### Important notes

- The Wayfoong Multi-funding System ('WMFS') is a pooled occupational retirement scheme set up in 1992 in Bermuda.
- The WMFS together with all its Investment Portfolios are constituted in the form of an insurance policy issued by HSBC Life (International) Limited. Your investments are therefore subject to the credit risks of HSBC Life (International) Limited.
- Where your scheme is a defined contribution scheme, the benefit payments of your employees are calculated with reference to the fluctuation of the performance of the Investment Portfolios and subject to the terms and conditions of WMFS. Each of the Investment Portfolios has its own investment objectives and associated risks.
- Where your scheme is a defined benefit scheme, your liability to top-up any benefits payable to your employees
  are calculated based on a formula pre-determined by you and actuarial valuations and are also subject to the
  terms and conditions of WMFS. Each of the Investment Portfolios has its own investment objectives and
  associated risks.
- An employer may choose to put in place a trust arrangement in respect of its participation in WMFS. However, even with the set up of a trust arrangement, the appointed trustee will only be holding an insurance policy issued by HSBC Life (International) Limited and your investments are still subject to the credit risks of HSBC Life (International) Limited.
- Whether or not a trust arrangement is set up, the WMFS and all its Investment Portfolios are constituted in the form of an insurance policy and therefore you are not investing in the underlying funds/assets and you do not have any rights or ownership over the underlying funds/assets of the WMFS.
- If a trust arrangement is set up in respect of your participation, such arrangement is governed by the provisions of the trust deed and, to the extent expressly incorporated into such trust deed by reference, the relevant insurance policy.
- The guarantee of the Capital Guaranteed Fund is also given by HSBC Life (International) Limited. Your investments in the Capital Guaranteed Fund, if any, are therefore subject to the credit risks of HSBC Life (International) Limited.
- The guarantee of the Capital Guaranteed Fund is subject to the relevant guarantee features. Please refer to the Investment Portfolio Fact Sheet of the Capital Guaranteed Fund for full details of the relevant guarantee features and conditions.
- The guarantee of the Central Provident Fund is given by The Hongkong and Shanghai Banking Corporation Limited. Your investments in the Central Provident Fund, if any, are therefore also subject to the credit risks of The Hongkong and Shanghai Banking Corporation Limited.
- The guarantee of the Central Provident Fund is subject to the relevant guarantee features. Please refer to the Investment Portfolio Fact Sheet of the Central Provident Fund for full details of the relevant guarantee features and conditions.
- The Central Provident Fund has been closed to new contributions or money with effect from 1 June 2010.
- You should consider your own risk tolerance level and financial circumstances before choosing any Investment
  Portfolio. When, in your selection of Investment Portfolios, you are in doubt as to whether a certain
  Investment Portfolio is suitable for you (including whether it is consistent with your investment objectives), you
  should seek financial and/or professional advice and choose the Investment Portfolio(s) most suitable for you
  taking into account your circumstances.
- You should not invest based on this document alone and should read the relevant 'Principal Brochure'.
- Investment involves risks. Past performance is not indicative of future performance. The value of financial instruments, in particular stocks and shares, and any income from such financial instruments, may go down as well as up. For further details including the product features and risks involved, please refer to the 'Principal Brochure'.

# 市場概覧 MARKET OVERVIEW

### 股票市場 EQUITIES

#### 美國 USA

美國股票於第三季表現疲弱。季初,投資者對聯儲局試圖令經濟出現軟著陸感到樂觀,同時觀望即將告別利率緊縮政策年代。然而,隨著市場展望加息周期持續,樂觀情緒在八月至九月期間逐漸消退,從聯儲局的「點陣圖」可見一斑。季內,能源股表現相對穩健,在季內幾乎全線板塊下挫的情況下,成為為數不多的亮點。整體而言,資訊科技股是季內表現最差的板塊之一,緊隨其後的是缺乏追捧的房地產及公用事業股。

US equities were weaker in the third quarter. Investors entered the quarter optimistic that the Federal Reserve (Fed) had orchestrated a soft landing for the economy, and that the era of policy tightening rates would soon end. That enthusiasm withered over August and September, however, as the prospect of a sustained period of higher rates sank in. This followed a revised Fed 'dot plot'. Energy stocks were relatively resilient over the quarter, and one of few bright spots in a quarter where few sectors avoided falls. The IT sector overall was one of the weakest areas over the quarter, along with the less influential sectors of Real Estate and Utilities.

### 歐洲 EUROPE

在加息對經濟增長的負面憂慮下,歐元區股票於第三季下跌。由於憂慮利率上升會 對消費者的可支配收入帶來連鎖效應,多元化消費品股錄得較大跌幅。資訊科技股 表現同樣受壓。雖然年內人工智能的長遠潛力備受市場青睞,但短期消費開支的憂 慮也影響了晶片需求。能源股在跌市下脱穎而出,由於部分原油出口國減產,帶動 原油價格上升,利好能源股逆市上揚。

Eurozone shares fell in the third quarter amid worries over the negative effects of interest rate rises on economic growth. Some of the steepest declines came in the Consumer Discretionary sector given concerns over the knock-on effects of higher

interest rates on consumers' disposable income. The Information Technology sector was also under pressure. While there has been much enthusiasm this year around the long-term potential of Artificial Intelligence (AI), nearer-term concerns over consumer spending are also affecting demand for chips. The energy sector was a notable exception to the declines, notching up gains amid higher oil prices as some oil exporting countries cut production.

