at grant date but are reflected in the amount of compensation expense accrued over the vesting period.

The expected life of options depends on the behaviour of option holders, which is incorporated into the option model consistent with historic observable data. The fair value calculated is inherently subjective and uncertain due to the assumptions made and the limitations of the model used. Expected dividends are incorporated into the valuation model for share options and awards where applicable.

The significant weighted average assumptions used to estimate the fair value of the options granted during the year were as follows:

	1-year Savings- Related Share Option Schemes	3-year Savings- Related Share Option Schemes	5-year Savings- Related Share Option Schemes
2010			
Risk-free interest rate ¹ (%)	0.7	1.9	2.9
Expected life ² (years)	1	3	5
Expected volatility ³ (%)	30	30	30
Share price at grant date (£)	6.82	6.82	6.82
2009			
Risk-free interest rate ¹ (%)	0.7	2.1	2.4
Expected life ² (years)	1	3	5
Expected volatility ³ (%)	50	35	30
Share price at grant date (£)	4.65	4.65	4.65

- 1 The risk-free rate was determined from the UK gilts yield curve.
- 2 Expected life is not a single input parameter but a function of various behavioural assumptions.
- 3 Expected volatility is estimated by considering both historical average share price volatility and implied volatility derived from traded options over HSBC shares of similar maturity to those of the employee options.

Share Option Schemes

The share option schemes include The HSBC Holdings Executive Share Option Scheme, Group Share Option Plan, and Savings-Related Share Option Plans.

a Executive Share Option Scheme and Group Share Option Plan

The Executive Share Option Scheme ('ESOS') and Group Share Option Plan ('GSOP') were long-term incentive schemes under which certain HSBC employees were awarded share options between 1993 and 2005. The aim of the plan was to align the interests of those employees assessed as higher-performing to the creation of shareholder value. This was achieved by setting certain Total Shareholder Return targets which must normally be attained in order for the awards to vest.

The ESOS ran from October 1993 until April 2000, after which it was replaced by the GSOP due to a change in UK legislation. In broad terms, the ESOS and GSOP were similar, in that:

- options were granted as part of the annual review process in recognition of past performance and future potential; and
- the options were normally exercisable between the third and tenth anniversaries of the date of grant, subject to vesting conditions.

50 Share-based payments (continued)

The number of options, weighted average exercise price, and the weighted average remaining contractual life for options outstanding at the balance sheet date, are as follows:

The options outstanding at the year end had an exercise price in the range of £6.02 to £7.96 (2009: £6.02 to £7.96), and a weighted average remaining contractual life of 2.15 years (2009: 2.94 years).

The weighted average share price during the year was £6.65 (2009: £5.86). No awards have been made under this plan since 2005. This plan was effectively superseded by the HSBC Share Plan.

b Savings-Related Share Option Schemes

The Savings-Related Share Option Schemes, which represent equity settled share based payment arrangements, invite eligible employees to enter into savings contracts to save up to £250 per month, with the option to use the savings to acquire shares. The aim of the plans is to align the interests of all employees with the creation of shareholder value.

The options are generally exercisable within three months following the first anniversary of the commencement of a one-year savings contract or within six months following either the third or the fifth anniversary of the commencement of three-year or five-year savings contracts, respectively. The exercise price is set at a 20% (2009: 20%) discount to the market value immediately preceding the date of invitation, save for the US sub plan one year savings contract where the discount to market value is 15% (2009: 15%).

The number of options, weighted average exercise price, and the weighted average remaining contractual life for options outstanding at the balance sheet date, are as follows:

The options outstanding at the year end had an exercise price in the range of HK\$37.88 to HK\$94.51 (2009: HK\$37.88 to HK\$94.51), and a weighted average remaining contractual life of 2.89 years (2009: 3.67 years).

The weighted average share price at the date of exercise for share options exercised during the year was HK\$79.38 (2009: HK\$88.33).

The weighted average fair value of options granted during the year was HK\$19.02 (2009: HK\$15.65).

During the year, options granted for schemes with option prices set in euros and US dollars were insignificant.

HSBC Share Plan

The HSBC Share Plan was adopted by HSBC in 2005. Under this plan, Performance Share awards, Restricted Share awards and Achievement Share awards may be made. The aim of the share plan is to align the interests of executives to the creation of shareholder value and recognise individual performance and potential. Awards are also made under this plan for recruitment and retention purposes.

50 Share-based payments (continued)

c Performance Share Awards

Performance Shares are awarded to executive Directors and other senior executives after taking into account individual performance in the previous year. For awards made prior to 2008, each award is divided into two equal parts for testing attainment against pre-determined benchmarks. One half of the award is subject to a Total Shareholder Return ('TSR') measure, based on HSBC's ranking against a comparator group of major banks; the other half is subject to an earnings per share target. For each element of the award, shares are released to the employee on a sliding scale from 30 to 100% of the award, depending on the scale of achievement against the benchmarks, providing that the minimum criteria for each performance measure has been met.

For awards made during 2008 and prospectively, each award is divided into three parts for testing attainment against pre-determined benchmarks. 40% of the award is subject to a TSR measure, based on HSBC's ranking against a comparator group of major banks; 40% is subject to an economic profit measure, calculated as the average annual difference between return on invested capital and HSBC's benchmark cost of capital; and 20% is subject to an earnings per share target. For the TSR and EPS elements of the awards, shares are released to the employee on a sliding scale from 20 to 100% of the award, depending on the scale of achievement against the benchmarks. For the economic profit element of the awards, shares are released to the employee on a sliding scale from zero to 100%, depending on the scale of achievement against the benchmark. In all cases, shares are only released when the minimum criteria for each performance measure has been met. The performance conditions are measured over a three year performance period and awards forfeited to the extent they have not been met.

In addition to the performance conditions mentioned above, before an award can vest, the Remuneration Committee needs to be satisfied that the HSBC Group has shown a sustained improvement in the period since the award was made. In determining whether HSBC Holdings has achieved such sustained improvement the Remuneration Committee will take account of all relevant factors, in particular, comparisons against the TSR comparator group in areas such as revenue growth and mix, cost efficiency, credit performance as measured by risk-adjusted revenues, cash return on cash invested, dividend performance and TSR.

The weighted average remaining vesting period was 0.23 years (2009: 0.70 years).

No shares were granted in 2010. Additions during the year comprised reinvested scrip dividends.

50 Share-based payments (continued)

d Restricted Share Awards

Restricted share awards are made to eligible employees for recruitment purposes or as part of deferral of annual bonus. The awards vest over a period of up to three years from the date of the award.

	Gro	oup	Bank		
	2010 2009		2010	2009	
	Number	Number	Number	Number	
	(000s)	(000s)	(000s)	(000s)

Adjustment for rights issue	_	2,877	_	2,499	
Outstanding at 31 December	38,476	21,759	30,752	19,426	

The weighted average remaining vesting period as at year end was 1.30 years (2009: 1.82 years). The closing price of HSBC Holdings shares on 31 December 2010 was £6.51 (31 December 2009: £7.09).

e Achievement Share Awards

Achievement shares, a type of Restricted Share Award, were launched in 2005 and were utilised to promote widespread interest in HSBC shares amongst employees and are awarded to eligible employees after taking into account the employee's performance in the prior year. High-performing and/or high-potential senior and middle managers are normally eligible to receive achievement shares as part of the annual pay review process. Shares are awarded without corporate performance conditions and are released to employees after three years provided the employees have remained employed by the HSBC Group for this period.

Additional awards are made during the 3-year vesting period. At the end of three years, the original award together with the additional share awards will be released.

51 Fair value of financial instruments

Fair value is the amount for which an asset could be exchanged, or a liability settled, between knowledgeable, willing parties in an arm's length transaction.

Financial instruments measured at fair value on an ongoing basis include trading assets and liabilities, instruments designated at fair value through profit or loss, derivatives, and financial instruments classified as available-for-sale (including treasury and other eligible bills, debt securities and equity securities).

51 Fair value of financial instruments (continued)

Control framework

Fair values are subject to a control framework that aims to ensure that they are either determined, or validated, by a function independent of the risk taker. To this end, ultimate responsibility for the determination of fair values lies within the Finance function, which reports functionally to the group Chief Financial Officer. Finance establishes the accounting policies and procedures governing valuation, and is responsible for ensuring that these comply with all relevant accounting standards.

For fair values determined using a valuation model, the control framework may include, as applicable, independent development or validation of valuation models, independent determination or validation of valuation model inputs, independent determination or validation of any adjustments required outside of the valuation model, and, where possible, independent validation of model outputs. For fair values determined without a valuation model, there is independent price determination or validation. The results of independent validation processes are reported to senior management, and adjustments to the fair values made as appropriate.

Determination of fair value of financial instruments carried at fair value

Fair values are determined according to the following hierarchy:

(a) Quoted market price – Level 1

Financial instruments with quoted prices for identical instruments in active markets.

(b) Valuation technique using observable inputs – Level 2

Financial instruments with quoted prices for similar instruments in active markets or quoted prices for identical or similar instruments in inactive markets and financial instruments valued using models where all significant inputs are observable.

(c) Valuation technique with significant non-observable inputs – Level 3

Financial instruments valued using models where one or more significant inputs are not observable.

The best evidence of fair value is a quoted price in an actively traded market. In the event that the market for a financial instrument is not active, a valuation technique is used. The majority of valuation techniques employ only observable market data, and so the reliability of the fair value measurement is high. However, certain financial instruments are valued on the basis of valuation techniques that feature one or more significant market inputs that are not observable. For these instruments, the fair value measurement derived is more judgemental. 'Not observable' in this context means that there is little or no current market data available from which to determine the level at which an arm's length transaction would likely occur, but it generally does not mean that there is absolutely no market data available upon which to base a determination of fair value (historical data may, for example, be used). Furthermore, the assessment of hierarchy level is based on the lowest level of input that is significant to the fair value of the financial instrument. Consequently, the level of uncertainty in the determination of the unobservable inputs will generally give rise to valuation uncertainty that is less than the fair value itself.

In certain circumstances, the group applies the fair value option to own debt in issue. Where available, the fair value will be based upon quoted prices in an active market for the specific instrument concerned. Where not available, the fair value will either be based upon quoted prices in an inactive market for the specific instrument concerned, or estimated by comparison with quoted prices in an active market for similar instruments. The fair value of these instruments therefore includes the effect of own credit spread. Gains and losses arising from changes in the credit spread of liabilities issued by the group reverse over the contractual life of the debt.

Issued structured notes and certain other hybrid instrument liabilities are included within trading liabilities, and marked at fair value. The credit spread applied to these instruments is derived from the spreads at which the group issues structured notes. Gains and losses arising from changes in the credit spread of liabilities issued by the group reverse over the contractual life of the debt, provided that the debt is not repaid at a premium or a discount.

51 Fair value of financial instruments (continued)

All net positions in non-derivative financial instruments, and all derivative portfolios, are valued at bid or offer price as appropriate. Long positions are marked at bid price; short positions are marked at offer price.

The fair values of large holdings of non-derivative financial instruments are based on a multiple of the value of a single instrument, and do not include block adjustments for the size of the holding.

The valuation models used where quoted market prices are not available incorporate certain assumptions that the group anticipates would be used by a market participant to establish fair value. Where the group anticipates that there are additional considerations not included within the valuation model, adjustments may be adopted outside the model.

Examples of such adjustments are:

- Credit risk adjustment: an adjustment to reflect the credit worthiness of over-the-counter derivative counterparties.
- Market data/model uncertainty: an adjustment to reflect uncertainties in fair values based on uncertain market data inputs (e.g. as a result of illiquidity) or in areas where the choice of valuation model is particularly subjective.
- Inception profit ('day 1 P&L reserves'): for financial instruments valued, at inception, on the basis of one or more significant unobservable inputs, the difference between transaction price and model value (as adjusted) at inception is not recognised in the consolidated income statement, but is deferred and included as part of the fair value.

Transaction costs are not included in the fair value calculation. Trade origination costs such as brokerage, fee expense, and post-trade costs are included in operating expenses. The future cost of administering the over-the-counter derivative portfolio is also not included in fair value, but is expensed as incurred.

The approach used to calculate the fair value of each type of financial instrument is as follows:

Loans

Loans are valued from broker quotes and/or market data consensus providers where available. Where unavailable, fair value will be determined based on an appropriate credit spread derived from other market instruments issued by the same or comparable entities.

Debt securities, Treasury and eligible bills, and Equities

These instruments are valued based on quoted market prices from an exchange, dealer, broker, industry group or pricing service, where available. Where unavailable, fair value is determined by reference to quoted market prices for similar instruments or, in the case of certain mortgage-backed securities and unquoted equities, valuation techniques using inputs determined from observable and unobservable market data.

Derivatives

Over-the-counter (i.e. non-exchange traded) derivatives are valued using valuation models. Valuation models calculate the present value of expected future cash flows, based upon 'no-arbitrage' principles. For many vanilla derivative products, such as interest rate swaps and European options, the modelling approaches used are standard across the industry. For more complex derivative products, there may be some discrepancy in practice. Inputs to valuation models are determined from observable market data wherever possible, including prices available from exchanges, dealers, brokers or providers of consensus pricing. Certain inputs may not be observable in the market directly, but can be determined from observable prices via model calibration procedures. Finally, some inputs are not observable, but can generally be estimated from historic data or other sources. Examples of inputs that are generally observable include foreign exchange spot and forward rates, benchmark interest rate curves and volatility surfaces for commonly traded option products. Examples of inputs that may be unobservable include volatility surfaces, in whole or in part, for less commonly traded option products, and correlations between market factors.

51 Fair value of financial instruments (continued)

Analysis of fair value determination

The following table provides an analysis of the basis for the valuation of financial assets and financial liabilities measured at fair value in the consolidated financial statements:

² The amount has been reported on a net basis, after taking into consideration the total gains or losses arising from those transactions where the risk has been backed out to other HSBC entities.

51 Fair value of financial instruments (continued)

For available-for sale securities, the unobservability of valuations of certain equity shares resulted in these assets being transferred into level 3 during the year. Transfers out of level 3 occurred in respect of certain debt securities as valuations in these assets becoming observable during the year.

For held-for-trading assets, the unobservability of valuations of certain debt securities resulted in these assets being transferred into level 3 during the year. Transfers out of level 3 also occurred in respect of certain debt securities as valuations in these assets became observable during the year.

For assets designated at fair value through profit or loss, the observability of valuations of certain debt securities and the deconsolidation of The HSBC Private Equity Fund 3 resulted in certain assets being transferred out of level 3 during the year. Transferred into level 3 resulted from the valuations of certain debt securities becoming unobservable during the year.

For derivative assets and liabilities, an increase in the observability of equity volatilities and correlations during the year resulted in transfers out of level 3. In addition, the unobservability of specific asset prices underlying derivative structures resulted in derivative liabilities being transferred into level 3.

For held-for-trading liabilities, transfers into level 3 were primarily due to a reduction in the observability of volatilities and gap risk parameters. Transfers out of level 3 resulted from an increase in the observability of equity correlation.

For assets and liabilities classified as held for trading, realised and unrealised gains and losses are presented in the income statement under 'Net trading income'.

Fair value changes on assets and liabilities designated at fair value are presented in the income statement under 'Net income/(loss) from financial instruments designated at fair value'.

Realised gains and losses from available-for-sale securities are presented under 'Gains less losses from financial investments' in the income statement while unrealised gains and losses are presented in 'Fair value changes taken to equity' within 'Available-for-sale investments' in other comprehensive income.

Effects of changes in significant non-observable assumptions to reasonably possible alternatives:

As discussed above, the fair value of financial instruments are, in certain circumstances, measured using valuation models that incorporate assumptions that are not supported by prices from observable current market transactions in the same instrument and are not based on observable market data. The following table shows the sensitivity of fair values to reasonably possible alternative assumptions.

Changes in fair value recorded in the income statement

The following table details changes in fair values recognised in the income statement during the period, where the fair value is estimated using valuation techniques that incorporate significant assumptions that are not supported by prices from observable current market transactions in the same instrument, and are not based on observable market data:

- the table details the total change in fair value of these instruments; it does not isolate that component of the change that is attributable to the non-observable component;
- instruments valued with significant non-observable inputs are frequently dynamically hedged with instruments valued using observable inputs; the table does not include any changes in fair value of these hedges; and
- there were significant assets and liabilities valued using observable inputs at 31 December 2009 that became
 valued with significant unobservable inputs during 2010; the table reflects the full change in fair value of those
 instruments during 2010, not just that element arising following the category change.

51 Fair value of financial instruments (continued)

Fair value of financial instruments not carried at fair value

The fair values of financial instruments that are not recognised at fair value on the balance sheet are calculated as described below.

The calculation of fair value incorporates the group's estimate of the amount at which financial assets could be exchanged, or financial liabilities settled, between knowledgeable, willing parties in an arm's length transaction. It does not reflect the economic benefits and costs that the group expects to flow from the instruments' cash flows over their expected future lives. Other reporting entities may use different valuation methodologies and assumptions in determining fair values for which no observable market prices are available, so comparisons of fair values between entities may not be meaningful and users are advised to exercise caution when using this data.

The following types of financial instruments are measured at amortised cost unless they are held for trading or designated at fair value through profit or loss. Where assets or liabilities are hedged by derivatives designated and qualifying as fair value hedges, the carrying value of the assets or liabilities so hedged includes a fair value adjustment for the hedged risk only. Fair values at the balance sheet date of the assets and liabilities set out below are estimated for the purpose of disclosure as follows:

Advances to customers

The fair value of advances to customers is estimated using discounted cash flow models using an estimate of the discount rate that a market participant would use in valuing instruments with similar maturity, repricing and credit risk characteristics.

The fair value of a loan portfolio reflects both loan impairments at the balance sheet date and estimates of market participants' expectations of credit losses over the life of the loans.

Financial investments

The fair values of listed financial investments are determined using bid market prices. The fair values of unlisted financial investments are determined using valuation techniques that take into consideration either the prices of, or future earning streams of, equivalent quoted securities.