### 亞洲 ASIA

隨著市場對環球宏觀經濟及利率前景憂慮日益增加,亞洲(日本除外)股票於第三季下跌。香港股票表現跑輸大市,而隨著投資者審視人工智能創新及電動車等主題帶動的長遠需求前景,台灣及南韓股票同樣跟隨環球科技股下跌,結束連升三季的走勢。此外,市場憧憬當局推出更多針對性政策,中國股票輕微下跌。儘管印度股票估值偏高,但印度宏觀經濟穩健及基建開支增加令市場感到樂觀,帶動印度股票逆市上升。 Asia ex-Japan equities fell in the third quarter amid growing worries over global

macro and interest rate outlook. While Hong Kong equities led the losses in the region, Taiwanese and Korean equities tracked global technology shares lower, snapping their three consecutive quarterly gains as investors assessed the longer-term demand outlook driven by AI innovation and electric vehicle theme. Meanwhile, Chinese equities fell slightly amid hopes of more targeted policy rollouts. Although Indian equities show rich valuations, they bucked the regional trends to edge higher on optimism about India's macro resilience and increased infrastructural spending.

### 股票市場 EQUITIES (績 con't)

#### 日本 JAPAN

在主權債券收益率飆升下,加上金融股領漲(但科技及健康護理股表現遜色),日本股票於第三季下跌(以美元計)。日本的「核心核心」通脹加劇,引起市場預測日本央行較預期提早撤銷超寬鬆政策,而當局對日圓走勢持續疲弱的應對措施也成為焦點。國內消費及服務業需求保持穩健,但外圍不利因素仍拖累製造業活動。日本股票估值較其他已發展市場有所折讓,並進一步收窄,但部分市值低於面值的上市公司可能進行重組,有利吸引資金流入。

Japanese equities edged lower in the third quarter (in USD terms) amid the surge in sovereign yields. Energy and Financials stocks led the gains, whereas Technology and Health Care shares underperformed. Japan's elevated 'core-core' inflation fueled expectations of an earlier-than-expected Bank of Japan's exit from its ultra-loose policy, with authorities' response to the extended Yen weakness also in focus. Domestic consumption and services demand stayed resilient, but external headwinds still weighed on manufacturing activities. Japanese stocks' valuation discount to their developed market peers narrowed further, but potential reform made by those listed companies trading below their par value could attract fund inflows.

#### 中國 CHINA

在房地產市場持續低迷,加上宏觀經濟陰霾揮之不去,投資者審視政策措施的長遠成效,中國股票於第三季輕微下跌。行業表現個別發展,當中公用事業、科技、工業及房地產股表現遜色。此外,宏觀經濟數據反映內需表現轉弱,外圍貿易環境亦面臨挑戰。雖然經濟重啟相關服務表現向好,但增長動力進一步放緩,製造業活動初步顯示出平穩增長勢頭。中國股票估值仍相對吸引,若當局持續推出更多針對性的政策措施重振經濟增長及投資者信心,企業盈利預測有望迎來向上修訂空間。

Chinese equities fell slightly in the third quarter as investors assessed the ongoing implementation of policy measures amid a prolonged property downturn and lingering macro worries. Sectoral performances were mixed, with Utilities, Technology, Industrials, and Real Estate stocks underperforming. Macro prints still

suggested a softening domestic demand, and the external trade environment remained challenging. While reopening-related services held up but its growth momentum slowed further, manufacturing activities showed early signs of stabilization. Chinese stocks' valuations stay relatively attractive, and upward revisions on earnings estimates are possible should the continuing rollout of more targeted policy measures help revive growth and investor confidence.

### 香港 HONG KONG

由於市場對美國加息前景的憂慮揮之不去,加上對中國內地及其他主要經濟體的宏觀 憂慮日益增加,香港股票於第三季延續跌勢,且跌幅擴大。香港利率高企繼續拖累 投資意欲及本地房地產市場,加上經濟重啟後的周期性復甦步伐較早前預測有所放 緩。然而,就業市場表現平穩,加上香港特區政府公布的施政報告中推出措施,有 利經濟前景。經過年初至今的整固後,香港股票估值遠低於長期平均值,但相比區 內其他市場,吸引力未見突出。

Hong Kong equities extended losses and declined markedly in the third quarter amid the lingering worries over the US interest rate outlook and the growing macro concerns over mainland China and other major economies. High domestic interest rates still weighed on the investment appetite and domestic property market, and the cyclical recovery after reopening was slower than previously estimated. Nevertheless, a stable job market supported the outlook, in addition to the Hong Kong SAR government's measures announced in the policy address. Their valuations are well below long-term average after year-to-date corrections, though not particularly attractive compared to their regional peers.

### 債券及貨幣市場 BONDS AND CURRENCIES

市場憂慮美國增加債券發行會拖累國庫券市場。在美國國庫券帶動下,環球政府債券收益率於九月升至最高位,其後於季末稍為回落。美國十年期債券收益率由3.81%上升至4.57%,而兩年期債券收益率則由4.87%上升至5.05%。歐洲方面,德國十年期債券收益率由2.39%上升至2.84%。企業債券市場表現領先政府債券,而投資級別及高收益債券息差不斷收窄。儘管經濟增長趨勢轉弱,歐洲信貸表現領先美國信貸。美元兑大部分貨幣轉強,反映經濟增長動力向好。

Concerns over rising US debt issuance weighed on the Treasury market. Led by the US, global government bond yields peaked in September before slightly retreating at the quarter's end. The US 10-year Treasury yield rose from 3.81% to 4.57%, and the

two-year Treasury yield increased from 4.87% to 5.05%. In Europe, Germany's 10-year Treasury yield increased from 2.39% to 2.84%. Corporate bond markets outperformed government bonds, with spreads narrowing across both investment grade (IG) and high yield (HY). Despite a weaker growth trajectory, European credit outperformed the US. The US dollar strengthened against major currencies, reflecting the positive growth momentum.

### 總結 SUMMARY

股票及信貸等風險資產類別持續反映經濟軟著陸的可能性,未有考慮重大經濟衰退的憂慮。我們建議 審慎配置投資組合。

在股票市場前景動盪下,我們看好優質債券及優質信貸帶來的息差投資機遇,可帶來具吸引力的收益機 遇,同時避過不斷增加的違約風險。

新興市場資產類別迎來部分投資機遇,一些地區的經濟增長和通脹形勢較為理想,而且估值較具吸引 力。聯儲局減息決定亦是利好因素之一。

Riskier asset classes such as equities and credits continue to price in a soft landing and do not appear to be factoring in meaningful recession concerns. We advocate a cautious approach when positioning portfolios.

Amid a choppy outlook for stocks, we prefer high-quality bonds and the carry opportunities available in high-quality credits. These can offer attractive income opportunities while also helping avoid rising default risks.

There are some selective opportunities among emerging markets asset classes amid pockets of better growth, inflation dynamics and more attractive valuations. Federal Reserve rate cuts can also be a positive.

#### 基金展望 **Fund outlook**

香港金融管理局(金管局)跟隨美國聯儲局步伐,於季內上調基準利率一次,將利率由5.50%上調至5.75%。季內,香港金管局於本月並無干預外匯市場, 結餘總額維持約450億港元。

季內,香港銀行同業拆息趨升。一個月香港銀行同業拆息上升46個基點至5.40%,而三個月及六個月香港銀行同業拆息分別上升30個基點及42個基點至 5 27% 及5 39%

三個月外匯基金票據收益率由上季的4.17%上升至4.73%,而六個月外匯基金票據收益率則由上季的4.17%上升至4.73%

基金經理持續利用隔夜存款及短期香港庫券管理流動資金。鑑於季內香港銀行同業拆息曲線趨升,每當定期存款利率應因資金緊縮而調整時,我們把 握具吸引力的定期存款優惠配置部分到期資產至三個月/四個月/六個月存款/存款證。鑑於預期美國政策利率將於今年較後時間見頂,我們亦將部分 到期資產滾存至下年度。季內,由於一個月至六個月香港銀行同業拆息曲線大致趨平,我們審慎配置部分到期資產,以觀望聯儲局於十一月及十二月的 會議結果。季內,基金的加權平均到期期限為50日,上季同樣為50日。

鑑於聯儲局官員發表強硬言論,表示今年內有可能再度加息一次,而利率在較長時間處於高位的情況可望支持香港銀行同業拆息,預期第四季香港資金 會持續緊張。此外,中國當局推出刺激政策亦利好港股市場,而當市場看好股票上漲,港元融資需求便會增加,導致港元資金進一步緊張。我們將因應 回報合理性選持三個月/四個月/六個月投資產品。短期內,我們預期將因應以色列衝突事件及下一次聯儲局會議選持短倉。預期基金的加權平均到期 期限將維持於40至50日範圍的上限。

Following the US Federal Reserve (Fed), Hong Kong Monetary Authority (HKMA) raised its base rate once this quarter to 5.75% from 5.50%. During the quarter, there was no foreign exchange intervention by the HKMA this month and the Aggregate Balance remained stable at around HKD45 billion.

The Hong Kong Interbank Offered Rate (HIBOR) curve shifted higher over the quarter. HIBOR 1-month was 46 bps higher at 5.40%, whereas HIBOR 3-month and 6-month moved higher by 30 bps to 5.27% and 42 bps to 5.39% respectively.

3-month Exchange Fund Bills (EFB) yield moved higher to 4.73% vs 4.17% last quarter, while 6-month EFB yield moved higher to 4.73% vs 4.17% last quarter

The Fund Manager continued to use overnight deposits and short-term Hong Kong Treasury Bills for liquidity management. Given HIBOR curve continued to shift higher over the quarter, we have taken the advantage of the attractive term premium by extending into 3-month/4-month/6-month deposit/Certificate of Deposit space whenever term rates react to tightened funding. We also rolled some maturities into the next year given the expectation of peaking of US policy rate later in the year. Since HIBOR curve remained largely flat from 1-month to 6-month over the quarter, we have selectively positioned some maturities around the November and December Fed meetings. The fund ended the guarter with a weighted average maturity (WAM) of 50 days versus 50 days last quarter.

Expect HKD funding to remain tight in the fourth quarter, given the hawkish comments from Fed officials have indicated a preference for further rate hike this year and the 'higher-for-longer' interest rate regime should continue to support the HIBOR curve. Meanwhile the stimulus from China could also provide support to Hong Kong equities, which would further tighten HKD funding if market chasing the equities higher move causing more leveraging demand for HKD. We would look to selectively invest in the 3-month/4-month/6-month space if we are appropriately paid. In the near term, we expect to stay short in light of the conflicts in Israel while at the same time position for the next Fed meeting. We expect our WAM to stay closer to the higher end of the 40-50 days target range.