Deposits and customer accounts

The fair value of deposits and customer accounts is estimated using discounted cash flows, applying current rates offered for deposits of similar remaining maturities. The fair value of deposits repayable on demand is assumed to be the amount payable on demand at the balance sheet date.

Debt securities in issue and subordinated liabilities

The fair value of debt securities in issue and subordinated liabilities is based on quoted market prices for the same or similar instruments at the balance sheet date.

The fair values in this note are stated at a specific date and may be significantly different from the amounts that will actually be paid on the maturity or settlement dates of the instruments. In many cases, it would not be possible to realise immediately the estimated fair values given the size of the portfolios measured. Accordingly, these fair values do not represent the value of these financial instruments to the group as a going concern.

For all classes of financial instruments, fair value represents the product of the value of a single instrument, multiplied by the number of instruments held. No block discount or premium adjustments are made.

The fair values of intangible assets, such as values placed on portfolios of core deposits, credit card and customer relationships, are not included above because they are not financial instruments.

51 Fair value of financial instruments (continued)

The following table lists those financial instruments for which their carrying amounts are a reasonable approximation of fair values because, for example, they are short term in nature or reprice to current market rates frequently:

Assets

Cash and balances at central banks
Items in the course of collection from other banks
Endorsements and acceptances
Short-term receivables within 'Other assets'
Accrued income

Liabilities

Items in the course of transmission to other banks Endorsements and acceptances Short-term payables within 'Other liabilities' Accruals

The following table provides an analysis of the fair value of financial instruments not measured at fair value in the balance sheet. For all other instruments the fair value is equal to the carrying value:

52 Risk Management

The group's activities involve the analysis, evaluation, acceptance and management of financial risks. The principal financial risks are:

- · credit risk;
- liquidity risk;
- market risk (including foreign exchange, interest rate and equity price risks);
- operational risk;
- · insurance risk; and
- · capital management

The HSBC Group Head Office formulates high-level risk management policies for the HSBC Group worldwide. The group's risk management policies and procedures are subject to a high degree of oversight and guidance to ensure that all types of risk are systematically identified, measured, analysed and actively managed. In addition, internal audit is responsible for the independent review of risk management and the control environment.

a Credit risk

Credit risk is the risk of financial loss if a customer or counterparty fails to meet an obligation under a contract. It arises principally from lending, trade finance, treasury and leasing business, but also from off-balance sheet products such as guarantees and credit derivatives, and from the group's holding of debt securities. The group has standards, policies and procedures dedicated to controlling and monitoring risk from all such activities. The group's principal credit risk management procedures and policies, which follow policies established by HSBC Group Head Office, include the following:

- Formulating credit policies and documenting these in detail in dedicated manuals.
- Establishing and maintaining the group's large credit exposure policy. This policy delineates the group's maximum exposures to individual customers, customer groups and other risk concentrations.
- Establishing and complying with lending guidelines on the group's attitude towards, and appetite for, lending to specified market sectors and industries.
- Undertaking an objective assessment of risk. All commercial non-bank credit facilities originated by the group in excess of designated limits are subject to review prior to the facilities being committed to customers.
- Controlling exposures to banks and other financial institutions. The group's credit and settlement risk limits to
 counterparties in the finance and government sectors are designed to optimise the use of credit availability and
 avoid excessive risk concentration.
- Managing exposures to debt securities by establishing controls in respect of the liquidity of securities held for trading and setting issuer limits for financial investments. Separate portfolio limits are established for assetbacked securities and similar instruments.
- Controlling cross-border exposures to manage country and cross-border risk through the imposition of country limits with sub-limits by maturity and type of business.
- Controlling exposures to selected industries. When necessary, restrictions are imposed on new business, or exposures in the group's operating entities are capped.
- Maintaining and developing risk ratings in order to categorise exposures meaningfully and facilitate focused management of the attendant risks. Rating methodology is based upon a wide range of financial analytics together with market data-based tools which are core inputs to the assessment of counterparty risk. Although automated risk-rating processes are increasingly used for the larger facilities, ultimate responsibility for setting risk grades rests in each case with the final approving executive. Risk grades are reviewed frequently and amendments, where necessary, are implemented promptly.

52 Risk Management (continued)

Both the HSBC Group Head Office and the group's Risk Management Committee ('RMC') receive regular reports on credit exposures. These include information on large credit exposures, concentrations, industry exposures, levels of impairment provisioning and country exposures.

RMC has the responsibility for risk approval authorities and approving definitive risk policies and controls. It monitors risk inherent to the financial services business, receives reports, determines action to be taken and reviews the efficacy of the risk management framework.

EXCO and RMC are supported by a dedicated group risk function headed by the Chief Risk Officer, who is a member of both EXCO and RMC and reports to the Chief Executive.

The Audit Committee ('AC') also has responsibility for oversight and advice to the Board on risk matters. The key responsibilities of the AC in this regard include preparing advice to the Board on the overall risk appetite tolerance and strategy within the group and seeking such assurance as it may deem appropriate that account has been taken of the current and prospective macroeconomic and financial environment. The AC is also responsible for the periodic review of the effectiveness of the internal control and risk management frameworks and advising the Board on all high level risk matters. The AC approves the appointment and removal of the group Chief Risk Officer.

Credit quality

The group's credit risk rating system differentiates exposures in order to highlight those with greater risk factors and higher potential severity of loss.

The group's credit rating system is based on a sophisticated and granular methodology, using probability of default and loss estimates, which is compliant with an internal ratings based ('IRB') approach required to support the Basel II framework for calculating the group's minimum capital requirement. The integration of this framework into the group's reporting structure enables reporting to internal management in accordance with the group's IRB obligations.

Collateral and other credit enhancements

Loans and advances

The group has guidelines on the acceptability of specific classes of collateral or credit risk mitigation, and the determination of valuation parameters. Such parameters are expected to be conservative, reviewed regularly and supported by empirical evidence. The principal collateral types are as follows:

- in the personal sector, mortgages over residential properties;
- in the commercial and industrial sector, charges over business assets such as premises, stock and debtors;
- in the commercial real estate sector, charges over the properties being financed; and
- in the financial sector, charges over financial instruments such as debt securities and equities in support of trading facilities.

The group obtained assets by taking possession of collateral held as security, or calling other credit enhancements.

The carrying amount outstanding as at the year end was as follows:

	G1	roup	Bank

Repossessed assets are non-financial assets acquired in exchange for loans in order to achieve an orderly realisation, and are reported in the balance sheet within 'Other assets' at the lower of fair value (less costs to sell) and the carrying amount of the loan (net of any impairment allowance). If excess funds arise after the debt has been repaid, they are made available either to repay other secured lenders with lower priority or are returned to the customer. The group does not generally occupy repossessed properties for its own business use.

Other financial assets

Collateral held as security for financial assets other than loans and advances is determined by the nature of the instrument. Debt securities, treasury and other eligible bills are generally unsecured with the exception of asset-backed securities and similar instruments, which are secured by pools of financial assets.

The ISDA Master Agreement is the group's preferred agreement for documenting derivatives activity. It provides the contractual framework within which dealing activity across a full range of over-the-counter ('OTC') products is conducted and contractually binds both parties to apply close-out netting across all outstanding transactions covered by an agreement, if either party defaults or other pre-agreed termination events occur. It is also common, and the group's preferred practice, for the parties to execute a Credit Support Annex ('CSA') in conjunction with the ISDA Master Agreement. Under a CSA, collateral is passed between the parties to mitigate the market contingent counterparty risk inherent in the outstanding positions.

Daily Settlement Limits are established for each counterparty, to cover the aggregate of all settlement risk arising from the group's investment banking and markets transactions on any single day. Settlement risk on many transactions, particularly those involving securities and equities, is substantially mitigated when effected via Assured Payment Systems, or on a delivery versus payment basis.

Note 18(b) shows the analysis of advances to customers by industry sector and by geographical region.

Credit quality of financial instruments

Four broad classifications describe the credit quality of the group's lending and debt securities portfolios. These classifications each encompass a range of more granular, internal credit rating grades assigned to wholesale and retail lending business, as well as the external ratings attributed by external agencies to debt securities.

There is no direct correlation between the internal and external ratings at the granular level, except insofar as both fall within one of the four classifications.

Quality Classification	Wholesale lending and Derivatives	Retail lending	Debt securities/other
Strong	CRR 1 to CRR 2	EL 1 to EL 2	A– and above
Medium	CRR 3 to CRR 5	EL 3 to EL 5	B+ to BBB+, and unrated
Sub-standard	CRR 6 to CRR 8	EL 6 to EL 8	B and below
Impaired	CRR 9 to CRR 10	EL 9 to EL 10	Impaired

Quality classification definitions

- Strong: Exposures demonstrate a strong capacity to meet financial commitments, with negligible or low
 probability of default and/or low levels of expected loss. Retail accounts operate within product parameters and
 only exceptionally show any period of delinquency.
- Medium: Exposures require closer monitoring, with low to moderate default risk. Retail accounts typically show only short periods of delinquency, with losses expected to be minimal following the adoption of recovery processes.
- Sub-standard: Exposures require varying degrees of special attention and default risk of greater concern. Retail portfolio segments show longer delinquency periods of generally up to 90 days past due and/or expected losses are higher due to a reduced ability to mitigate these through security realisation or other recovery processes.
- Impaired: Exposures have been assessed, individually or collectively, as impaired. The group observes the disclosure convention, reflected in the quality classification definitions above, that all retail accounts delinquent by 90 days or more are considered impaired. Such accounts may occur in any retail EL ('Expected Loss') grade, whereby in the higher quality grades the grading assignment will reflect the offsetting of the impact of delinquency status by credit risk mitigation in one form or another.