#### 其余展望 **Fund outlook**

香港金融管理局(金管局)跟隨美國聯儲局步伐,於季內上調基準利率一次,將利率由5.50%上調至5.75%。季內,香港金管局於本月並無干預外匯市場, 結餘總額維持約450億港元。

季內,香港銀行同業拆息趨升。一個月香港銀行同業拆息上升46個基點至5.40%,而三個月及六個月香港銀行同業拆息分別上升30個基點及42個基點至

三個月外匯基金票據收益率由上季的4.17%上升至4.73%,而六個月外匯基金票據收益率則由上季的4.17%上升至4.73%。

基金經理持續利用隔夜存款及短期香港庫券管理流動資金。鑑於季內香港銀行同業拆息曲線趨升,每當定期存款利率應因資金緊縮而調整時,我們把 握具吸引力的定期存款優惠配置部分到期資產至三個月/四個月/六個月存款/存款證。鑑於預期美國政策利率將於今年較後時間見頂,我們亦將部分 到期資產滾存至下年度。季內,由於一個月至六個月香港銀行同業拆息曲線大致趨平,我們審慎配置部分到期資產,以觀望聯儲局於十一月及十二月的 會議結果。季內,基金的加權平均到期期限為50日,上季同樣為50日。

鑑於聯儲局官員發表強硬言論,表示今年內有可能再度加息一次,而利率在較長時間處於高位的情況可望支持香港銀行同業拆息,預期第四季香港資金 會持續緊張。此外・中國當局推出刺激政策亦利好港股市場・而當市場看好股票上漲・港元融資需求便會増加・導致港元資金進一步緊張。我們將因應 回報合理性選持三個月/四個月/六個月投資產品。短期內,我們預期將因應以色列衝突事件及下一次聯儲局會議選持短倉。預期基金的加權平均到期 期限將維持於40至50日範圍的上限。

Following the US Federal Reserve (Fed), Hong Kong Monetary Authority (HKMA) raised its base rate once this quarter to 5.75% from 5.50%. During the guarter, there was no foreign exchange intervention by the HKMA this month and the Aggregate Balance remained stable at around HKD45 billion.

The Hong Kong Interbank Offered Rate (HIBOR) curve shifted higher over the quarter. HIBOR 1-month was 46 bps higher at 5.40%, whereas HIBOR 3-month and 6-month moved higher by 30 bps to 5.27% and 42 bps to 5.39% respectively.

3-month Exchange Fund Bills (EFB) yield moved higher to 4.73% vs 4.17% last quarter, while 6-month EFB yield moved higher to 4.73% vs 4.17% last

The Fund Manager continued to use overnight deposits and short-term Hong Kong Treasury Bills for liquidity management. Given HIBOR curve continued to shift higher over the quarter, we have taken the advantage of the attractive term premium by extending into 3-month/4-month/6-month deposit/Certificate of Deposit space whenever term rates react to tightened funding. We also rolled some maturities into the next year given the expectation of peaking of US policy rate later in the year. Since HIBOR curve remained largely flat from 1-month to 6-month over the quarter, we have selectively positioned some maturities around the November and December Fed meetings. The fund ended the quarter with a weighted average maturity (WAM) of 50 days versus 50 days last quarter.

Expect HKD funding to remain tight in the fourth quarter, given the hawkish comments from Fed officials have indicated a preference for further rate hike this year and the 'higher-for-longer' interest rate regime should continue to support the HIBOR curve. Meanwhile the stimulus from China could also provide support to Hong Kong equities, which would further tighten HKD funding if market chasing the equities higher move causing more leveraging demand for HKD. We would look to selectively invest in the 3-month/4-month/6-month space if we are appropriately paid. In the near term, we expect to stay short in light of the conflicts in Israel while at the same time position for the next Fed meeting. We expect our WAM to stay closer to the higher end of the 40-50 days target range.

「 こと いことは y TVLD 3.57 / 10 ID/D/J 2033 3.5 在美國經濟數據強勁、企業盈利優於預期及趙脹低於預期帶動下・風險資產於第三季上升。由於市場憂慮經濟向好可能導致利率較長時間處於高位・延遲潛在加息的時間表・投資者情緒於八月有所轉變・並於九月進一步鞏固・在聯邦公開市場委員會會議後・聯儲局可能認為對利率觀點的限制性不足・導致收益率進一步攀升・風險資產出現拋售潮。

在長期債券顯著上升帶動下,美國國庫券曲線趙升,並於第三季逐漸平穩下來。兩年期、五年期、十年期及三十年期美國國庫券收益率於季內分別上升15個基點、45個基點 73個基點及84個基點至5.04%、4.61%、4.57%及4.70%。

期內,由於按揭抵押證券表現跑輸美國國庫券及企業債券,因此策略超配相關債券有損回報。隨著金融債券及企業債券表現出色,有關表現因超配金融企業信貸多於非金融 企業信貸而被部分抵銷。基金持有的少量BB級債券利好策略表現,原因是基準內的相關債券表現優於投資級別債券。季內,受加息影響,偏長的存續期配置拖累表現。 基金維持超配優質債券,尤其是我們認為受短期波動性及長期經濟下行影響較大的債券。基金對投資組合維持偏長的存續期配置,預期曲線將走峭。

In the third quarter saw a risk asset rally thanks to strong US economic data, better than expected corporate earnings and inflation that came in at below expectations. Sentiment changed in August as markets worried a stronger economy would have rates higher for longer and delay potential rate cuts, a sentiment that was reinforced in September following the Federal Open Market Committee (FOMC) meeting with the Federal Reserve (Fed) potentially perceiving its view on rates as insufficiently restrictive causing a further jump in yields and a selloff in risk assets.

The US Treasury curve rose, normalizing somewhat in the third quarter driven by a more pronounced rise in longer dated bonds. The 2-year, 5-year, 10-year and 30-year yields moved 15 bps, 45 bps, 73 bps and 84 bps to finish the quarter at 5.04%, 4.61%, 4.57% and 4.70% respectively

The overweight to Mortgage-Backed Securities detracted as this segment underperformed both Treasuries and corporate bonds over the period. This was partially offset by the overweight to financial corporates vs non financials as financials outperformed with in the corporate sector. The small exposure to BB rated bonds was beneficial to performance as this segment outperformed the Investment Grade bonds in the benchmark. The overweight to duration detracted as rates rose over the guarter.

We remain up in quality especially in sectors we believe could be more vulnerable to short term volatility and the longer-term economic downturn. The portfolio remains overweight to duration, positioned for a steepener along the yield curve

Over the third quarter of 2023, global bond yields rose as rates market volatility continued due to inflationary fears and the Federal Reserve (Fed) delivering a hawkish angle and data dependent approach going forwards. At the September Federal Open Market Committee (FOMC) meeting, Fed Chair Jerome Powell confirmed expectations of higher-for-longer policy rates, reflecting upward revisions to their economic growth projections. Growth in the third quarter looks likely to be closer to 3.0% Quarter on Quarter (QoQ) annualised, with robust consumer spending playing an important role, however this appeared to reflect a further decline in the savings rate from an already low level. Inflation was on a moderating trend with core goods prices rising at close to their pre-pandemic average pace while shelter price inflation has also started to slow. In the Eurozone, growth has stagnated with notable weakness in household consumption. The latest Purchasing Managers' Index (PMI) readings had rigidated that growth could turn negative as early as this quarter. Despite the weakness, the labour market remained solid and inflation was cooling, but against a backdrop of still sticky core inflation, the European Central Bank (ECB) did not rule out the possibility of further rate hikes at Jackson Hole. Over the quarter, the US Treasury yield curve shifted upwards, with the 2-year/10-year segment of the curve became less inverted, on the back of the disinflation trend, still strong labour market, and hopes of a soft landing.

The fund registered a negative return over the quarter. Duration exposure detracted the most from the performance, particularly from the fund's positions in US Treasuries and European government bonds as yields moved broadly higher. Foreign exchange impact also detracted, predominantly from the Euro and the Japanese Yen. Meanwhile, credit exposure in Asia also dragged relative returns, particularly from Real Estate, Consumer Cyclical and Investment companies' bonds. In addition, yield carry helped adding value.

美元債券 USD bonds 27.7%

環球股票於二零二三年上半年錄得強勁升幅,但於第三季錄得負回報。季內,政府債券同樣下跌,但收益率上升。七月聯邦公開市場委員會未有釋出重大訊號,並符合普遍預期加息25個基點。聯儲局主席鮑威爾重申,任何將會採取的政策行動均會視乎經濟數據而定。八月,宏觀經濟前景轉弱、通脹持續高企及債券收益率上升均拖累投資者情緒。市場憂慮美國增加債券發行規模,拖累國庫券市場表現。八月,惠譽國際將美國債券評級由[AAA]下調至[AA+],以反映債務負擔提高。

US Treasury N/B 2.625% 31/07/2029

US Treasury N/B 3.50% 15/02/2033

季內基金錄得負回報,股票市場表現為主要拖累因素。由於美國國庫券收益率上升,加上中國及亞洲缺乏新的增長動力,導致環球股票回落。固定收益方面,在 利率較長時間處於高位的環境下,美國債券收益率於近月上升,導致環球政府債券下跌。然而,短期亞洲投資級別債券表現較好出色,抵銷了部分不利影響。

After strong gains for shares in the first half of 2023, global equities posted a negative return in the third quarter. Government bonds also declined in the quarter, with yields rising. There was little surprise from the July Federal Open Market Committee (FOMC) meeting as the 25 bps hike was delivered as widely expected. Chair Powell has reiterated the Federal Reserve's (Fed) data dependent approach on any upcoming policy action. In August, weakening macro-economic outlook, sticky inflation, and an increase in bond yields weighed on investor sentiment. Concerns over rising US debt issuance weighed on the Treasury market. August saw Fitch Ratings downgrade the US's triple-A rating drop to double-A plus, citing the growing debt burden as reason for its decision.

The fund generated negative return during the quarter with the performance of the equity markets being the main detractors. Global equities retreated due to the rising US Treasury yields and the lack of fresh growth momentum out of China and Asia. On the fixed income front, global government bonds suffered a loss as US yields rose over the months against a higher-for-longer interest rate environment. However, the negative impact is partly mitigated by the better performance of Asia investment grade bonds which have shorter-duration profiles.

環球股票於二零二三年上半年錄得強勁升幅,但於第三季錄得負回報。季內,政府債券同樣下跌,但收益率上升。七月聯邦公開市場委員會未有釋出重大訊號,並符合普遍預期加息25個基點。聯儲局主席鮑威爾重申,任何將會採取的政策行動均會視乎經濟數據而定。八月,宏觀經濟前景轉弱、通脹持續高企及債券收益率上升均拖累投資者情緒。市場憂慮美國增加債券發行規模,拖累國庫券市場表現。八月,惠譽國際將美國債券評級由「AAA」下調至「AA+」,以反映債務負擔提享。

季內基金錄得負回報,股票市場表現為主要拖累因素。由於美國國庫券收益率上升,加上中國及亞洲缺乏新的增長動力,導致環球股票回落。固定收益方面,在 利率較長時間處於高位的環境下,美國債券收益率於近月上升,導致環球政府債券下跌。然而,短期亞洲投資級別債券表現較好出色,抵銷了部分不利影響。

After strong gains for shares in the first half of 2023, global equities posted a negative return in the third quarter. Government bonds also declined in the quarter, with yields rising. There was little surprise from the July Federal Open Market Committee (FOMC) meeting as the 25 bps hike was delivered as widely expected. Chair Powell has reiterated the Federal Reserve's (Fed) data dependent approach on any upcoming policy action. In August, weakening macro-economic outlook, sticky inflation, and an increase in bond yields weighed on investor sentiment. Concerns over rising US debt issuance weighed on the Treasury market. August saw Fitch Ratings downgrade the US's triple-A rating drop to double-A plus, citing the growing debt burden as reason for its decision.