The group's policy in respect of impairment on loans and advances and debt securities is set out in notes 3(d) and 3(g) on the Financial Statements. Analysis of impairment allowances as at 31 December 2010 and the movement of such allowances during the year are disclosed in note 19.

Granular risk rating scales

The CRR ('Customer Risk Rating') 10-grade scale maps to a more granular underlying 23-grade scale of obligor probability of default. These scales are used Group-wide for all individually significant customers, depending on which Basel II approach is adopted for the assets in question. The EL 10-grade scale for retail business summarises a more granular 29-grade scale combining obligor and facility/product risk factors in a composite measure, used Group-wide. The external ratings cited above have for clarity of reporting been assigned to the quality classifications defined for internally-rated exposures.

The basis of reporting reflects risk rating systems under the HSBC Group's Basel II programme and to extend the range of financial instruments covered in the presentation of portfolio quality.

Impairment is not measured for financial instruments held in trading portfolios or designated at fair value, as assets in such portfolios are managed according to movements in fair value, and the fair value movement is taken directly through the income statement.

Financial instruments which were past due but not impaired ageing analysis

The amounts in the following table reflect exposures designated as past due but not impaired. Examples of exposures designated past due but not impaired include loans that have missed the most recent payment date but on which there is no evidence of impairment; short-term trade facilities past due more than 90 days for technical reasons such as delays in documentation, but where there is no concern over the creditworthiness of the counterparty.

¹ The majority of the loans and advances to customers that are operating within revised terms following restructuring are excluded from this table.

Impaired loans and advances

The group's policy for recognising and measuring impairment allowances on both individually assessed advances and those which are collectively assessed on a portfolio basis is described in note 3(d).

Analyses of impairment allowances at 31 December 2010 and the movement of such allowances during the year are disclosed in note 19.

b Liquidity risk

Liquidity relates to the ability of a company to meet its obligations as they fall due. The group maintains a stable and diversified funding base of core retail and corporate customer deposits as well as portfolios of highly liquid assets. The objective of the group's liquidity and funding management is to ensure that all foreseeable funding commitments and deposit withdrawals can be met when due.

Liquidity risk is the risk that we do not have sufficient financial resources to meet our obligations as they fall due, or will have to do so at an excessive cost. This risk arises from mismatches in the timing of cash flows. Funding risk (a form of liquidity risk) arises when the liquidity needed to fund illiquid asset positions cannot be obtained at the expected terms and when required.

The objective of our liquidity and funding management framework is to ensure that all foreseeable funding commitments can be met when due, and that access to the wholesale markets is co-ordinated and cost-effective. To this end, we maintain a diversified funding base comprising core retail and corporate customer deposits and institutional balances. We augment this with wholesale funding and portfolios of highly liquid assets diversified by currency and maturity which are held to enable us to respond quickly and smoothly to unforeseen liquidity requirements.

Operating entities are required to maintain strong liquidity positions and to manage the liquidity profiles of their assets, liabilities and commitments with the objective of ensuring that their cash flows are balanced appropriately and that all their anticipated obligations can be met when due.

We adapt our liquidity and funding risk management framework in response to changes in the mix of business that we undertake, and to changes in the nature of the markets in which we operate. We also seek to continuously evolve and strengthen our liquidity and funding risk management framework. As part of this on-going process, the Group has refined the way in which it characterises core deposits. The characterisation takes into account our activities and operating environment in the entity originating the deposit, the nature of the customer and the size and pricing of the deposit. This exercise has resulted in a revised internal calculation of advances to core funding ratio (discussed more fully below), and comparatives have been restated accordingly.

We employ a number of measures to monitor liquidity risk. The emphasis on the ratio of net liquid assets to customer deposits, as reported in the Annual Report and Accounts 2009, has been reduced and a "stressed one month coverage ratio", an extension of our projected cash flow scenario analysis, is now used by the group as a simple and more useful metric to express liquidity risk.

It is the responsibility of local management to ensure compliance with local regulatory requirements and limits set by the HSBC Group/regional head office. Liquidity is managed on a daily basis by local treasury functions, with the larger treasury sites providing support to smaller entities where required.

52 Risk Management (continued)

Compliance with liquidity and funding requirements is monitored by local Asset and Liability Management Committees ('ALCO') which report to the group's Head Office on a regular basis. This process includes:

- projecting cash flows under various stress scenarios and considering the level of liquid assets necessary in relation thereto;
- monitoring balance sheet liquidity and advances to core funding ratios against internal and regulatory requirements;
- maintaining a diverse range of funding sources with adequate back-up facilities;
- managing the concentration and profile of debt maturities;
- managing contingent liquidity commitment exposures within pre-determined limits;
- maintaining debt financing plans;
- monitoring of depositor concentration in order to avoid undue reliance on large individual depositors and ensuring a satisfactory overall funding mix; and
- maintaining liquidity and funding contingency plans. These plans identify early indicators of stress conditions and describe actions to be taken in the event of difficulties arising from systemic or other crises, while minimising adverse long-term implications for the business.

Current accounts and savings deposits payable on demand or at short notice form a significant part of our funding, and we place considerable importance on maintaining their stability. For deposits, stability depends upon preserving depositor confidence in our capital strength and liquidity, and on competitive and transparent pricing. Professional markets are accessed for the purposes of providing additional funding, maintaining a presence in local money markets and optimising asset and liability maturities.

A maturity analysis of assets and liabilities is disclosed in note 40, while an analysis of possible cash flows under contractual terms is disclosed in note 41.

Advances to core funding ratio

The group emphasises the importance of core customer deposits as a source of funds to finance lending to customers, and discourages reliance on short-term professional funding. This is achieved by placing limits on group banking entities which restrict their ability to increase loans and advances to customers without corresponding growth in core customer deposits or long term debt funding. This measure is referred to as the 'advances to core funding' ratio (previously referred to as the 'advances to deposits' ratio).

The ratio describes loans and advances to customers as a percentage of the total of core customer deposits and term funding with a remaining term to maturity in excess of one year. Loans and advances to customers which are part of reverse repurchase arrangements, and where the group receives securities which are deemed to be liquid, are excluded from the advances to core funding ratio. The distinction between core and and non-core deposits generally means that the group's measure of advances to core funding is more restrictive than that which can be inferred from the published financial statements.

Projected cash flow scenario analysis

The group uses a number of standard projected cash flow scenarios designed to model both group-specific and market-wide liquidity crises, in which the rate and timing of deposit withdrawals and drawdowns on committed lending facilities are varied, and the ability to access interbank funding and term debt markets and to generate funds from asset portfolios is restricted. The scenarios are modelled by all group banking entities. The appropriateness of the assumptions under each scenario is regularly reviewed. In addition to the group's standard projected cash flows scenarios, individual entities are required to design their own scenarios to reflect specific local market conditions, products and funding bases.

Stressed one month coverage ratio

The stressed one month coverage ratios tabulated below are derived from these scenario analyses, and express the stressed cash inflows as a percentage of stressed cash outflows over a one month time horizon. Group sites are required to target a ratio of 100% or greater.

Advances to core funding ratios and the stressed one month coverage ratios for the Bank are provided in the following table based on month end figures:

	Advances to co	ore funding ratio	Stressed one month coverage ratio		
	2010	2009	2010	2009	
	%	%	%	%	
Year-end	70.3	55.5	144.6	153.2	
Maximum	70.3	62.0	165.4	153.2	
Minimum	55.5	55.5	132.6	134.3	
Average	63.6	57.5	148.8	144.8	

Contingent liquidity risk

In the normal course of business, group entities provide customers with committed facilities and standby facilities to corporate customers. These facilities increase the funding requirements of the group when customers choose to raise drawdown levels over and above their normal utilisation rates. The liquidity risk consequences of increased levels of drawdown are analysed in the form of projected cash flows under different stress scenarios. Limits are set for non-cancellable contingent funding commitments by group after due consideration of each entity's ability to fund them. The limits are split according to the borrower and the size of the committed line.

Liquidity ratio under the Hong Kong Banking Ordinance

The Hong Kong Banking Ordinance also requires banks operating in Hong Kong to maintain a minimum liquidity ratio. The requirement applies separately to the Hong Kong branches of the Bank and to those subsidiaries which are Authorised Institutions under the Banking Ordinance in Hong Kong.

c Market risk

Market risk is the risk that movements in foreign exchange rates, interest rates, credit spreads, or equity and commodity prices will result in profits or losses to the group. Market risk arises on financial instruments which are measured at fair value and those which are measured at amortised cost. The objective of market risk management is to control market risk exposures to achieve an optimal return while maintaining risk at acceptable levels.