The fund generated negative return during the quarter with the performance of the equity markets being the main detractors. Global equities retreated due to the rising US Treasury yields and the lack of fresh growth momentum out of China and Asia. On the fixed income front, global government bonds suffered a loss as US yields rose over the months against a higher-for-longer interest rate environment. However, the negative impact is partly mitigated by the better performance of Asia investment grade bonds which have shorter-duration profiles.

Asia Pacific ex Japan equity markets fell in the third quarter, which was the second consecutive quarter with negative performance. The region also underperformed the global market

ASEAN (including Malaysia, Singapore, Thailand and Indonesia) is the best performing market in September as the region is a major beneficiary of the rising oil price. Mainland China also outperformed the general Asian market driven by policy stimulus after disappointing activity data in the second quarter, despite headwinds in the mainland China housing market. Hong Kong SAR is the worst performing market in Asia for the quarter due to worsening concerns over the mainland China property crisis and expectation of tighter interest rate condition.

By sector, Energy and Consumer Discretionary were the best performing sectors while Real Estate and Technology were the worst performing sectors for the quarter

Both sector allocation and geography allocation effects were positive while stock selection effect was negative in the third quarter. Positive stock selection in Energy and Real Estate was offset by unfavorable stock selection in Technology and India.

We are of the view that Asia continues to be a primary beneficiary to technology upgrades, for example in the area of Artificial Intelligence (Al) where we continue to see selective Taiwan and Korea hardware companies that are beneficiaries of the theme trading at relatively reasonable valuation with good earnings profile and this is an area we will continue our stock selection efforts on.

Overall we remain focused on adopting a bottom-up stock selection approach on companies with (a) less earnings pressure from a deteriorating macro backdrop, (b) business models with strong competitive positioning and healthy balance sheets (with cash flows being a key metric) such that they have stronger shock buffers to withstand changes in the macro environment. Valuations and valuation support have always been and will continue to be a focus for us. We remain a high conviction, patient and bottom up investment approach, and would continue to regularly assess the fundamentals of the companies we hold and adjust our portfolio positioning as and when attractive risk reward opportunities arise.

儘管當局可能推出寬鬆政策,為中國股票市場於七月帶來短暫升勢,但房地產市場的陰霾揮之不去,加上市場憂慮有關影響會波及整體金融和經濟環境,導致 中國股票市場於第三季下挫。

七月中央政治局會議釋出較市場預期寬鬆的政策訊號,值得留意的是官方聲明未有再提及「房住不炒」。另外,聲明提及「制定實施一籃子的化債方案」,反映當局降低地方政府融資尾部風險的決心。

某大民營房地產發展商未能償還於八月七日到期的票息,總額達2,250萬美元,再次引起市場對房地產市場泡沫蔓延的憂慮,但種種跡象日益反映短期增長仍然 平穩。在工業產值及零售銷售回升帶動下,八月經濟活動數據出乎意料地上升。

基金於第三季行業配置失利,但選股得宜。能源及金融選股得宜利好基金表現,但被通訊及科技選股失利所抵銷。

Chinese Equity market dropped on rising concerns related to the housing market and its contagion to the financial economy in the third quarter despite a short rally in July on likely policy relief.

July Politburo meeting sent more dovish policy signals than market expected, notably the phrase 'housing is for living in, not for speculation' was removed from the official statement. Similarly, the statement 'to formulate and implement a basket of debt resolution plans' suggested lower tail risk associated with local government financing vehicles (LGFV).

One of the largest POE property developers missed coupon payments totalling USD22.5 million due on 7 August, which has renewed property contagion concerns. However, there is increasing evidence of a near-term growth stabilization. August activity data delivered a notable upside surprise, led by a bounce in industrial production and retail sales.

Sector allocation effect was negative while stock selection effect was positive in the third quarter. Positive stock selection in Energy and Financials were offset by unfavorable stock selection in Telecommunications and Technology.

地區方面,英國股票於二零二三年第三季上升,但在加息的負面影響引起市場憂慮下,經濟增長情況打擊投資者情緒,歐元區股票下跌。

荷蘭、丹麥及比利時選股得宜為基金表現帶來貢獻。行業選股表現不一,物料、運輸及保險選股為表現帶來貢獻,但科技、硬件及設備、媒體與娛樂及房地產管理與發展選股拖累基金表現。

At a regional level, Equities in the UK rose in the third quarter of 2023 meanwhile, Eurozone shares also fell with concerns surrounding the negative effect of interest rate rises dampening sentiment about economic growth.

Stock selection in Netherlands, Denmark and Belgium contributed positively to performance. Selection within sectors was mixed, with contribution from Materials, Transportation, and Insurance while Technology Hardware & Equipment, Media & Entertainment, and Real Estate Management & Development detracted the performance.

Chinese and Hong Kong equity market dropped on rising concerns related to the housing market in mainland China and its contagion to the financial economy in the third quarter. Hong Kong SAR's economic recovery unexpectedly took a step back in the second quarter following a strong rebound in the first quarter. The main drag was a large drawdown in inventories, while underlying strength in domestic consumption and services exports continued.

July Polithuro meeting sent more dovish policy signals than market expected, notably the phrase 'housing is for living in, not for speculation' was removed from the official statement. Similarly, the statement "to formulate and implement a basket of debt resolution plans" suggested lower tail risk associated with local government financing vehicles (LGFV).