The group monitors market risk separately for trading portfolios and non-trading portfolios. Trading portfolios include positions arising from market-making in exchange rate, interest rate, credit and equity derivative instruments, as well as in debt and equity securities. Trading risks arise either from customer-related business or from proprietary position-taking.

The management of market risk is principally undertaken in Global Markets through risk limits approved by the group's Executive Committee. Traded Credit and Market Risk, an independent unit within the Risk function, develops risk management policies and measurement techniques.

Risk limits are determined for each location and, within location, for each portfolio. Limits are set by product and risk type with market liquidity being a principal factor in determining the level of limits set. Limits are set using a combination of risk measurement techniques, including position limits, sensitivity limits, as well as value at risk limits at a portfolio level. Similarly, option risks are controlled through full revaluation limits in conjunction with limits on the underlying variables that determine each option's value.

52 Risk Management (continued)

Value at risk ('VAR')

One of the principal tools used by the group to monitor and limit market risk exposure is VAR. VAR is a technique which estimates the potential losses that could occur on risk positions taken due to movements in market rates and prices over a specified time horizon and to a given level of confidence (99% for the group). VAR is calculated daily.

The group uses a historical simulation model which derives plausible future scenarios from historical market data. Potential movements in market prices are calculated with reference to market data from the last two years. The model used assumes a 1-day holding period, as this reflects the way the risk positions are managed.

Although a valuable guide to risk, VAR should always be viewed in the context of its limitations. For example:

- the use of historical data as a proxy for estimating future events may not encompass all potential events, particularly those which are extreme in nature;
- the use of a 1-day holding period assumes that all positions can be liquidated or hedged in one day. This may not fully reflect the market risk arising at times of severe illiquidity, when a 1-day holding period may be insufficient to liquidate or hedge all positions fully;
- the use of a 99% confidence level, by definition, does not take into account losses that might occur beyond this level of confidence; and
- VAR is calculated on the basis of exposures outstanding at the close of business and therefore does not necessarily reflect intra-day exposures.

The group recognises these limitations by augmenting the VAR limits with other position and sensitivity limit structures, as well as with stress testing, both on individual portfolios and on a consolidated basis. The group's stress testing regime provides senior management with an assessment of the impact of extreme events on the market risk exposures of the group.

Trading

The group's control of market risk is based on restricting individual operations to trading within a list of permissible instruments authorised for each site by Traded Credit and Market Risk, and enforcing rigorous new product approval procedures. In particular, trading in the more complex derivative products is concentrated in offices with appropriate levels of product expertise and robust control systems.

In addition, at both portfolio and position levels, market risk in trading portfolios is monitored and controlled using a complementary set of techniques such as VAR and present value of a basis point, together with stress and sensitivity testing and concentration limits. These techniques quantify the impact on capital of defined market movements

The total VAR for Global Markets was as follows:

	Group		Bank

¹ In addition to equity trading positions managed by Global Markets, the group also has exposure to changes in equity prices and interest rates relating to guarantees given to customers who purchase certain HSBC investment contracts. As at 31 December 2010, a 10% decrease in equity prices would reduce profit before tax and net assets by HK\$119m (2009: HK\$123m) and a 100 basis points decrease in interest rates would reduce profit before tax and net assets by HK\$27m (2009: HK\$31m).

² Total credit spread VAR includes credit spread VAR for the accrual book from March 2010 onwards.

52 Risk Management (continued)

Non-trading portfolios

Market risk in non-trading portfolios arises principally from mismatches between the future yield on assets and their funding cost as a result of interest rate changes. Analysis of this risk is complicated by having to make assumptions on optionality in certain product areas, for example mortgage prepayments, and from behavioural assumptions regarding the economic duration of liabilities which are contractually repayable on demand, for example current accounts. In order to manage this risk optimally, market risk in non-trading portfolios is transferred to Global Markets or to separate books managed under the supervision of the local Asset and Liability Management Committee ('ALCO').

The transfer of market risk to books managed by Global Markets or supervised by ALCO is usually achieved by a series of internal deals between the business units and these books. When the behavioural characteristics of a product differ from its contractual characteristics, the behavioural characteristics are assessed to determine the true underlying interest rate risk. Local ALCOs regularly monitor all such behavioural assumptions and interest rate risk positions, to ensure they comply with interest rate risk limits established by senior management.

As noted above, in certain cases, the non-linear characteristics of products cannot be adequately captured by the risk transfer process. For example, both the flow from customer deposit accounts to alternative investment products and the precise prepayment speeds of mortgages will vary at different interest rate levels. In such circumstances, simulation modelling is used to identify the impact of varying scenarios on valuations and net interest income.

Once market risk has been consolidated in Global Markets or ALCO-managed books, the net exposure is typically managed through the use of interest rate swaps within agreed limits.

Within the group, banking entities also monitor the sensitivity of projected net interest income under varying interest rate scenarios. The group aims, through its management of market risk in non-trading portfolios, to mitigate the impact of prospective interest rate movements which could reduce future net interest income, whilst balancing the cost of such hedging activities on the current net revenue stream.

A large part of the group's exposure to changes in net interest income arising from movements in interest rates relates to its core deposit franchise. The group's core deposit franchise is exposed to changes in the value of the deposits raised and spreads against wholesale funds. The value of core deposits increases as interest rates rise and decreases as interest rates fall. This risk is, however, asymmetrical in a very low interest rate environment as there is limited room to lower deposit pricing in the event of interest rate reductions.

Structural foreign exchange exposure

The group's gross structural foreign exchange exposure is represented by the net asset value of the group's foreign currency investments in subsidiaries, branches and associates, and the fair value of the group's long-term foreign currency equity investments.

The group's structural foreign currency exposures are managed by the group's ALCO with the primary objective of ensuring, where practical, that the group's and the Bank's capital ratios are protected from the effect of changes in exchange rates. The group considers hedging structural foreign currency exposures only in limited circumstances to protect the capital ratios or the value of capital invested. Such hedging would be undertaken using foreign exchange contracts or by financing with borrowings in the same currencies as the functional currencies involved.

Foreign currency investments amounted to the foreign currency equivalent of HK\$272,883m (85% of shareholders' funds) at 31 December 2010, an increase of HK\$63,452m from HK\$209,431m (80% of shareholders' funds) at 31 December 2009. Gains or losses on structural foreign currency exposures are taken to reserves.

The group had the following structural foreign currency exposures that were not less than 10% of the total net structural foreign currency positions in all foreign currencies:

	Group		Bank

52 Risk Management (continued)

d Operational risk

Operational risk is the risk of loss arising from fraud, unauthorised activities, error, omission, inefficiency, systems failure or external events. It is inherent in every business organisation and covers a wide spectrum of issues.

The group manages this risk through a controls-based environment in which processes are documented, authorisation is independent and transactions are reconciled and monitored. This is supported by an independent programme of periodic reviews undertaken by internal audit, and by monitoring external operational risk events, which ensure that the group stays in line with industry best practice and takes account of lessons learnt from publicised operational failures within the financial services industry.

The HSBC Group has codified its operational risk management process by issuing a high level standard, supplemented by more detailed formal guidance. This explains how the group manages operational risk by identifying, assessing, monitoring, controlling and mitigating the risk, rectifying operational risk events, and implementing any additional procedures required for compliance with local regulatory requirements. The standard covers the following:

- operational risk management responsibility is assigned to senior management within the business operation;
- information systems are used to record the identification and assessment of operational risks and to generate appropriate, regular management reporting;
- assessments are undertaken of the operational risks facing each business and the risks inherent in its processes, activities and products. Risk assessment incorporates a regular review of identified risks to monitor significant changes;
- operational risk loss data is collected and reported to senior management. Aggregate operational risk losses are
 recorded and details of incidents above a materiality threshold are reported to the HSBC Group's Audit
 Committee; and
- risk mitigation, including insurance, is considered where this is cost-effective.

The group maintains and tests contingency facilities to support operations in the event of disasters.

Additional reviews and tests are conducted in the event that any HSBC office is affected by a business disruption event, to incorporate lessons learnt in the operational recovery from those circumstances. Plans have been prepared for the continued operation of the group's business, with reduced staffing levels, should a flu pandemic occur.

e Insurance risk

The group is exposed to the uncertainty surrounding the timing and severity of claims under insurance contracts. The principal insurance risk faced by the group is that, over time, the combined cost of claims, benefits, administration and acquisition of the contract may exceed the aggregate amount of premiums received and investment income. The cost of a claim can be influenced by many factors, including mortality and morbidity experience, lapse and surrender rates and, if the policy has a savings element the performance of the assets held to support the liabilities. Contracts under which the transfer of insurance risk from the policyholder to the group is not significant are classified as investment contracts or service contracts.

The group manages its insurance risk through underwriting limits, approval procedures for transactions that involve new products or that exceed set limits, risk diversification, pricing guidelines, reinsurance and monitoring of emerging issues.

All insurance products, whether internally manufactured or provided by a third party manufacturer, are reviewed by a product and pricing committee. Several methods are used to assess and monitor insurance risk exposures both for individual types of risks insured and overall risks. These methods include internal risk measurement models, sensitivity analyses, scenario analyses and stress testing.

The theory of probability is applied to the pricing and provisioning for a portfolio of insurance contracts. Insurance events are, by their nature, random, and the actual number of events during any one year may vary from those estimated using established statistical techniques.

Asset/liability management

A principal tool used by the group to manage its exposure to insurance risk, in particular for life insurance contracts, is asset and liability matching. The group actively manages its assets using an approach that considers asset quality, diversification, asset/liability matching, liquidity, volatility and target investment return. The goal of the investment process is to achieve the target level of investment return with minimum volatility. The Markets and Liquidity Risk Committee reviews and approves target portfolios on a periodic basis, establishes investment guidelines and limits, and provides oversight of the asset/liability management process.

The group establishes target asset portfolios for each major insurance product category consistent with local regulatory requirements. The investment strategy and asset allocations consider yield, duration, sensitivity, market risk, volatility, liquidity, asset concentration, foreign exchange and credit quality.

The following table shows the composition of assets and liabilities for each major insurance product category. 93% of both assets and liabilities are derived from Hong Kong.

¹ Comprises life linked insurance contracts and linked investment contracts.

Underwriting strategy

The group's underwriting strategy seeks diversity to ensure a balanced portfolio and is based on a large portfolio of similar risks over a number of years and, as such, it is believed that this reduces the variability of the outcome.

Reinsurance strategy

The group reinsures a portion of the insurance risks it underwrites in order to control its exposures to losses and protect capital resources. The group buys a combination of proportionate and non-proportionate reinsurance to reduce the retained sum assured so that it falls within specified insurance risk appetite. The group also utilises reinsurance to transfer out financial risk arising from guaranteeing minimum investment performance under a specific unit-linked insurance product, and uses reinsurance agreements with non-affiliated reinsurers to control its exposure to losses resulting from certain catastrophes.

Ceded reinsurance contains credit risk, and to minimise such risk, only those reinsurers meeting the group's credit rating standard, either assessed from public rating information or from internal investigations, will be used.

² Comprises life non-linked insurance contracts and non-linked investment contracts.

³ Comprises shareholder assets.

⁴ Present value of in-force long-term insurance contracts.

Nature of risks covered

The following gives an assessment of the nature of risks inherent in the group's main products:

(i) Insurance contracts – non-linked products

The basic feature of non-linked insurance business is to provide guaranteed death benefit determined at the time of policy issue. For non-linked insurance products with a savings element, guaranteed surrender benefit, guaranteed maturity benefit, crediting rate guarantees and/or non-lapse guarantee features may be provided. Discretionary participation features allow policyholders to participate in the profits of the life fund by means of annual bonuses. The group has complete contractual discretion on the bonuses declared. It is the group's goal to maintain a smooth dividend scale based on the long-term rate of return. Annual reviews are performed to confirm whether the current dividend scale is supportable.

(ii) Insurance contracts – unit-linked products

The group writes unit-linked life insurance policies, which typically provide policyholders with life insurance protection and choice of investment in a variety of funds. Premiums received are deposited into the chosen funds after deduction of premium fees. Other charges for the cost of insurance and administration are deducted from the funds accumulated. Where there is a performance guarantee, the risk is managed through product design and, when permitted by regulation, reinsurance.

(iii) Investment contracts – retirement funds with guaranteed returns

The group underwrites retirement fund business which gives rise to contracts that are classified as investment contracts. Under each retirement scheme, employers and employees are given a choice of funds to place their contributions, on which the group provides an investment return guarantee for some specific funds. Investment strategy is set with the objective of providing a return that is sufficient to meet at least the minimum guarantee.

(iv) Investment contracts - retirement funds without guaranteed returns

The group underwrites retirement fund business which gives rise to contracts that are classified as investment contracts. Under each retirement scheme, employers and employees are given a choice of funds in which to place their contributions. Those funds with guarantees are covered by (iii) above; for the remainder, the group bears no risk.

(v) Non-life insurance contracts

The group assumes the risk of loss from persons and organisations relating to property, liability, life, accident, health, financial or other perils that may arise from an insurable event. The group manages the risk through underwriting limits, approval procedures for transactions that involve new products or that exceed set authority limits, risk diversification, underwriting guidelines, reinsurance and centralised management of reinsurance and monitoring of emerging issues.

Concentrations of insurance risks

Within the insurance process, concentrations of risk may arise where a particular event or series of events could impact heavily upon the group's liabilities. Such concentrations may arise from a single insurance contract or through a small number of related contracts, and relate to circumstances where significant liabilities could arise.

The group is subject to concentration risk arising from accidents relating to common carriers, conflagration, epidemics, earthquakes and other natural disasters that affect the properties, physical conditions and lives of the policyholders insured by the group. To mitigate these risks, excess of loss and catastrophe reinsurance arrangements have been made by the group.

The policyholders of the insurance contracts issued by the group, its associates and joint ventures, are mainly residents of Hong Kong, Macau, mainland China, Taiwan, Singapore, Malaysia, Vietnam, India and South Korea, where the majority is Hong Kong.

52 Risk Management (continued)

To determine the concentration of insurance risks and the reinsurance coverage required, scenario analyses are performed to investigate the potential financial impact on the group. Total loss is estimated based on the chosen stress level. Details of the group's reinsurance strategy are disclosed on page 178.

Life business tends to be longer-term in nature than non-life business and frequently involves an element of savings and investment in the contract. An analysis of life insurance liabilities is therefore the best available overall measure of insurance exposure, because provisions for life contracts are typically set by reference to expected future cash outflows relating to the underlying policies. The liabilities for non-linked contracts are set by reference to a range of assumptions which mainly include interest rate and mortality levels. The process used to determine the assumptions is intended to result in stable and prudent estimates of future outcomes. This is achieved by adopting relatively conservative assumptions which can withstand a reasonable range of fluctuation of actual experience. An annual review of the relevant experience is performed to ensure a margin exists between the assumptions adopted and the most likely estimate of future outcome. By definition, the group is not exposed to insurance risk on investment contracts, so they have not been included in the insurance risk management analysis. Details of the analysis of life insurance liabilities are disclosed in note 34. By contrast for analysis of non-life insurance risk, written premiums represent the best available measure of risk exposure as shown in the following table.

Analysis of non-life insurance risk – net written insurance premiums¹

	HK\$m	2009 HK\$m
Accident and health	1,411	1,291
Fire and other damage	306	235
Motor	332	262
Liability	180	141
Marine, aviation and transport	111	96
Other (non-life)	369	335
Total net written insurance premiums	2,709	2,360

¹ Net written insurance premiums represent gross written premiums less gross written premiums ceded to reinsurers.

Financial risks

Transactions in financial instruments may result in the group assuming financial risks. These include market risk, credit risk and liquidity risk. Each of these financial risks is described below, together with a summary of the ways in which the group manages these risks arising from underwriting insurance business.

The group is also exposed to investment return guarantee risk for certain investment contracts issued to policyholders for its long-term insurance business. The risk is that the yield on the assets held by the group to meet these guarantees may fall short of the guaranteed return. The framework for the management of this risk is to adopt a matching approach whereby assets held are managed to meet the liability to policyholders. An additional provision is established where analysis indicates that, over the life of the contracts, the returns from the designated assets may not be adequate to cover the related liabilities.

The following table analyses the assets held in the group's insurance underwriting subsidiaries at 31 December 2010 by type of liability, and provides a view of the exposure to financial risk:

Financial assets held by insurance manufacturing operations

	At 31 December 2010

The table demonstrates that for linked contracts, the group typically designates assets at fair value. For non-linked contracts, the classification of the assets is driven by the nature of the underlying contract. The assets held to support life linked liabilities represented 14.3% of the total financial assets of the group's insurance manufacturing subsidiaries at the end of 2010 (2009: 14.5%). The table also shows that approximately 69.7% of financial assets were invested in debt securities at 31 December 2010 (2009: 71.4%) with 16.9% (2009: 15.3%) invested in equity securities.

Market risk

Market risk can be further sub-categorised into interest rate risk, equity risk and foreign currency risk. Each of these categories is discussed further below.

52 Risk Management (continued)

Interest rate risk

The group's exposure to interest rate risk arises mainly from its debt securities holdings and the uncertainty of the achievable interest rate when reinvesting the future net cash flows. The held-to-maturity strategy accounts for a significant portion of the debt securities holdings and is managed to match expected liability payments. The group monitors this exposure through periodic reviews of its asset and liability positions. Estimates of cash flows, as well as the impact of interest rate fluctuations relating to the investment portfolio and insurance reserves, are modelled and reviewed regularly. The overall objective of these strategies is to limit the net changes in the value of assets and liabilities arising from interest rate movements.

For participating products, interest rate risk related to non-linked policies can also be mitigated through sharing of risk with policyholders under the discretionary participation mechanism.