One of the largest POE property developers in mainland China missed coupon payments totalling USD22.5 million due on 7 August, which has renewed property contagion concerns. However, there is

increasing evidence of a near-term growth stabilization after a series of policy easing measures.

Mainland China's growth momentum has likely bottomed out in August. Most of August economic activities improved modestly from weak readings in July, with retail sales, industrial production and exports better than market expectations. The accommodative monetary stance should help to support credit demand as well as provide liquidity support amid increased demand such as from government bond issuance. New home sales picked up after the introduction of new property easing policies, led by first-tier cities. The effectiveness of recent easing measures to deliver results in excess of seasonal fluctuations remains to be seen, especially. November data. We expect more concrete policy evidence from the government to support growth through fiscal measures, i.e. urban village renovation projects, local government financing vehicle (LGFV) debt swap.

The low valuation of Hong Kong stock market, especially against other developed markets and other countries in Asia, has priced in a relatively pessimistic outlook following a slower recovery. A pro-growth policy orientation is one of the key anchors to re-rating opportunities in Chinese equities.

中國內地房地產市場的陰霾揮之不去,加上市場憂慮有關影響會波及整體金融和經濟環境,導致中國及香港股票市場於第三季下挫。 在第一季錄得強勁經濟復甦後,香港特別行政區第二季經濟復甦表現放緩,主要拖累因素是庫存大幅下降,但本地需求及服務業出口表現仍保持強勁勢頭。 七月中央政治局會議釋出較市場預期寬鬆的政策訊號,值得留意的是官方聲明未有再提及[房住不炒]。另外,聲明提及[制定實施一籃子的化債方案],反映當局降低地方政府融資尾部風險的決

Chinese and Hong Kong equity market dropped on rising concerns related to the housing market in mainland China and its contagion to the financial economy in the third quarter

Hong Kong SAR's economic recovery unexpectedly took a step back in the second quarter following a strong rebound in the first quarter. The main drag was a large drawdown in inventories, while underlying strength in domestic consumption and services exports continued.

surerigui in domestic consumption and services exports continued.

July Politburo meeting sent more dovish policy signals than market expected, notably the phrase "housing is for living in, not for speculation" was removed from the official statement. Similarly, the statement 'to formulate and implement a basket of debt resolution plans' suggested lower tall risk associated with local government financing vehicles (LGFV).

One of the largest POE property developers in mainland China missed coupon payments totalling USD22.5 million due on 7 August, which has renewed property contagion concerns. However, there is increasing evidence of a near-term growth stabilization after a series of policy easing measures.

Sector allocation effect was negative while stock selection effect was positive in the third quarter. Positive stock selection in Energy and Real Estate were offset by unfavorable stock selection in Consumer Staples and Financials.

於二零二三年上半年錄得穩健表現後,美國市場於季內表現動盪,並錄得負回報。雖然受煙濟增長、通脹放緩及利率可能接近見頂等利好消息刺激,帶動季初美國市場表現向好,但隨著聯儲局重申強硬立場,表示利率將[較長時間處於高位]後,樂觀情緒於往後數月備受打擊。宏觀經濟方面,經濟增長仍具韌性,通脹亦有緩和跡象。雖然預期疫情期間累積的超額儲蓄優勢將會減退,但消費者信心及消費數據表現穩健。隨著失業率輕微上升,工資持續增長,勞工市場出現族跡象。整體而言,勞工市場持續緊張。季內,在石油輸出國組織宣布減產下,原油價格上升,使能源股表現一般獨秀。期內,受先前表現後劉的超及一型科技股根果,資訊科技股線得負回報。八月,信貸評級機構無數十期美國評級,導致市場出現波動。於七月會議宣布加息0.25%後,聯儲局於九月維持利率不變。儘管市場對此反應正面,但聯儲局整體立場仍保持強硬,反映利率可能會在較預期更長的時間內維持高位。

While the period began positively surrounding optimistic news on economic growth, softening inflation and the likelihood of interest rates nearing its peak, enthusiasm waned over the ensuing months as the Federal Reserve (Fed) reterated its hawkish tone, indicating a 'higher-for-longer' interest rate environment. On the macroeconomic front, economic growth remained resilient, while inflation showed signs of moderating. Consumer confidence and consumption data remained healthy, although tailwinds from excess savings during the pandemic phase are expected to fade. The labour market showed some signs classing, as unemployment increased slightly while wages continued to grow. Overall, the labour market continues to remain tight. Energy was among the top performing sectors during the quarter, buoyed by an uptick in oil prices owing to production cuts by Organization of the Petroleum Exporting Countries (OPEC). The IT sector produced negative returns during the period, dragged by previously buoyant mega cap tech stocks. In August, credit rating agency Fitch downgraded the US, leading to some volatility in the markets. After rating interest rates by 0.25% in its July meeting, the Fed kept rates steady in its September meeting. Although this was viewed positively, the Fed's overall tone was still hawkish indicating that interest rates could remain at elevated levels for longer than expected.

#### 基金展望 Fund outlook

3-month Exchange Fund Bills (EFB) yield moved higher to 4.73% vs 4.17% last quarter, while 6-month EFB yield moved higher to 4.73% vs 4.17% last quarter.

The Fund Manager continued to use overnight deposits and short-term Hong Kong Treasury Bills for liquidity management. Given HIBOR curve continued to shift higher over the quarter, we have taken the advantage of the attractive term premium by extending into 3-month/4-month/6-month deposit/Certificate of Deposit space whenever term rates react to tightened funding. We also rolled some maturities into the next year given the expectation of peaking of US policy rate later in the year. Since HIBOR curve remained largely flat from 1-month to 6-month over the quarter, we have selectively positioned some maturities around the November and December Fed meetings. The fund ended the quarter with a weighted average maturity (WAM) of 50 days versus 50 days last quarter.