A shift in interest yield curves as at 31 December 2010 in all territories in which the group's insurance subsidiaries operate would have the following impact on the profit for the year and net assets at that date:

	31 December 2010		31 December 2009	
	Impact on		Impact on	
	profit for	Impact on	profit for	Impact on
	the year	net assets	the year	net assets
	HK\$m	HK\$m	HK\$m	HK\$m
+ 100 basis points shift in yield curves	515	(194)	385	78
- 100 basis points shift in yield curves	(556)	173	(349)	(35)

The interest rate sensitivities set out above are illustrative only and employ simplified scenarios. It should be noted that the effects may not be linear and therefore the results cannot be extrapolated. The sensitivities do not incorporate actions that could be taken by management to mitigate the effect of the interest rate movements, nor do they take account of any resultant changes in policyholder behaviour.

Equity risk

The portfolio of marketable equity securities, which the group carries on the balance sheet at fair value, has exposure to price risk. This risk is defined as the potential loss in market value resulting from an adverse change in prices. The risk is mainly mitigated through dynamic asset allocation and sharing the risk with policyholders through the discretionary participation feature. Portfolio characteristics are analysed regularly and equity price risk is regularly reviewed. The group's investment portfolios are diversified across industries, and concentrations in any one company or industry are limited by parameters established by senior management, as well as by statutory requirements.

The following table illustrates the impact on the aggregated profit for the year and net assets of a reasonably possible 10% variance in equity prices:

	31 December 2010		31 December 2009	
	Impact on		Impact on	
	profit for	Impact on	profit for	Impact on
	the year	net assets	the year	net assets
	HK\$m	HK\$m	HK\$m	HK\$m
10% increase in equity prices	473	474	67	141
10% decrease in equity prices	(471)	(471)	(67)	(141)

These equity sensitivities are illustrative only and employ simplified scenarios. It should be noted that the effects may not be linear and, therefore, the results cannot be extrapolated. They do not allow for the effect of management actions which may mitigate the equity price decline, nor for any resultant changes, such as in policyholder behaviour, that might accompany such a fall.

Foreign currency risk

Substantial amounts of the assets and liabilities are denominated in two main currencies, United States dollar and Hong Kong dollar. The group adopts a policy of predominantly matching the assets with liabilities in the same currency, effectively reducing the foreign currency exchange rate exposure. Limits are set to ensure that the net foreign currency exposure is kept to an acceptable level. The group uses forward exchange contracts and swaps to manage its foreign currency risk.

Credit risk

The group's portfolio of fixed income securities, and to a lesser extent short-term and other investments are subject to credit risk. This risk is defined as the potential loss in market value resulting from adverse changes in a borrower's ability to repay the debt. The group's objective is to earn competitive relative returns by investing in a diversified portfolio of securities. Management has a credit policy in place and limits are established to manage credit quality and concentration risk. The following table presents the analysis of the treasury bills, other eligible bills and debt securities within the group's insurance business. The definition of the four credit quality classifications is included on page 163. Only assets supporting non-linked liabilities are included in the table as financial risk on assets supporting linked liabilities is predominantly borne by the policyholders. 96.5% (2009: 98.4%) of the assets included in the table are invested in investments rated as 'Strong'.

 $^{1\ \} Shareholders' funds\ comprise\ solvency\ and\ unencumbered\ assets.$

The group also has insurance and other receivable amounts subject to credit risk. The most significant of these are reinsurance recoveries. To mitigate the risk of the counterparties not paying the amounts due, the group has established certain business and financial guidelines for reinsurer approval, incorporating ratings by major agencies and considering currently available market information. The group also periodically reviews the financial stability of reinsurers and the settlement trend of amounts due from reinsurers. The split of liabilities ceded to reinsurers and outstanding reinsurance recoveries was as follows:

Reinsurers' share of liabilities under insurance contracts

The group has sold a unit-linked life insurance product which provides guaranteed minimum death benefits and guaranteed minimum accumulated benefits which are underwritten by the group but reinsured by a third party. The group has a credit risk exposure in respect of this third party's ability to meet its reinsurance obligation. At 31 December 2010, the exposure to the third party was HK\$5,566m (2009: HK\$6,231m).

Liquidity risk

There are three components of liquidity risk. The first of these arises in normal market conditions and is referred to as funding liquidity risk, specifically, the capacity to raise sufficient cash when needed to meet payment obligations. Secondly, there is market liquidity risk where the size of a particular holding may be sufficiently large that a sale cannot be completed at or around the market price. Finally, there is standby liquidity risk which refers to the capacity to meet payment conditions in abnormal conditions.

The group has to meet daily calls on its cash resources, notably from claims arising on its insurance and investment contracts and early surrender of policies for surrender value. There is therefore a risk that cash will not be available to settle liabilities when due at a reasonable cost. The group manages this risk by monitoring and setting an appropriate level of operating funds to settle these liabilities. Investment portfolios are also structured with regard to the liquidity requirement of each underlying fund, and early surrender penalties and market adjustment clauses are used to defray costs of unexpected cash requirements.

52 Risk Management (continued)

The following table shows the expected maturity of insurance contract liabilities at 31 December 2010:

Expected maturity of insurance contract liabilities

	Expected cash flows (undiscounted)						
	Within 1 year	1-5 years	5-15 years	Over 15 years	Total		
	HK\$m	HK\$m	HK\$m	HK\$m	HK\$m

- undated ¹	6,459	26,750		33,209
	6,898	26,951	269	34,118

¹ In most cases, policyholders have the option to terminate their contracts at any time and receive the surrender values of their policies. The surrender values may be significantly lower than the amounts shown above.

Present value of in-force long-term insurance business (PVIF)

The group's life insurance business is accounted for using the embedded value approach, which, inter alia, provides a comprehensive framework for the evaluation of insurance and related risks. The value of the PVIF asset at 31 December 2010 was HK\$14,767m (2009: HK\$10,554m). The present value of the shareholders' interest in the profits expected to emerge from the book of in-force policies at 31 December 2010 can be stress-tested to assess the sensitivity of the value of life business to adverse movement of different risk factors.

The following table shows the effect on the PVIF as at 31 December 2010 of reasonably possible changes in the main economic and business assumptions:

	Impact	on results
	2010	2009
	HK\$m	HK\$m
+ 100 basis points shift in risk-free rate	1,613	1,296
- 100 basis points shift in risk-free rate	(1,218)	(773)
+ 100 basis points shift in risk discount rate	(820)	(640)
- 100 basis points shift in risk discount rate	942	734
+ 100 basis points shift in expenses inflation	(45)	(35)
- 100 basis points shift in expenses inflation	39	31
+ 100 basis points shift in lapse rate	1,185	1,444
– 100 basis points shift in lapse rate	(1,044)	(1,221)

The effects on PVIF shown above are illustrative only and employ simplified scenarios. They do not incorporate actions that could be taken by management to mitigate effects nor do they take account of consequential changes in policyholder behaviour.

Non-economic assumptions

Non-economic assumptions including, for non-life manufacturers, claims costs and expense rates and, for life manufacturers, mortality and/or morbidity, lapse rates and expense rates, are also used for the determination of the policyholder liabilities and PVIF. The sensitivity of profit for the year and net assets to reasonably possible changes in these non-economic assumptions at 31 December 2010 across all insurance underwriting subsidiaries is as follows:

	Impact on 2010 results		Impact on 2009 results	
	Profit after tax	Net assets	Profit after tax	Net assets
	HK\$m	HK\$m	HK\$m	HK\$m
20% increase in claims costs	(183)	(183)	(177)	(177)
20% decrease in claims costs	183	183	177	177
10% increase in mortality and/or morbidity rates	(176)	(176)	(137)	(137)
10% decrease in mortality and/or morbidity rates	167	167	130	130
50% increase in lapse rates	351	351	586	586
50% decrease in lapse rates	(58)	(58)	(422)	(422)
10% increase in expense rates	(171)	(171)	(112)	(112)
10% decrease in expense rates	171	171	112	112

52 Risk Management (continued)

f Capital management

Our approach to capital management is driven by our strategic and organisational requirements, taking into account the regulatory, economic and commercial environment in which we operate.

It is our objective to maintain a strong capital base to support the development of our business and to meet regulatory capital requirements at all times. To achieve this, our policy is to hold capital in a range of different forms and from diverse sources, and all capital raising is agreed with major subsidiaries as part of their individual and the group's capital management processes.

Our capital management process is articulated in our annual group capital plan which is approved by the Board. The plan is drawn up with the objective of maintaining both an appropriate amount of capital and an optimal mix between the different components of capital. The group raises non-equity core capital and subordinated debt in accordance with HSBC Group's guidelines on market and investor concentration, cost, market conditions, timing, effect on composition and maturity profile. Each subsidiary manages its own capital to support its planned business growth and meet its local regulatory requirements within the context of the approved annual group capital plan. In accordance with HSBC Group's Capital Management Framework, capital generated by subsidiaries in excess of planned requirements is returned to the Bank, normally by way of dividends.

The Bank is primarily the provider of equity capital to its subsidiaries and these investments are substantially funded by the Bank's own capital issuance and profit retention. As part of its capital management process, the Bank seeks to maintain a prudent balance between the composition of its capital and that of its investment in subsidiaries.

The principal forms of capital are included in the following balances on the consolidated balance sheet: share capital, retained profits, other reserves, preference shares and subordinated liabilities. Capital also includes the collective impairment allowances held in respect of loans and advances.

Externally imposed capital requirements

The Hong Kong Monetary Authority supervises the group on a consolidated basis and therefore receives information on the capital adequacy of, and sets capital requirements for, the group as a whole. Individual banking subsidiaries and branches are directly regulated by their local banking supervisors, who set and monitor their capital adequacy requirements. In most jurisdictions, non-banking financial subsidiaries are also subject to the supervision and capital requirements of local regulatory authorities.

From 1 January 2009, the group migrated to the advanced internal ratings-based approach to calculate its credit risk for the majority of its non-securitisation exposures. The group continued to use the internal ratings-based (securitisation) approach to determine credit risk for its securitisation exposures. For market risk, the group used an internal models approach to calculate its general market risk and market risk relating to equity options. From 30 March 2009, the group adopted an internal models approach to calculate its market risk in respect of specific risk for the interest rate risk category. The group continued to use the standardised (market risk) approach for calculating other market risk positions and the standardised (operational risk) approach to calculate its operational risk

During the year, the individual entities within the group and the group itself complied with all of the externally imposed capital requirements of the Hong Kong Monetary Authority.

53 Analysis of selected exposures

a Holdings of asset-backed securities

The group has holdings of asset-backed securities ('ABSs'), including those represented by mortgage-backed securities ('MBSs') and by collateralised debt obligations ('CDOs').

The table below shows the group's exposure to ABSs issued by entities which are not consolidated by any HSBC Group entities. The carrying amounts of these exposures are measured at fair value.

53 Analysis of selected exposures (continued)

The table below shows the geographic distribution of the group's exposures to ABSs shown above.

	31 December 2010		31 December 2009	
	Gross and Net			
	Principal	Carrying	Gross	Carrying
	exposure ¹	Amount ²	Principal ¹	Amount ²
	HK\$m	HK\$m	HK\$m	HK\$m
2010				
US	8,566	7,574	7,249	5,982
UK	923	814	1,105	918
Rest of the world	2,504	2,463	4,062	3,805
	11,993	10,851	12,416	10,705

¹ The gross principal exposure is the redemption amount on maturity or, in the case of an amortising instrument, the sum of the future redemption amounts through the residual life of the security. Net principal exposure is the gross principal amount of assets that is not protected by CDSs. It includes assets that benefit from monoline protection, except where this protection is purchased with a CDS.

b Leveraged finance commitments

Leveraged finance commitments held by the group were HK\$1,509m at 31 December 2010 (2009: HK\$712m), of which HK\$130m (2009: HK\$545m) was funded.

c Other involvement with SPEs

The group enters into certain transactions with customers in the ordinary course of business that involve the establishment of SPEs. The purposes for which the SPEs are established include facilitating the raising of funding for customers' business activities or to effect a lease. The use of SPEs is not a significant part of the group's activities and the group is not reliant on SPEs for any material part of its business operations or profitability.

54 Ultimate holding company

The ultimate holding company of the Bank is HSBC Holdings plc, which is incorporated in England.

The largest group in which the accounts of the Bank are consolidated is that headed by HSBC Holdings plc. The consolidated accounts of HSBC Holdings plc are available to the public on the HSBC Group's web site at www.hsbc.com or may be obtained from 8 Canada Square, London E14 5HQ, United Kingdom.

55 Nature of business

The group provides domestic and international banking and related financial services, principally in the Asia-Pacific region.

56 Events after the balance sheet date

There have been no events after the balance sheet date that would require disclosure in these financial statements.

57 Approval of accounts

The accounts were approved and authorised for issue by the Board of Directors on 28 February 2011.

² Carrying amount of the net principal exposure.

³ At 31 December 2010, the group has no principal exposure to monoline insurers. At 31 December 2009,CDS gross protection of HK\$190m was in place for an ABS holding included under other assets. The ABS matured during 2010.

58 Accounting standards issued but not yet effective

The HKICPA has issued a number of amendments to HKFRSs and Interpretations which are not yet effective for the year ended 31 December 2010 and which have not been adopted in these financial statements.

HKFRS 9 'Financial Instruments' ('HKFRS 9') was issued in November 2009 and establishes new principles for the classification and measurement of financial assets. In November 2010, the HKICPA issued additions to HKFRS 9 dealing with financial liabilities. The main changes from the requirements of HKAS 39 are summarised below.

- All financial assets are classified into two measurement categories: amortised cost or fair value. These two
 categories replace the four categories under the current HKAS 39 'Financial Instruments: Recognition and
 Measurement'.
- Financial assets are measured at fair value through profit or loss if they do not meet the criteria specified for
 measurement at amortised cost or if doing so significantly reduces or eliminates an accounting mismatch. An entity
 has the option to designate changes in fair value of an equity instrument not held for trading at fair value through
 other comprehensive income with no recycling of gains or losses to the income statement.
- HKFRS 9 retains all the existing requirements for derecognition of financial instruments and most of the
 requirements for financial liabilities, except that for financial liabilities designated under the fair value option other
 than loan commitments and financial guarantee contracts, fair value changes attributable to changes in own credit
 risk are to be presented in the statement of other comprehensive income, and are not subsequently reclassified to
 income statement.

HKFRS 9 is mandatory for annual periods beginning on or after 1 January 2013 with earlier application permitted. It is required to be applied retrospectively, but if adopted prior to 1 January 2012, an entity will be exempt from the requirement to restate prior period comparative information. The group is presently studying the implications of applying HKFRS 9. It is impracticable to quantify the impact of HKFRS 9 as at the date of publication of these financial statements.

The HKICPA issued an amendment to HKFRS 7 'Financial Instruments: Disclosures' in October 2010 which requires additional disclosures for risk exposures arising from transferred financial assets. The amendment will be effective for annual periods beginning on or after 1 July 2011, with earlier application permitted. No disclosures are required for prior periods. The group is presently studying the implications of applying this amendment to HKFRS 7.

The HKICPA issued an amendment to HKAS 12 'Income Taxes' in December 2010, whereby deferred taxes on investment property, carried under the fair value model in HKAS 40, will be measured on the presumption that an investment property is recovered entirely through sale. The presumption is rebutted if the investment property is held within a business whose objective is to consume substantially all of the economic benefits embodied in the investment property over time, rather than through sale. The amendment will be effective for annual periods beginning on or after 1 January 2012 with earlier application permitted. The group is currently assessing the financial impact of this amendment.

A number of other amendments to HKFRSs have been issued but are not yet effective and are not expected to have a significant effect on the group's financial statements:

- HKAS 24 (Revised 2009) 'Related Party Disclosures'
- Hong Kong (IFRIC) Interpretation 19 'Extinguishing Financial Liabilities with Equity Instruments'
- Amendment to Hong Kong (IFRIC) Interpretation 14 'HKAS 19 The Limit on a Defined Benefit Asset, Minimum Funding Requirements and their Interaction'
- 'Improvements to HKFRSs' issued in May 2010
- Amendments to HKFRS 1 'First-time Adoption of Hong Kong Financial Reporting Standards'

Independent auditor's report to the shareholders of The Hongkong and Shanghai Banking Corporation Limited (incorporated in Hong Kong with limited liability)

We have audited the consolidated financial statements of The Hongkong and Shanghai Banking Corporation Limited set out on pages 27 to 191, which comprise the consolidated and the Bank's balance sheets as at 31 December 2010, the consolidated income statement, the consolidated statement of comprehensive income, the consolidated statement of changes in equity and the consolidated cash flow statement for the year then ended and a summary of significant accounting policies and other explanatory information.

Directors' responsibility for the consolidated financial statements

The directors of the Bank are responsible for the preparation of consolidated financial statements that give a true and fair view in accordance with Hong Kong Financial Reporting Standards issued by the Hong Kong Institute of Certified Public Accountants and the Hong Kong Companies Ordinance, and for such internal control as the directors determine is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's responsibility

Our responsibility is to express an opinion on these consolidated financial statements based on our audit. This report is made solely to you, as a body, in accordance with section 141 of the Hong Kong Companies Ordinance, and for no other purpose. We do not assume responsibility towards or accept liability to any other person for the contents of this report.

We conducted our audit in accordance with Hong Kong Standards on Auditing issued by the Hong Kong Institute of Certified Public Accountants. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance as to whether the consolidated financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation of consolidated financial statements that give a true and fair view in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal

control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by the directors, as well as evaluating the overall presentation of the consolidated financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the consolidated financial statements give a true and fair view of the state of the affairs of the Bank and the group as at 31 December 2010 and of the group's profit and cash flows for the year then ended in accordance with Hong Kong Financial Reporting Standards and have been properly prepared in accordance with the Hong Kong Companies Ordinance.