Expect HKD funding to remain tight in the fourth quarter, given the hawkish comments from Fed officials have indicated a preference for further rate hike this year and the 'higher-for-longer' interest rate regime should continue to support the HIBOR curve. Meanwhile the stimulus from China could also provide support to Hong Kong equities, which would further tighten HKD funding if market chasing the equities higher move causing more leveraging demand for HKD. We would look to selectively invest in the 3-month/4-month/6-month space if we are appropriately paid. In the near term, we expect to stay short in light of the conflicts in Israel while at the same time position for the next Fed meeting. We expect our WAM to stay closer to the higher end of the 40-50 days target range.

#### 基金展望 **Fund outlook**

環球股票於二零二三年上半年錢得強勁升幅,但於第三季錄得負回報。季內,政府債券同樣下跌,但收益率上升。七月聯邦公開市場委員會未有釋出重大訊號,並符合普遍預期加息25個基點。 聯儲局主席鮑威爾重申,任何將會採取的政策行動均會視乎經濟數據而定。八月,宏觀經濟前景轉弱、通脹持續高企及債券收益率上升均拖累投資者情緒。市場憂慮美國增加債券發行規模,拖 累國庫券市場表現。八月,惠譽國際將美國債券評級由[AAA]下網至[AA+],以反映債務負擔提高。

李内基金錄得負回報,股票市場表現為主要拖累因素。由於美國國庫券收益率上升,加上中國及亞洲缺乏新的增長動力,導致環球股票回落。固定收益方面,在利率較長時間處於高位的環境下, 美國債券收益率於近月上升,導致環球政府債券下跌。然而,短期亞洲投資級別債券表現較好出色,抵銷了部分不利影響。

After strong gains for shares in the first half of 2023, global equities posted a negative return in the third quarter. Government bonds also declined in the quarter, with yields rising. There was little surprise from the July Federal Open Market Committee (FOMC) meeting as the 25 bps hike was delivered as widely expected. Chair Powell has reiterated the Federal Reserve's (Fed) data dependent approach on any upcoming policy action. In August, weakening macro-economic outlook, sitcly inflation, and an increase in bond yields weighed on investor sentiment. Concerns over rising US debt issuance weighed on the Treasury market. August saw Fitch Ratings downgrade the US's triple-A rating drop to double-A plus, citing the growing debt burden as reason for its decision.

The fund generated negative return during the quarter with the performance of the equity markets being the main detractors. Global equities retreated due to the rising US Treasury yields and the lack of fresh growth momentum out of China and Asia. On the fixed income front, global government bonds suffered a loss as US yields rose over the months against a higher-for-longer interest rate environment. However, the negative impact is partly mitigated by the better performance of Asia investment grade bonds which have shorter-duration profiles.

- The launch date of the Hang Seng Index Tracker Fund refers to the date on which the first valuation takes place. The fund has been available under WMFS from 23 November 2020, however, the fund performance is calculated from its launch date.
- Declared Rate is declared annually at the end of the financial year. The year-to-date Declared Rate is determined based on the difference in the unit prices over the relevant period and is for reference only.
  - For Central Provident Fund, both the Declared Rate and the yearto-date Declared Rate on an annualised basis would not be less than the guaranteed return as stated in the investment objectives of the fund.
  - For Capital Guaranteed Fund, both the Declared Rate and the yearto-date Declared Rate would not be negative.

When the Declared Rate of the year has been declared as soon as practicable after 31 December each year, the value of each members' account will be adjusted in the form of additional units in order to ensure that the return of that member's investments in the fund for that year is in accordance with the Declared Rate. Conversely, the member would not be entitled to such additional units should the member's investment be redeemed from the fund in the middle of a financial year, and the return of the member would be calculated according to the year-to-date Declared Rate which could be less than the Declared Rate

- # Percentage may not add up to 100 due to rounding.
- <sup>‡</sup> Cumulative performance is calculated based on the unit price of the last valuation day at the end of the quarter.
- Period returns are calculated based on the unit price of the last business day of each year.

Cumulative performance and period return are calculated in the fund currency on the basis of NAV-to-NAV (net asset value).

• The risk rating is defined using a 5-point risk scale with risk rating "1" representing the lowest risk and risk rating "5" representing the highest risk. The risk rating is derived based on a combination of quantitative and qualitative risk factors including price volatility, asset allocation and liquidity.

The following provides a general description of the risk rating categorisation.

- 1 = Low Risk Minimal chance of losing a significant portion of your capital over the term of the investment (although this is not guaranteed). Expected to demonstrate minimal price fluctuations over short periods of time.
- 2 = Low to Medium Risk Low chance of losing a significant portion of your capital over the term of the investment (although this is not guaranteed). Expected to demonstrate moderately low level of price fluctuations over short periods of time.
- $3 = \text{Medium Risk} \text{Moderate chance of losing a significant portion of your capital over the term of the investment (although this is not guaranteed). Expected to demonstrate moderate level of price fluctuations over short periods of time.$
- $4=\mbox{Medium}$  to High Risk Moderately high chance of losing a significant portion of your capital over the term of the investment. Expected to demonstrate moderately high level of price fluctuations over short periods of time.
- 5 = High Risk High chance of losing a significant portion of your capital over the term of the investment. Expected to demonstrate high level of price fluctuations over short periods of time.
- The above risk ratings are based on data up to 31 March 2023.

The risk ratings are provided by HSBC Group Management Services Limited.

The above risk ratings are provided for reference only, normally reviewed at least annually and may be subject to change from time to time without any notice.
